B-COMM for PeopleSoft—your one-stop global solution provider for data collection and validation for Oracle's PeopleSoft Time and Labor.

Company Overview

Kaba Workforce Solutions is a leading global provider of workforce management solutions to a wide range of industries. Building on the company's foundation of automated workforce management (WFM) tools, Kaba provides systems that allow clients to efficiently collect, validate, and process workforce time and labor information for enterprise systems optimization. Automation is accomplished through a suite of flexible products that include B-COMM communications software, Kaba badge-based and biometric data collection terminals, and various third-party devices that allow for mobile data collection.

Integration Overview

B-COMM for PeopleSoft is communication software that links Oracle's PeopleSoft Time and Labor to Kaba time-collection terminals to automate and validate the collection of employee data. Automating the data collection process results in substantial savings to your company because time and labor information is collected, validated, and sent to PeopleSoft Time and Labor in a timely and accurate fashion, eliminating delays and errors.

Product features include:

- Connection to PeopleSoft Time and Labor from Kaba or third-party time collection devices
- Simple, intuitive interface for improved user acceptance and accuracy
- Ability to record employee punch time—clock in, clock out, start break, start meal, transfer; punched time may also include labor (task) data
- Ability to record employee elapsed events—vacation time, sick days, jury duty, holidays, etc.; elapsed time may also include labor (task) data

Task data may be in the form of a simple task name or may be multilevel recording.

Validated Integration

PeopleSoft

Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.
