The dormakaba range of fittings for toughened glass assemblies

The dormakaba range of fittings for toughened glass assemblies has matured into one of the most comprehensive available today. It offers ideal options for creating all standard toughened glass assemblies in a manner which is technically sound and visually attractive. This gives the designer a wide variety of options for individual expression in creating with toughened glass – either internally or externally.

All dormakaba fittings are based on a modular system, consisting of a base unit, functional inserts and clip-on covers in the widest possible range of finishes. The glass preparations that are needed can be performed quickly and easily. Quality materials and thorough workmanship guarantee a long service life and a reflection of excellence for years to come.

Door rails and locks ideally complement the dormakaba product range for toughened glass assemblies. The door rails grant all requests for wide and heavy doors, also for side panels. They guarantee the maximum protection for the lower glass edge.

With its different types and finishes the lock programme SG meets various requirements for function, safety and appearance.

- 1) For door heights up to 2,500 mm
For doors with a height of more than 2,500 mm we have to keep additional conditions/limits:
 - Glass thickness >= 10 mm
 - Usage of a handle bar with 3 connection points in minimum and a minimum height of 1/2 door height
- 2) Use of door closers:
Doors < / = 1,100 mm must be provided with door closers of type EN 3 (with or without back-check), and doors > / = 1,100 mm need to be fitted with larger door closers (e.g. EN 4, 5 or 6) with or without backcheck.
- 3) Laminated safety glass of 2 x toughened safety glass
- 4) Max. panel weight depends on product combination
- 5) Further possible glass panel heights on request at our application engineering
- 6) Under certain circumstances also 15 + 19 mm glass thicknesses

The glass dimension may differ due to items as follows:

- installation type,
- glass tolerance,
- generally use

- Optional
- Standard

*Only for double-action doors with door rail top and bottom, incl. steel door lever

Note: The use of clamp fittings on structured glass surfaces (except of which are satinized glasses) or glasses with large variations in glass thickness is only with the application of a levelling layer permissible.

MUNDUS

MUNDUS – The freedom of versatility

Compelling benefits:

- Clear design lines, no visible fixings
- Wide range of surface finishes, colours and materials
- Particularly easy to install: Many MUNDUS fittings can be mounted on the glass and fixed into place in their as-delivered condition
- Fast installation, simple in-situ adjustment of the installed system
- set up for the right glass thickness: adaptable to different glass thicknesses without the need to change gaskets
- Improved load-bearing performance and more secure hold thanks to high-strength materials (screws and threaded sleeves of high-grade stainless steel capable of absorbing high clamping forces)
- Use of laminated safety glass (LSG) using dormakaba's proven Clamp&Glue technology for high quality and safety demands (MUNDUS Premium)

Elegant appearance

MUNDUS fittings impress through their elegant design combining sharply defined, straight edges and rounded corners, high-quality materials and careful workmanship. There are no fixings to disrupt the smooth harmony of the surface finish. For a durable, elegant appearance, the cap consists of 2 mm thick and therefore particularly robust material – stainless steel or aluminum.

MUNDUS offers patch fittings for 24 standard systems and numerous special solutions

– whether for an open-plan residential ambience, attractive office or prestigious shop entrance. Visually and technically impressive, MUNDUS glass fittings are suitable for a wide range of different requirements. The extensive portfolio encompasses connection fittings for the usual 24 standard systems such as PT 10, PT 40 or PT 70. It also accommodates special solutions for custom spatial requirements, such as PT 41 and PT 61 for glass assemblies stiffened with 90° glass fins.

Quick and easy to install

MUNDUS fittings offer multi-dimensional in-situ adjustability, ensuring a firm fit every time. They facilitate infinite variability of the vertical gap dimensions and thus consistently correct setting of the pivot axis and zero position.

Wide choice of finishes

Standard collection
dormakaba standard finishes, anodized or coated, satin or polished stainless steel.

Exclusive collection
Treated metals such as anodized aluminum.

MUNDUS – the technical specifications at a glance

MUNDUS	MUNDUS Premium	MUNDUS Comfort
Max. load-bearing capacity	200 kg	150 kg
Max. panel width	1,300 mm	1,100 mm
	The max. panel width depends on glass thickness and weight. For more information please see on the following page MUNDUS - Matrix for door dimensions.

