C500 – GRADE 2 CYLINDRICAL LOCKSETS

Providing security, aesthetics, and dependability at an affordable price.

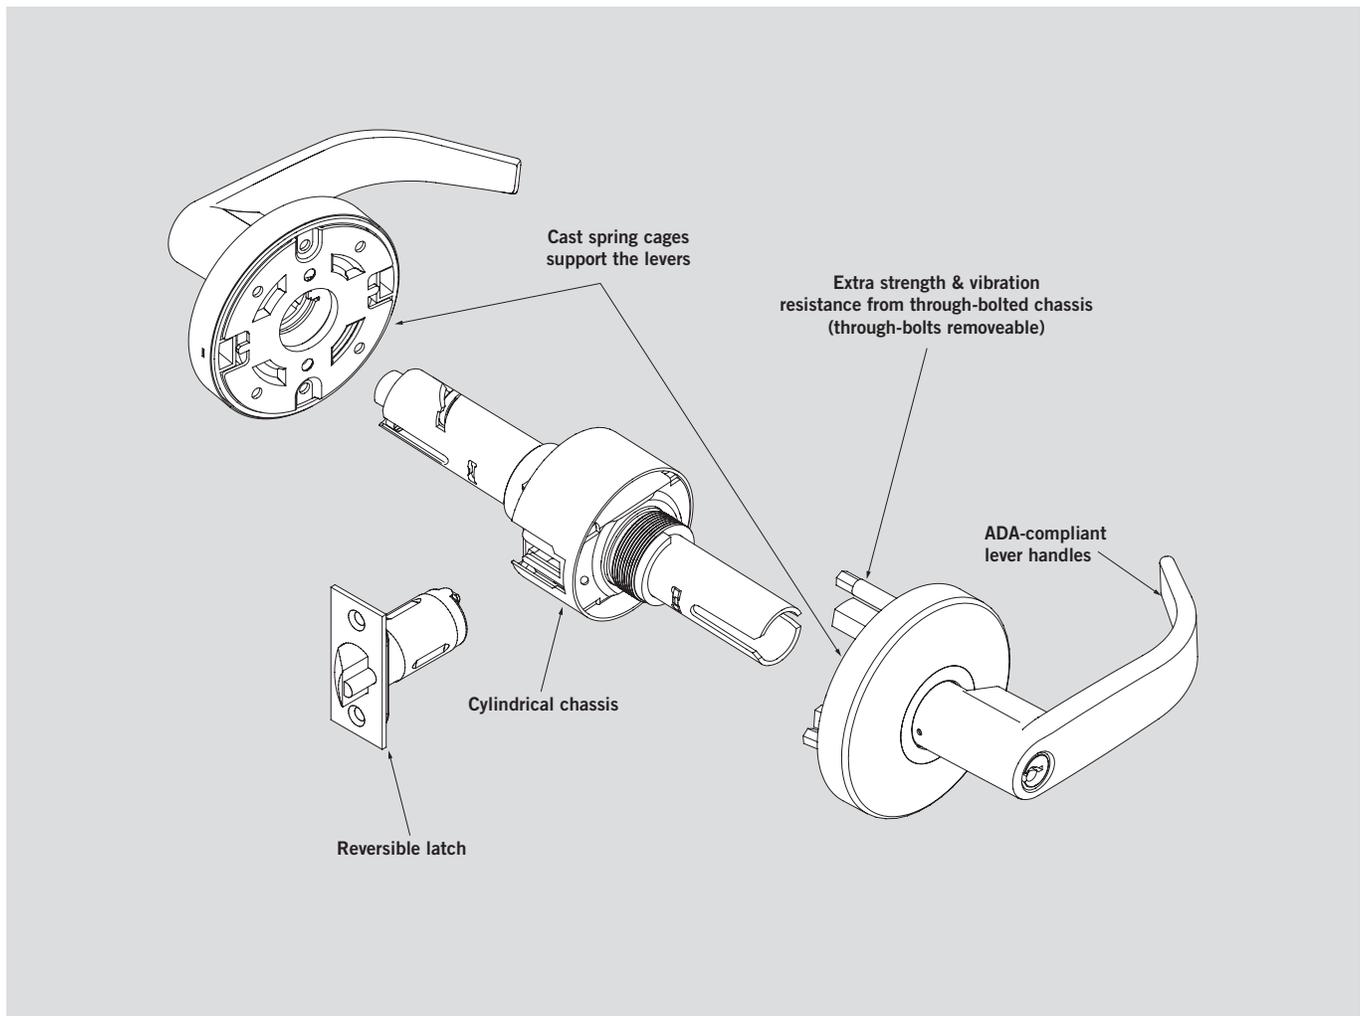

These key-in-lever locksets are built with a high performance cylindrical chassis for all applications where ANSI/BHMA A156.2 Series 4000 Grade 2 products are required. To meet the aesthetic needs of your project, these versatile locks are available with two lever designs, four standard finishes, and two optional finishes. Complementing the aesthetic appeal of the C500 are the ten different functions to help solve your challenging applications.

Features

- All DORMA C500 Series locks feature advanced design concepts, providing exceptional reliability, and are manufactured with the finest materials, delivering enhanced durability.
- DORMA C500 Series locks are easy to install in both wood or hollow metal doors with ANSI/BHMA A156.115 preparations for cylindrical locks.
- All C500 Series lever handle locks include special auxiliary support springs to insure smooth operation and long life.
- C500 Series locksets have an optional through-bolted chassis for additional strength and increased resistance to vibration (through-bolting recommended).
- All C500 Series locks are easily adjustable for doors from 1-3/8"–1-3/4" thick. Consult the factory for product suggestions for thick door applications.

