

dormakaba Terminal 97 00

Time registration and more

Versatile, multifunctional and individual

This all-rounder, which can be expanded on a modular basis, stands for modern and straightforward time registration, as well as intelligent access management and targeted employee communication. It is also easy to integrate multimedia content such as training videos, company-related apps and employee information into the terminal. The terminal has an individual look with new default colours and a whole host of new icons. The user interface is freely configurable. The display can be customised to fit in with your company image, with your own background images, colours, signal tones, apps and multimedia content. The terminal not only ensures efficient time registration but, thanks to the standby function, it is also energy efficient.

Option packages to suit your requirements

Terminal 97 00 is available in three different versions. With option package 97 20, you receive an entry-level device that provides you with all the functions you need for reliable time registration within your company. Option package 97 40 also gives you the option of using access control functions. These include monitoring and control of doors, and the connection of offline door components using CardLink. The option package 97 60 is equipped with an uninterruptible power supply, meaning you are well prepared for power failures. This version has a camera and can manage up to 10,000 employees.

Advantages at a glance

- Secure and simple data registration
- 7" touchscreen with bright display and robust glass front
- Customisable user interface
- Customisable acoustic booking response
- Supports standard RFID media
- Integration of biometric identification and verification solutions
- Multimedia support and individual apps thanks to HTML5
- Compatible with previous terminal series
- CardLink
- Integrated microphone
- Integrated speaker
- Optional camera
- 1-click installation

Features

Hardware	Option package 97 20	Option package 97 40	Option package 97 60
Basic device	●	●	●