- Suitable for use without any technical limitations.
- Pull handle necessary extending over 1/2 of the door height with at least 3 fixing points.
- Glass and fitting must be adhesive-bonded.
- Use of MUNDUS fittings is not recommended. Please contact your dormakaba partner in order to discuss possible alternatives.
- This door dimension is unfortunately not possible with MUNDUS.

Extensive suitability, effortless installation

MUNDUS Premium – Providing a totally reliable hold – Clamp&Glue technology

Providing a totally reliable hold – Clamp&Glue technology

Proven dormakaba technology for the installation of laminated safety glass. An additional adhesive bond ensures a firm hold and permanent cohesion between fitting and glass.

The bonding process following the fixing of the fitting is remarkably easy:

- Before commencing with the gluing operation, you will need to replace the standard gaskets with special gaskets suitable for laminated safety glass*
- The glue is fed through the holes provided until it emerges from the overflow openings in the clamp fittings
- The process is then repeated on the rear face
- Allow the glue to harden.

*The LSG gaskets may only be used when fixing glass using the Clamp&Glue technology

MUNDUS and laminated safety glass (LSG) – a combination that offers impressive advantages:

- High safety for users, even in the case of large glass assemblies
- Improved acoustic insulation and reduced noise levels achievable by integrating a sound deadening film
- Deploying glass doors as a design element – specially designed films for individual aesthetics
- Use of LSG comprising 2 x TSG (= 2 panes each with a minimum glass thickness of 5 mm).

Type illustration

Toughened glass assemblies with fittings (55/65/70 mm pivot point) and locks.

BTS = Floor spring
 GK = Strike box
 PT = Patch
 RTS = Transom closer
 US = Lock

Maximum door weight and width for MUNDUS fittings

Max. door weight:
 MUNDUS Premium: 200 kg
 MUNDUS Comfort: 150 kg

Max. door width:
 MUNDUS Premium: 1,300 mm
 MUNDUS Comfort: 1,100 mm

For doors with a height of more than 2,500 mm we should keep additional conditions/limits:

- Glass thickness ≥ 10 mm
- Usage of a handle bar with 3 connection points in minimum and a minimum height of 1/2 door height

The max. panel width depends on glass thickness and weight. For more information please see on page 10, MUNDUS - Matrix for door dimensions.

Use of door closers:

Doors $\leq 1,100$ mm must be provided with door closers of type EN 3 (with or without backcheck), and doors $> 1,100$ mm need to be fitted with larger door closers (e.g. EN 4, 5 or 6) with or without backcheck.

Glass panels

The individual glass panels may show production tolerances in geometry and dimensions that sum up to larger deviations in larger glass assemblies. These deviations are not shown in the exemplary constructional set up above.

Note for stiffening elements:

"Left" or "Right" is always determined from the outside and as viewed from above.

Easy to install, easy to adjust

Fast and uncomplicated fixing

MUNDUS patch fittings always fit snugly on the glass thanks to their multi-dimensional variability. They facilitate infinite adjustment of the vertical gap dimensions and location accuracy in terms of both pivot point and zero position.

Optimum gap dimensions

Thanks to the infinitely variable, multi-dimensional adjustability of the patch fittings, the door can be optimally aligned following installation.

Multi-dimensional adjustability even when mounted

Alignment in the X axis

Individual adjustment of the pivot point, infinitely variable between 52 and 73 mm.

Alignment in the Z axis

Infinite variability of the door position to achieve flush alignment thanks to adjustment of up to 1 mm for a glass thickness of 8 mm, or 3 mm for a glass thickness of 12 mm.

Zero position adjustment

Infinite alignment variability of the door to achieve the correct zero position by adjustment around the axis of rotation in the range +/- 1.5°.

Easy to install, safe and secure

With MUNDUS, you do not require new or additional gaskets in order to adjust the fittings to the glass thickness. With MUNDUS, the glass thickness is defined by two screws in the base unit of the patch fitting, allowing the use of glazing ranging from 8 to 22 mm.

Suitable for different glass thicknesses

MUNDUS Premium:
Accommodating glass thicknesses of 8–12 mm, 12–15 mm, 15–19 mm and 19–22 mm with infinite adjustability in a single fitting. The gaskets that you had to separately order for toughened safety glass are now a thing of the past. You always have the right fitting to hand. That means: fast installation, more time, more design content.

