

# Cloud-based Access Control

exivo<sup>®</sup> by dormakaba

# Discover how Easy Access Control can be

Imagine having access rights in your organisation fully under control - at any time, for any room and for each person. From your desk or when you are on the move. It is easy - with exivo.

[www.dormakaba.com/exivo](http://www.dormakaba.com/exivo)

## Cloud-based

exivo is a cloud-based access solution. No server, no additional computer and no other software are required. We developed exivo specially for companies that need an access solution, but don't want to waste any time on installing or managing it.

## Flexible

exivo adapts to your needs. You decide which doors are going to be additionally secured with electronic and wireless locking components. You can change or cancel access rights whenever you want. Adapting and updating the system couldn't be easier,

## Secure

Due to the EU General Data Protection Regulation, companies are obliged more than ever to protect their sensitive data. Expensive equipment or goods may also be stored on the premises. With exivo you are on the safe side.

# Secure Access Systems

## A Must in Every Sector

### Coworking & Small businesses

#### Smart access with minimum effort

exivo offers secure and flexible 24/7 access to office premises for small businesses and coworking spaces. Manage access rights efficiently, save costs, and grant remote access to customers, tradespeople, and suppliers during or outside of business hours without staff being present. Businesses and coworking spaces with limited resources and stretched working hours get the flexibility and control they need.

- Defined, temporary access for customers, suppliers or tradespeople via smartphone
- Remote and real-time issuing and revoking of access rights
- 24h office use without 24h staffing

### Leisure & Sports facilities

#### 24/7 booking and training

No matter whether first thing in the morning at the gym or a game of tennis at night – exivo helps sports facilities to grant and manage access rights without staff on the premises.

- 24/7 operation of sports facilities possible
- API to allow user-friendly online booking
- Access rights sent to your mobile phone
- Heating and lighting systems activated on demand

### Retail & Branch chains

#### On-demand access

In business, staff need to be deployed flexibly. Employees work in different branches. Many are part-timers and temporary workers, so personnel turnover is high. exivo always provides complete transparency.

- Fast and easy issuing of access rights
- No problems with lost keys
- Easy connectivity for branches

### Service providers

#### Security for all data

Solicitors, accountants or advertising agencies – service providers have to protect their sensitive customer data. exivo provides full control of access management and accommodates freelancers flexibly.

- Clearly defined access rights and seamless access logging
- Controlled access for freelancers or suppliers
- Targeted protection of sensitive data and expensive equipment

# Easy Planning

## Fast Assembly

Upon placing your order, your exivo partner can set up the system online even before it is installed. It is very simple thanks to the central exivo platform: plan doors, insert door components, create users and issue access rights. The system is ready for operation as soon as the components are installed. It couldn't be easier for you to get your access control started.

### Benefits

- Easy planning and configuration via the cloud-based platform
- Fast installation with no interruption of daily business
- Straightforward setup, as thanks to the central platform, you do not need any special software or a server of your own

# User-friendly operation

## Convenient to use

New users can be created or user rights changed while the system is running. Thanks to the central exivo platform, you can do so easily and conveniently in the browser with no need to install software.

### Benefits

- Hassle-free full-service operation by your exivo partner or do-it-yourself
- Issue and change rights over the intuitive exivo platform
- No problems with lost keys
- Secure access anywhere via the cloud and operation with your smartphone, tablet PC or computer

