Access via smartphone

Flexible, fast, secure

Stay on the safe side with mobile access, send employees, guests or service providers access rights to their smartphones easily and flexibly. Take away the hassle of issuing and collecting access cards and fobs.

How does mobile access work?

- It turns smartphones into the access medium
- It can be combined with dormakaba online and stand-alone components
- Manage all access rights centrally within your dormakaba software
- Issue secure access rights via our trusted encrypted service
- Transfer door status and access event data to your dormakaba software

Your benefits

- User-friendly
- Intuitive software
- Access management is as easy as conventional methods
- Simplifies the process of issuing access rights
- Save time and manpower
- Easily cancel access rights if the smartphone is lost
- Additional security in case of smartphone loss (with PIN code entry)

Mobile access by dormakaba opens all doors to your employees and visitors – but only under your control.

Real life solutions

Make life easier with Mobile Access

Mobile access simplifies your access rights processes, because it is tailored to meet your daily needs. Someone is not always available to hand out access media personally. The examples below show how mobile access can simplify complicated processes in real life.

Access for your employees

Mobile access lets your employees access their workplace via their smartphone. Thanks to mobile access you can also **easily transfer access rights**

on the move. An employee is visiting from another office, or even country, for instance, is sent all the access rights to their smartphone whilst still in transit.

After business hours

Thanks to mobile access accessibility after business hours is possible. To easily allow for deliveries, cleaning firms or meetings on your premises

assign access rights easily in advance. The access rights are then transferred to the smartphone, turning it into the access medium.

Assigning rights at short notice

If employees fall ill unexpectedly and access rights need to be changed, you can react quickly in these cases thanks to mobile access. **Transfer all the necessary access rights at short notice in**

real time. They can be sent instantly to the smartphone of the relevant person and adapted to suit at a moment's notice.