Glass thickness:	8–12 mm
	12–15 mm
	15–19 mm
	19–22 mm
Max. Door weights:	200 kg

MUNDUS Comfort:	
Glass thickness:	8–12 mm
Max. Door weights:	150 kg

Protection from unauthorised access

The positioning of the clamping screws also provides for additional protection against unauthorised access to your interiors. The screws are distributed on both sides of the base unit so that disassembly from one side is not possible.

Patch fittings

Shown with 10 mm glass. When used with other glass thicknesses, the measurements change accordingly.

	Product description	Glass thickness	Art. No.

UNIVERSAL

UNIVERSAL ... as the name says

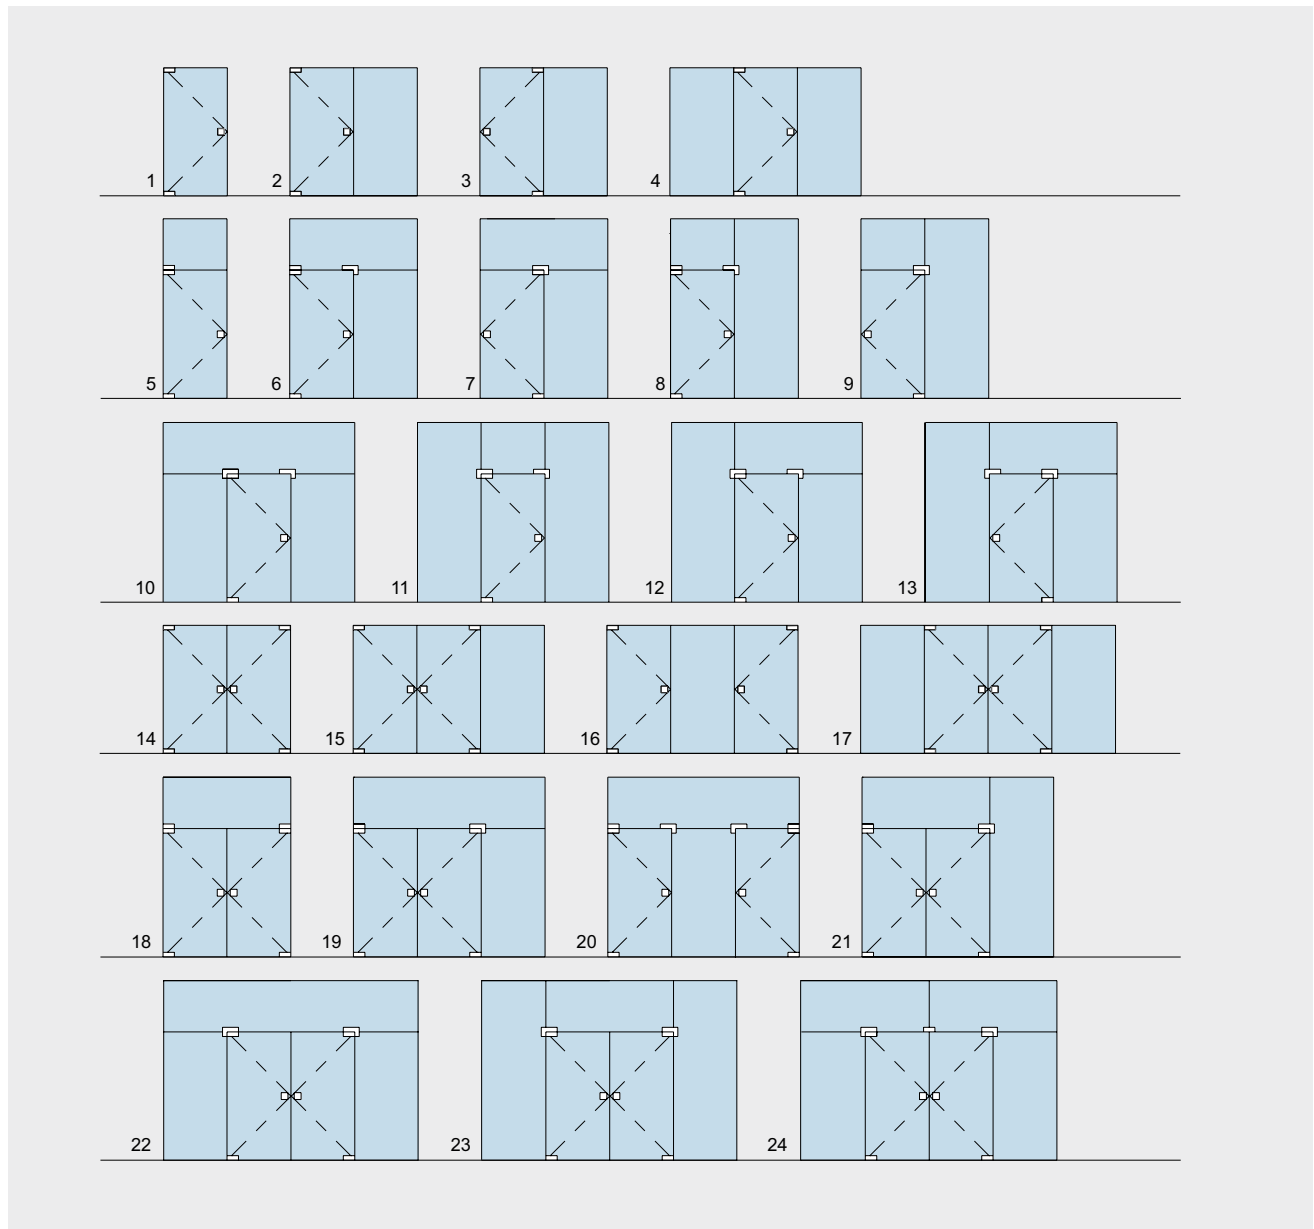

With its broad spectrum of basic types and variants, the UNIVERSAL range of patch fittings enables the realisation in toughened glass of almost any conceivable design. Toughened glass assemblies can be provided with fixed parts in widely differing arrangements – with corner fittings or fin fittings at different angles, and with double or single-action doors in single-leaf or double-leaf designs.

Easy glass preparation, secure fixing

dormakaba has an intimate knowledge of the special properties of glass as a building material. This has led to the design of fittings requiring only minimal glass preparation – a quick and easy cut-out with additional holes. Carefully considered and positive measures have been taken to create the maximum clamping surface with optimum clamping efficiency.

Suitable for common glass thicknesses

UNIVERSAL fittings are supplied as standard with gasket to suit 10 mm glass (TSG). For 8 mm and 12 mm glass, correspondingly thicker and thinner gasket is available. Some patches are even designed to fit directly with different glass thicknesses.

Variable pivot point

