Product

Product description/Product definition

As a compact and innovative sliding door operator, the ES 400 is especially suitable for application in hospitals, institutes or laboratories.

Thanks to its simple and low-maintenance design, it guarantees easy handling and reliable function as well as a long life cycle.

The ES 410 effortlessly operates single-panel doors with a weight of up to 200 kg at a passage width of up to 3 m, while the ES 420 is especially suitable for

double-panel doors with a door-panel weight of up to 2x125 kg.

Features

- Compact design
- Excellent operating dynamics
- Applicable for heavy doors in stainless steel design
- Self-learning
- Parameterisation via software
- Push & Go function
- Separate input for control via fire detection system
- Integrated airlock function for up to 3 door sets
- Automatic changeover to manual closing

For the placing on the market in the European Union/European Free Trade Association (EU/EFTA) (with the exception of Switzerland) the following legal provisions apply:

- DIN 18650:2010
- DIN EN 16005: 2012
- DIN EN 60335-1, -2-103: 2007
- DIN EN 61000-1-2:2017
- DIN EN ISO 13849-1: 2016
- DIN EN 61508-2: 2011
- 2011/65/EU ROHS3 Directive

The CE-marking takes into account the proof of conformity with the respective harmonized standards based on the legal provisions above.

Application

Following parameters are applicable for single and double leaf doors:

Door parameters

Single-panel sliding door (ES 410)	
- Clear passage width (LW)	700 – 3000 mm
- Max. weight per door panel	1 x 200 kg
- with adapter unit weight leaf	1 x 250 kg
Double-panel sliding door (ES 420)	
- Clear passage width LW	800 – 3000 mm
- Max. weight per door panel	2 x 125 kg
Double-panel sliding door (ES 415)	
- Clear passage width LW	1000 – 3000 mm
- Max. weight per door panel	2 x 130 kg

Technical Data

The technical specification of the ES 400 system is as follows:

Technical operator data

Height	132 mm
Installation depth ES 410/ES 420	65 mm
ES 415	138 mm
Max. opening and closing force 150 N	●
Opening speed (adjustable)	10 – 50 cm/s
Closing speed (adjustable)	10 – 50 cm/s
Hold-open time	
- Nurse opening of Nurse-Bed-Function (partial open)	0 – 60 s
- Bed opening of Nurse-Bed-Function	0 – 60 s
Supply voltage, frequency	230 V, 50/60 Hz
Power consumption	180 W
Class of protection	IP 20
Temperature range	+ 0 – + 40 °C
Compliant with the Low Voltage Directive	●
Manufactured to ISO 9001	●

LCA: Calculation rules

Declared Unit

The declared unit is 1 piece of the product: 16.6 kg

Declared unit

Name	Value	Unit
Declared unit	1	pce.

Product not harmonised in accordance with the CPR but in accordance with other provisions for harmonisation of the EU:

- DIN 18650:2010
- DIN EN 16005: 2012
- DIN EN 60335-1, -2-103: 2007
- DIN EN 61000-1-1:2017
- DIN EN ISO 13849-1: 2016
- DIN EN 61508-2: 2011
- 2011/65/EU ROHS3 Directive

Delivery status:

The declared ES 400 automatic drive system includes one average ES 400 (including one ES 420 drive unit kit double leaf, one ES 400 slide rail complete 3m and one ES 400 adapter unit heavy load single leaf) and packaging with a weight of 18 kg.

Components	Absolute	Percentage
Average ES 400	16,57 kg	92,06%
Average Packaging	1,43 kg	7,94%
Total	18,00 kg	100%

Base materials/Ancillary materials

The product composition of the ES 410/420 is as follows:

Name	Value	Unit
Aluminium	50	%
Electrical components	30	%
Steel	10	%
Plastic	10	%

The product contains partial articles which contain substances listed in the Candidate List of REACH Regulation 1907/2006/EC (date: 17.01.2022) exceeding 0.1 percentage by mass: no

Reference service life

The life cycle of the ES 400 drive system is about 5 years, depending on the application and frequency of use. Regular maintenance is advised to ensure the life expectancy of 5 years. For repairs or renewals, suitable spare parts are available. The drive is tested to 200,000 cycles according to EN 16005.

