Kaba evolo, a modern access system for the future

Wireless
Integratable
Upgradable

Designed for the future

Kaba evolo brings sustainable security to your company. The modular concept and gradual expansion option provide the basis for adaptation to your needs, even if requirements change over time.

The selection of various access control elements is unique. Wireless standalone components can be networked via radio.

From individual doors to managing all access points in your system, indoors or out, for employees, visitors or suppliers – Kaba evolo is an easy-to-program access system for extra convenience, flexibility and economic efficiency.

Holistic system: Comprehensive, scalable and flexible

Kaba evolo is a flexible holistic access solution in every respect. The system can be very easily extended at any time. The digital access components are standalone-operated (cable-free) and thus, can be built into every door quickly and easily. Existing mechanical key systems can be co-managed with ease and complemented by Kaba evolo's digital components, which for instance could be applied at the outer shell of the building. Maintenance-free mechanical master key systems and smart electronics – form a well-rounded holistic access system.

The wide range of high quality components permit access solutions for every door situation, thus affords comprehensive security for your building and premises. The step-by-step programming options ensure that you enjoy maximum flexibility whilst minimising administration time. The vast array of access media guarantees maximum convenience for your employees.

Kaba evolo not only protects your property, but also your investment.

Standalone components

Key Kaba evolo benefits

- High quality components in an award-winning design
- Modular design, can be extended at any time
- Reliable security, even if the access medium has been lost
- Long-term investment protection
- Solutions for all access situations
- Wide range of access media
- Different programming and configuration options
- Seamless integration into higher level systems
- Easy to enlarge, alter and co-manage existing mechanical master key systems

Kaba evolo key functions

- From small to large scale integration: evolo can be used in individual access points all the way up to large scale systems
- Convenient: fast and easy granting of access rights
- Unlimited: any number of users can be configured per door
- Comprehensive: create up to 512 different access groups with different authorisations
- Personalised: assign personal rights with individual access times and authorisations
- Defined: rights with pre-defined activation and expiry times, e.g. for visitors
- Audit trail: stores up to 2,000 events per door
- Flexible: integration of mechanical, standalone and wireless components all in the same system

Kaba c-lever compact – Small is beautiful

Combines innovation, high quality design and requires minimal space. The first electronic door fitting solution that replaces a mechanical lever handle but the cylinder is independent. Perfect for office and glass doors.

Unique – the variety of access components

Every access point has specific challenges. Kaba evolvo offers you a wide and dynamic range of access components, which are designed to meet all your needs.

From digital cylinders, door furniture to access readers – ready to fulfil all your requirements.

Kaba c-lever – Practical and durable

This door furniture is ideal for highly frequented access points. It can also be used on tubular frame doors and emergency exits. In emergency situations the door can be locked by any person in the room, with outside access disabled and can only be reactivated by special authorisation. Optionally available with the high-convenience Kaba TouchGo solution.

Kaba compact and remote reader - Security indoors and out

Kaba remote reader offers maximum security for outdoor access points, due to the reading unit and electronics being separate creating tamper proof protection. The compact reader are the specialist for indoor access, as all components are fitted into the housing for fast, efficient installation.

Kaba compact reader – Sleek and exclusive

The slim compact reader blends in effortlessly with the building structure. Due to the design it can be installed directly onto the door frame creating an unobtrusive access point. Suitable for indoor use and a cast version is available for outdoor access.

Kaba digital cylinder – Security with a modern design

Compact locking device with optical and acoustic access signals. Energy efficient with a fast and easy installation. They come in a wide variety of configurations to suit your requirements such as lengths, colours and profiles. Also suitable for emergency exit doors.

Security that looks good

The modern design of premises and foyers always enhances the image of your company. And how details are designed plays an important role. Kaba's evolvo series components are made of high quality materials and have been awarded prestigious design prizes. Thanks to their exclusive high gloss finish they are the perfect complement to modern architecture and an attractive corporate presentation.

The iF, which stands for the perfect combination of design and industry, shares the opinion of the eminent Red Dot Awards jury in considering Kaba evolvo components to be worthy prize winners.

Designed to match your buildings appearance: available in black and white.

Finishes to match your requirements: digital cylinders are available in a number of different colour ways and finishes.

Perfect for almost all doors: digital cylinders are available in different types that will suit virtually all requirements.

Our access media – The choice is yours

Kaba evolo stands for maximum flexibility and innovative technology. The comprehensive portfolio of access media allows you to tailor the solution to the needs of your users. Mechanical or digital components, outdoor barriers, entrance and office doors or interlocks, the Kaba access

medium can open them all. The heavy bunch of keys is a thing of the past. Innovative technologies like Kaba TouchGo ensure even more user-friendliness.

The choice is yours

ID card, chip, smart key or fob: they open all doors. The access media are based on RFID chip technology. Integrated into the Kaba evolo system they are assigned a special encryption by Kaba to ensure secure controlled

access. In the event of loss, rights are easy to revoke and new access media can be programmed just as easily.

Kaba smart key – Two in one

Be it time and attendance data collection, be it electronic or mechanical access control, the Kaba smart key is an allrounder. It opens both mechanical and electronic doors – it can do everything. Different colour versions help users to find the right key.

BEYOND SECURITY **KABA**

Programming: flexible, efficient, convenient and secure

The centrepiece of Kaba evolo

Use the Kaba evolo Manager (KEM) software to clearly and easily manage users, media and door components. Assigning access rights and programming media and door components is exceptionally intuitive thanks to straightforward menus and workflows. In addition, all access and system events can be viewed at a glance whenever you like.

Overview of the Kaba evolo manager functions::

- Configuration of user profiles and access rights
- Definition of time profiles
- Recording and monitoring of door events
- Access media management
- Administration of electronic locking components
- Administration of mechanical locking components

Programming levels

1. Manual programming

The easiest programming method using master media directly at the relevant access point.

2. Programming with a programming device

White list programming on the PC with the Kaba evolo manager (KEM) and transmission by programming device.

3. Programming with Kaba CardLink

With Kaba CardLink, rights are saved directly onto the access medium. The user collects his/her rights at the terminal at any time – the doors in question do not have to be reprogrammed.

4. Programming with Kaba Wireless

The Kaba wireless function allows rights to be transmitted conveniently from your desk to the access components.

Additional solutions for extensive demands

Aside from Kaba evolo we offer many other solutions for enhanced security and transparent processes like e.g. mechanical key systems or physical access systems.

Not to mention time and attendance data collection products. Please contact us if you are interested.

Mechanical master key systems

Holistic access management systems

Time and attendance data collection systems

Physical access systems

Holistic access solution from one single source

THINK | 360° describes our philosophy of offering you more than 'just' products for all requirements. We promise holistic solutions based on a product portfolio in which all system products are developed and manufactured in-house – thus from a single source.

However, THINK | 360° also stands for benefits that go far beyond individual products. We are the partner on whom you can rely for comprehensive know-how, long-standing experience and an international organisation. More details at: www.kaba.com/think360