Night-time maintenance

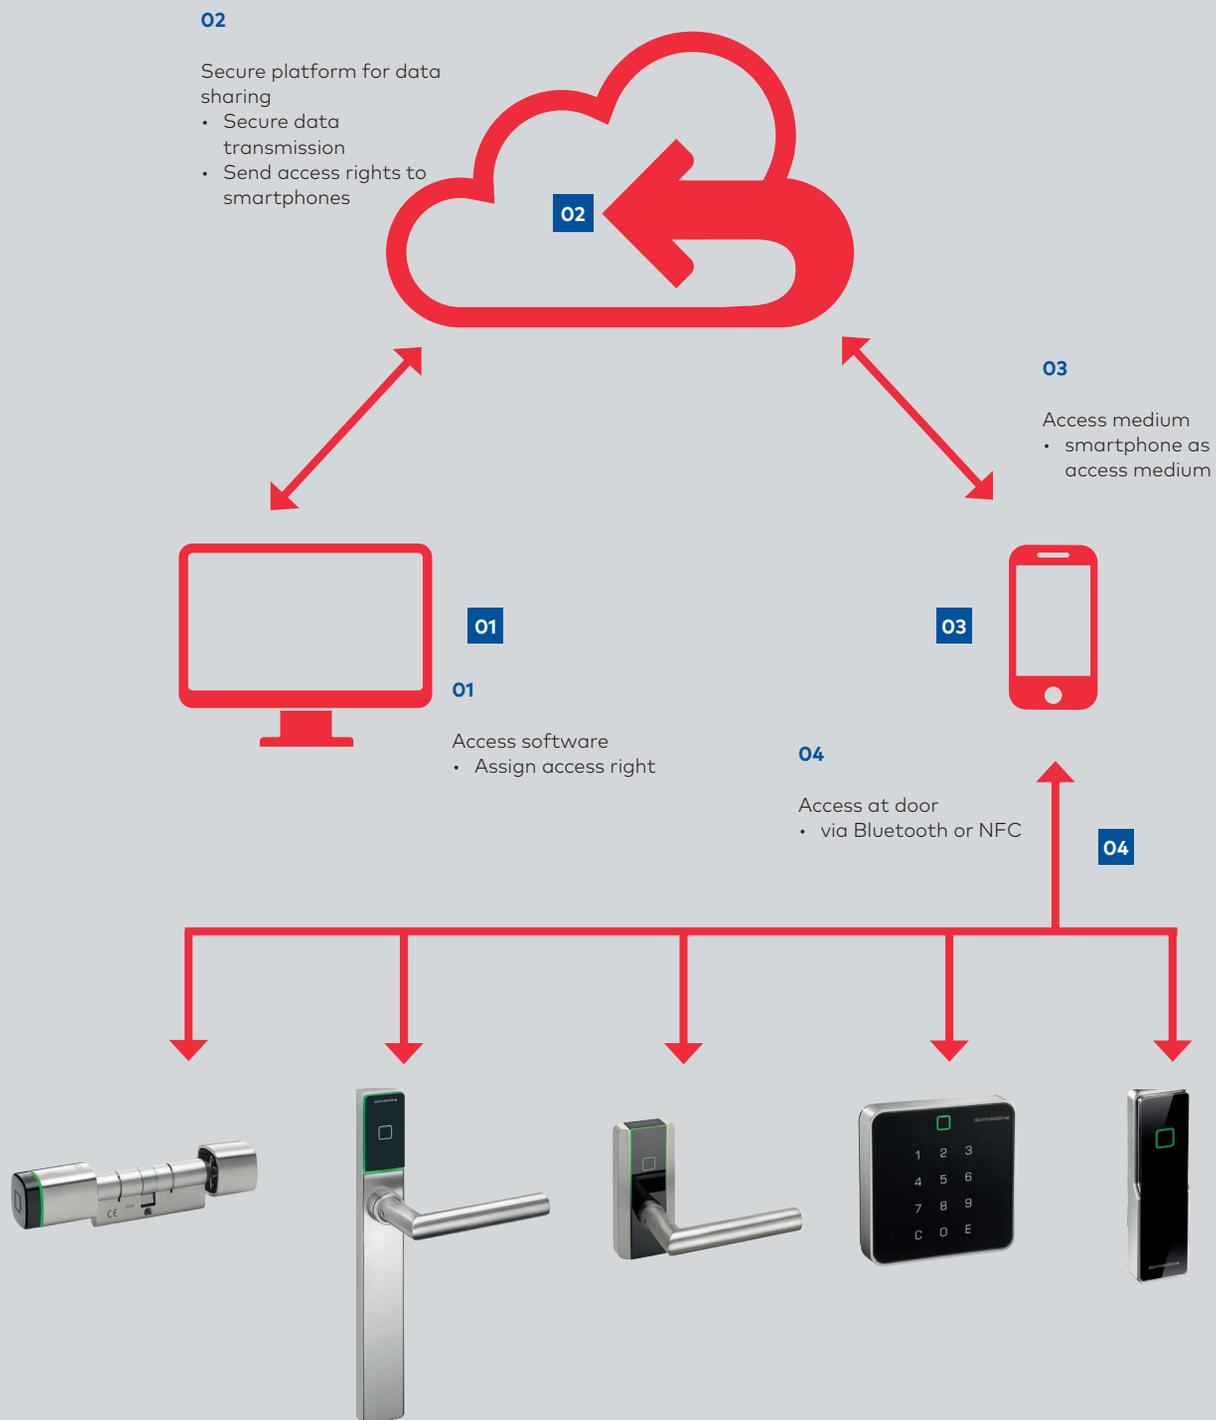

If night-time maintenance is pending for your server room, you can **assign access rights for the exact time period in advance.** Mobile access lets you fix exactly

when and for how long a firm has access to your premises. Furthermore, you can very easily change, lengthen or shorten the time period.

Access rights for smartphone

the smart add-on

Our products

Electronic Access & Data

Electronic access control and workforce management for efficient access management, security and data collection

Lodging Systems

Hotel locks and locking systems as well as access management solutions for holiday homes