Recommended Applications

- Hotels
- Apartments
- Churches
- Municipal Buildings
- Retail Complexes
- Offices
- Warehouses

Technical Details

- Non-handed for simple installation.
- Key-in-lever lock is through-bolted for additional strength and security.
- Lock chassis constructed of steel, stainless steel and precision castings for superior strength and corrosion resistance.
- Stainless steel latch bolt.
- Auxiliary deadlocking latch bolt for preventing manipulation when door is closed (all keyed functions).

Certification

The DORMA C500 Series products are U.L. and C.U.L listed and three hour fire rated for A label and lesser class single doors, 4'0" x 8'0" maximum.

The DORMA C500 is certified to the requirements of ANSI/BHMA A156.2 Series 4000 Grade 2. The C500 meets A117.1 and ADA requirements for barrier-free accessibility.

Cylinders and Keying

- Unless otherwise specified, cylinders will be provided in DORMA standard keyway with two (2) nickel silver keys.
- Optional patented key system available.
- Refer to **DORMA Price List** for full details and options such as master keying, retrofit cylinders and keyways, and small format and full size interchangeable cores.

Warranty

For details, refer to **Limited Warranty Policy** in the current **DORMA Price List**.

Finishes

- Brass: 605* (Bright, Clear Coated) or 606* (Satin).
- Bronze: 613 (Dark Oxidized Satin).
- Nickel: 619 (Satin).
- Chrome: 625* (Bright) or 626 (Satin).

Special Finish Notes

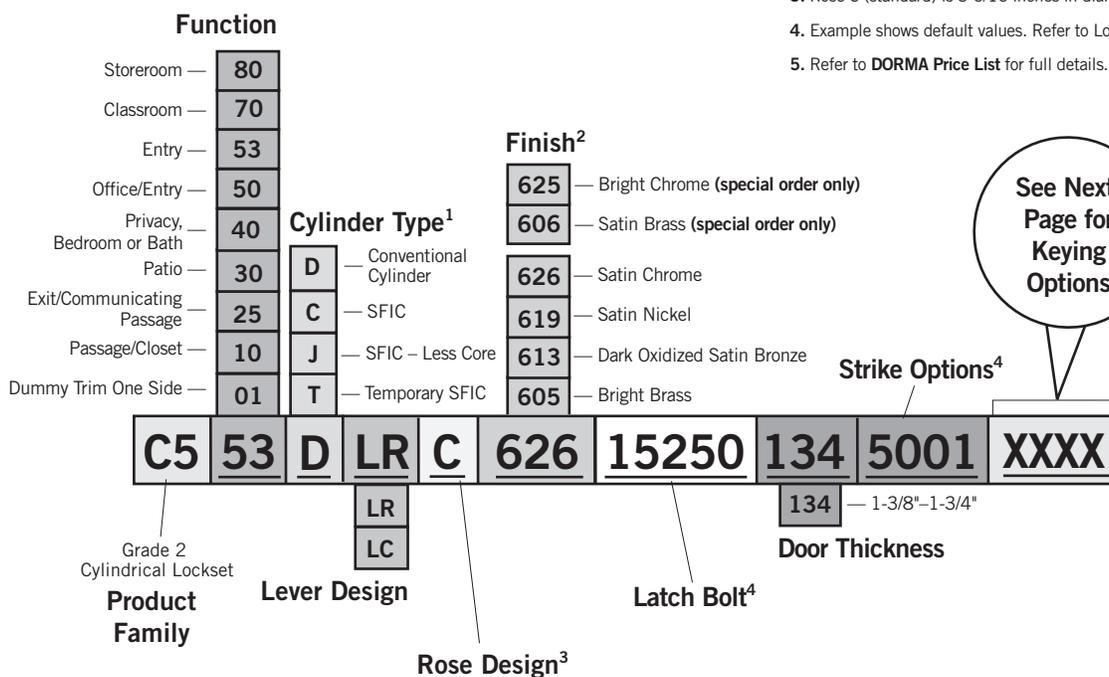

ANSI/BHMA A156.18 standards describe 613 Dark Oxidized Satin Bronze finish as a category B finish. B category finishes, "do not match from one alloy or form of material to the next and from one manufacturer to the next." The 613 finish may vary between manufacturers' products and models.

In some instances, for customer convenience, the most appropriate BHMA finish symbols are used to indicate similarity of appearance, regardless of base metal or finishing process. Finishes of latches, strikes, cylinders/cores, and visible mounting screws, though similar in appearance, may differ from the finish of the trim. Finish designations in the 600 numbers are the BHMA (Builders Hardware Manufacturers Association) industry standard.

NOTE*: Available by special order only with extended lead times.

HOW TO ORDER C500 SERIES LOCKS

1. The C500 is not available less conventional cylinder. All keyed functions are available with or without SFIC cores.
2. For split finishes, consult factory. **606 and 625 finishes are available by special order only with extended lead times. Consult factory.**
3. Rose C (standard) is 3-5/16 inches in diameter.
4. Example shows default values. Refer to Lock Options section for full details.
5. Refer to **DORMA Price List** for full details.