The inserts for corner and overpanel patches in the UNIVERSAL program have been designed and manufactured to give two options in the pivot point distance from the sidepanel or frame. It can be either 55 mm or 65 mm. At 65 mm pivot point and the use of a special round profile (page 124) doors can be built with a constant air gap of only 4 mm.

For information regarding patch fittings UNIVERSAL with 15 mm pivot point for pinch free doors see page 62 and following pages.

Reliability built in

Quality materials and thorough workmanship mean that UNIVERSAL fittings have the features necessary to meet the most demanding of specifications. The fittings are designed to cope with large and heavy doors up to a maximum weight of 110 kgs: for instance, a door blade 3,000 mm high by 1,100 mm wide, using 12 mm glass is quite possible.

Please contact our Application Engineering department for more information. For heavier and wider doors up to a maximum of 150 kg and max. 1,400 mm and for high frequented doors, rails with reinforced straps are available.

Matching range of locks

The UNIVERSAL range includes every type of accessory, and of course, a variety of locks and strike boxes in a matching design concept, giving the designer plenty of choice from the options available.

Short delivery times

All the common patterns and types are available ex-stock (factory). Specials will be prepared promptly.

Type section

Toughened glass assemblies with fittings (55/65 mm pivot point) and locks.
All standard assembly types see page 42.

- | | | | | | |
|-----|----------------|-----|-----------------------------|----|--------|
| BTS | = Floor spring | PT | = Centre hung door fittings | US | = Lock |
| GK | = Strike box | RTS | = Transom closer | | |

Maximum door weight and width for UNIVERSAL fittings

max. door weight: 110 kg*
 max. door width: 1,100 mm**

For doors with higher frequency and in public areas we would advice to use a door rail for doors above 110 kg and door width larger than 1,100 mm.
 For door weights up to 150 kg and widths up to 1,400 mm door rails should be used.