Mass (total system) (excl. packaging)	16.6	kg
conversion factor [Mass/Declared Unit]	16.6	-

System boundary

The type of EPD is: cradle to gate with options, modules C1–C4, and module D (A1–A3 + C + D and additional modules: A4 + A5 + B6)

Production - Module A1-A3

The product stage includes:
 — A1, raw material extraction, processing and mechanical treatments, processing of secondary material input (e.g. recycling processes),
 — A2, transport to the manufacturer,
 — A3, manufacturing and assembly including provision of all materials, products and energy, as well as waste processing up to the end-of waste state.

Construction stage - Modules A4-A5

The construction process stage includes:
 — A4, transport to the building site;
 — A5, installation into the building;
 including provision of all materials, products and energy, as well as waste processing up to the end-of waste state or disposal of final residues during the construction process stage.

Use stage - Module B6

The use stage related to the operation of the building includes:

- B6, operational energy use

End-of-life stage– Modules C1-C4 and D

The end-of-life stage includes:
 — C1, de-construction, demolition;
 — C2, transport to waste processing;
 — C3, waste processing for reuse, recovery and/or recycling;
 — C4, disposal;
 including provision and all transport, provision of all materials, products and related energy and water use. Module D (Benefits and loads beyond the system boundary) includes:
 — D, recycling potentials, expressed as net impacts and benefits.

Comparability

Basically, a comparison or an evaluation of EPD data is only possible if all the data sets to be compared were created according to *EN 15804* and the building context, respectively the product-specific characteristics of performance, are taken into account.

Background database: GaBi ts, SP40, CUP 2020.1

LCA: Scenarios and additional technical information

Characteristic product properties Information on biogenic Carbon

Information on describing the Biogenic Carbon Content at factory gate

Name	Value	Unit
Biogenic Carbon Content in product	0.07	kg C
Biogenic Carbon Content in accompanying packaging	0.52	kg C

The following technical scenario information is required for the declared modules

Transport from the gate to the site (A4)

Name	Value	Unit
Litres of fuel (per 1 kg)	0.00276	l/100km
Capacity utilisation (including empty runs)	55	%
Transport distance via medium truck	100	km

Transport distance is declared for a distance of 100km by truck in order to allow scaling to a specific point of installation.

Installation into the building (A5)

Name	Value	Unit
Waste packaging (paper and plastic)	1.41	kg

Reference service life

Name	Value	Unit
Life Span according to the manufacturer	5	a

Operational energy use (B6)

The use stage is declared for 5 years

Name	Value	Unit
Electricity consumption for 1 year	199.75	kWh
Days per year in use	365	days
On mode per day	1.8	h
Idle mode per day	22.2	h
On mode power	30.24	W
Idle mode power	22.2	W

End of life (C1-C4)

Name	Value	Unit
Recycling	15.86	kg
Energy recovery	0.56	kg
Landfilling	0.27	kg
Transport to waste management	50	km

The product is disassembled in a recycling process. Material recycling is then assumed for the metals, electronic and electromechanics. The plastic components are assumed to be incinerated with energy recovery. Minor proportions of residues arising from the recycling process are landfilled (1%).
 Region for the End of Life is: Global.

Reuse, recovery and/or recycling potentials (D), relevant scenario information

Collection rate is 100%.

LCA: Results

Disclaimer:

EP-freshwater: This indicator has been calculated as “kg P eq” as required in the characterization model (EUTREND model, Struijs et al., 2009b, as implemented in ReCiPe; <http://eplca.jrc.ec.europa.eu/LCDN/developerEF.xhtml>).

DESCRIPTION OF THE SYSTEM BOUNDARY (X = INCLUDED IN LCA; ND = MODULE OR INDICATOR NOT DECLARED; MNR = MODULE NOT RELEVANT)

Disclaimer 1 – for the indicator IRP

This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Disclaimer 2 – for the indicators ADPE, ADPF, WDP, ETP-fw, HTP-c, HTP-nc, SQP

The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experience with the indicator.