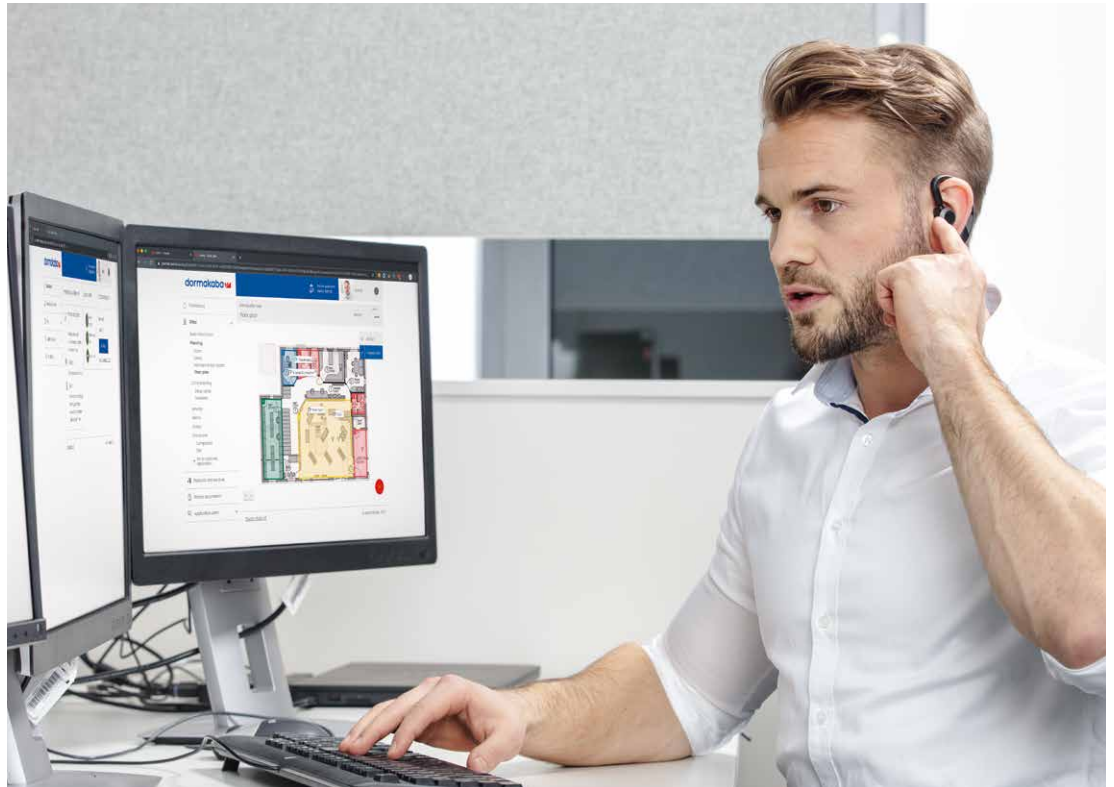

# Responsive service Fast solution

If a question arises or an issue needs to be addressed – no problem. Thanks to the integrated support messenger you have a hotline to your exivo partner, who can also supply expert remote support immediately over the central exivo platform. The exivo system notifies in advance about upcoming service issues such as battery replacements.

## Benefits

- Easy service requests to the exivo partner via the exivo platform
- Straightforward communication with your exivo partner via the integrated support messenger
- Automatic preventive status messages for early intervention
- Direct access to fault messages from components by your exivo partner
- Remote troubleshooting possible

# Cost transparency

## Fair and predictable

You decide exactly what you need. And that is what you pay for – no more and no less. Your fixed costs stay the same. So you enjoy complete transparency and cost control.

### Benefits

- Low initial investment and therefore, budget-conscious
- Predictable costs due to regular monthly fees
- Fair cost structure as you only pay for what you need

# Scalable expansion

## Comprehensive security

New security requirements, new doors or company expansion on the agenda? exivo can be adapted and extended whenever you want, not only with electromechanical and electronic locking components, but also with mechanical locks, if it is practicable. These locks and keys are also managed very simply via the exivo platform.

### Benefits

- Easy to expand and adjust – the system grows with your organisation
- Retrofits for all doors and entrances
- Integrated management of keys and mechanical locks
- Integrated management of keys, cards, key fobs and other access media such as mobile phones as well as the relevant users
- exivo can even manage the mechanical locking systems of other providers.

# Effortless updating

## Automated and secure

No server, no additional computer and no other software are required on site. Everything runs over the central exivo platform. This ensures that you always benefit from all new functions and updates. Security measures are therefore also always updated automatically.

### Benefits

- Easy function expansions thanks to the ongoing development of the cloud-based exivo platform
- Immediate availability of updates via the automatic update function of the central exivo platform
- Maximum security thanks to central exivo platform management on secure protected servers

# exivo

## Overview of the elements

Cloud-based access control from anywhere via secure online access with PC or mobile device

**Wireless door components**  
Electronic door locks and digital cylinders

**Online readers**

**Door controllers and wireless gateways**

Key fobs, badges, smartphones, keys with/without RFID chip

# Smart Access Control

## How exivo benefits your business:

- Access system without additional software or servers
- Easy intuitive operation
- Full support and operation by your exivo partner
- System always up-to-date in terms of functions and security, with no effort on your part
- You decide whether you want your exivo partner to take care of everything for you, or do things yourself, such as creating users
- Cost security and transparency
- Fixed costs, no unpleasant surprises

## How your employees and customers can benefit from exivo:

- User-friendly operation
- Free choice of media including smartphones
- If a key gets lost, simply revoke the access medium and issue a new one
- Access rights can be adjusted at short notice, for instance when someone needs access to the premises after business hours or employees, visitors etc. need temporary access rights

## Your exivo solution:

- Use your exivo web application,
- customise your exivo web application to suit your corporate design or
- integrate it fully into your corporate application with the API interface.

- Planning, installation and optional full-service operation is offered by your exivo partner

## 3 easy steps to exivo

01

### Find out more and contact us

More information about exivo is available at [dormakaba.com/exivo](http://dormakaba.com/exivo). Of course, feel free to contact us directly.

If you tell us where you are based, we can find a suitable exivo partner near you.

02

### Your exivo partner will consult on your requirements

The exivo partner near you will get in touch to arrange an appointment for initial planning of your exivo platform. We will then send you your personal detailed investment breakdown. Only once everything is planned the way you want, do you commission your exivo partner with the project.

03

### Delivery and installation

Your exivo partner takes care of both the delivery and installation of the system. You don't have to worry about anything and can start right away. From the moment you place the order, you already have the option to set up your accesses in the live system. If you need help or support after the installation, we and your exivo partner are available to assist you.

## Our Sustainability Commitment

We are committed to foster a sustainable development along our entire value chain in line with our economic, environmental and social responsibilities toward current and future generations. Sustainability at product level is an important, future-oriented approach in the field of construction. In order to give quantified disclosures of a product's environmental impact through its entire life cycle, dormakaba provides Environmental Product Declarations (EPD), based on holistic life cycle assessments.
