DEC 6 PLUS

Masterkeying Typologies

dormakaba's MasterKeying Systems is a complete product range that provides the most extensive access security solutions, which can be customized for medium facilities to smaller facilities for niche customer profiles. The various typologies of dormakaba's MasterKeying Systems are as illustrated below:

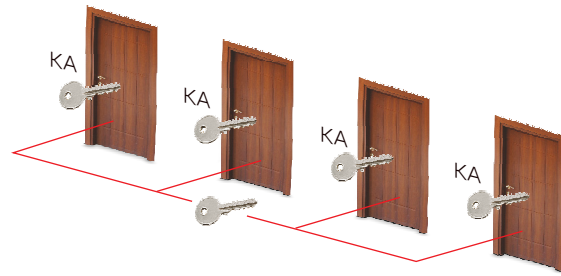

KEY TO DIFFER (KD)

- Each cylinder can be opened by its own key.

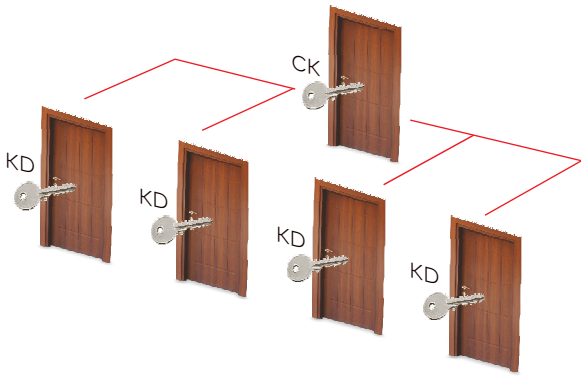

KEYED ALIKE (KA)

- Several cylinders with the same coding can be opened by the same key.

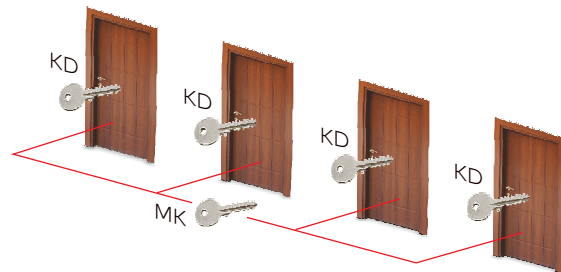

COMMON LOCK SYSTEM (CK)

- Each key opens only its own cylinder and the central lock cylinder (e.g. the common entrance in an apartment block).

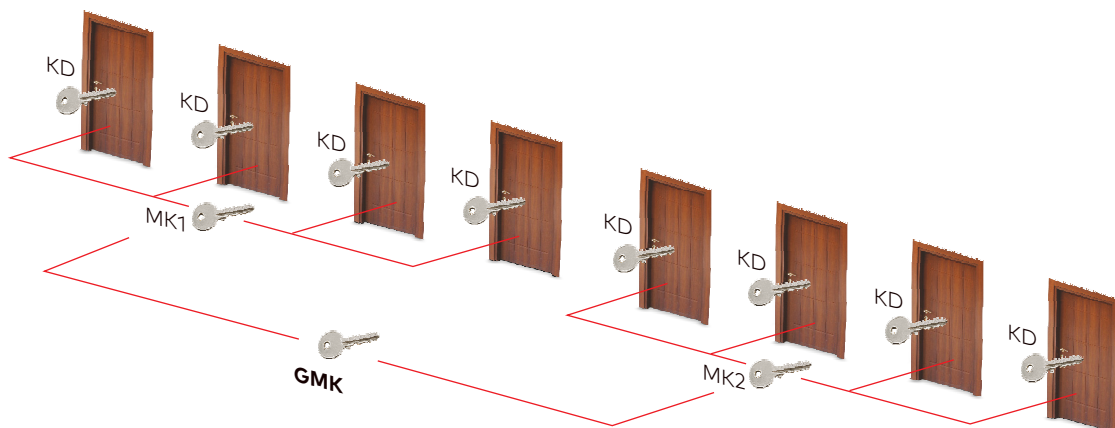

MASTER KEY SYSTEM (MK)

- Each cylinder is opened by its own individual key and by the master key.

GRAND MASTER KEY SYSTEM (GMK)

- Each cylinder is opened by its own individual key, the group master key and the grand master key.

Master Key Cylinders
