KABA MAS®
PRODUCT BULLETIN

PRODUCT: Cencon/CenTran
SUBJECT: End of Binary File Format Support for CenTran
BULLETIN: #048
DATE: August 20, 2013

Legacy binary file transactions, which were deprecated in CenTran Version 4.1.5.3097, will be officially removed from CenTran beginning with Version 5.1.0.XXXX. The binary file format will not support the new 9 digit lock serial number format. As a result, no new features will be added. Kaba Mas recommends that any use of the legacy binary file format be migrated to the XML file format as described in the CenTran Programming Reference Manual.