* For door heights up to 2,500 mm

- For doors with a height of more than 2,500 mm we have to keep additional conditions/limits:
- Glass thickness >/= 10 mm
 - + Usage of a handle bar with 3 connection points in minimum and a minimum height of 1/2 door height

** Use of door closers:

Doors < / = 1,100 mm must be provided with door closers of type EN 3 (with or without backcheck), and doors > / = 1,100 mm need to be fitted with larger door closers (e.g. EN 4, 5 or 6) without backcheck.

Torque for fixing screws

Screws M 6: 10 Nm (4 mm)*

Screws M 6: 15 Nm (5 mm)*

Screws M 8: 20 Nm (5 mm)*

*Allan key size

Please note: If angle fittings or fin fittings are used:

"Left" or "Right" have to be determined in any case by view from outside and above.

UNIVERSAL Motion – the self-closing patch fitting

A patch fitting with hydraulic self-closing function is not just convenient but also efficient: The hydraulic technology proves its advantage without requiring a power supply and any visible mechanism. UNIVERSAL Motion is like a reliable employee with intrinsic values: the space-saving technology is integrated in the compact bottom patch fitting and does not require any additional installation space.

Eight reasons for the one.

- **Completely smart.** In UNIVERSAL Motion, the door closing function is integrated in a compact, well-shaped unit. A subtly functional design.
- **Almost invisible.** What looks like a patch fitting manages the closing of doors by itself. An additional floor spring is not required.
- **Clear savings.** Less effort and cost-efficient. You need only two fittings for the self-closing swing door: UNIVERSAL Motion and PT 20.
- **Comfortable function.** The door closes softly by itself. The hydraulic door movement is achieved simply in the fitting – without extra installation, without power supply.
- **Simple installation.** UNIVERSAL Motion consists of very few parts. The glass door is clamped in the fitting. No prior changes to the floor are required.
- **For the existing building.** Retrofitting is clearly simpler than before. The floor need not be sawn nor milled beforehand.
- **Simple positioning.** The material and composition of the floor are not critical factors. You need to place only four vertical bores for the bottom pivot bearing.
- **Different surface finishes.** The dormakaba colour palette creates systematic diversity. The colour spectrum corresponds to the standard UNIVERSAL fittings. A custom-made colour scheme as per RAL is also possible. Simply matches the contemporary interior.

* Door widths smaller than 650 mm can be realized from a product technical point of view. However, this is not recommended, as the opening forces to be applied then lie outside the DIN 12217 standard.

Technical features:

Glass thickness: 10 + 12 mm ESG
 Door width: von 650 mm bis 1000 mm*
 Door height: max. 3000 mm
 Door weight: max. 100 kg
Pivot point: 67 mm

The screw depth in the bottom of the supplied screws for the floor pivot bearing is 65 mm.

Available in the surface variants stainless steel and aluminium, as well as the product variants with 90 degree hold-open (Tolerance window: +/- 3 degrees) and without hold-open.

UNIVERSAL Motion is intended for indoor use. The fitting is not suitable for outdoor applications and for doors in high-frequency areas / public buildings.

UNIVERSAL Motion is tested by dormakaba according to DIN EN 1191:2013 for 300,000 test cycles.

Technical notes:

The 90-degree detection has a tolerance range of +/- 3 degrees due to the manufacturing process.

Due to insufficient pressure equalisation within the rooms, the door can lose its zero position when closed, caused by pressure or suction loads. This is due to the environment or external influences and does not represent a product defect. All spring-supported and hydraulic closing devices are affected. The problem can only be mitigated or avoided by creating significantly larger and stronger floor springs (e.g. BTS 80) can be used (depending on the wind loads).

TH = Door height
 TB = Door width
 LH = Clear height

LB = Clear width
 WA-P = Length WA-P
 HS = Height side panel

BS = Width side panel
 HO = Height overpanel
 BO = Width overpanel

Hint:

To extend the tolerance range, it is possible to increase the glass bore for the PT20 from $\varnothing 20$ to $\varnothing 22$.

RP

Marvellously concealed transom door closer

The RP pivot door system works with a tubular transom profile in which the RTS transom closer is integrated and concealed. The system is fixed on the ceiling using brackets which are concealed after system installation. A top patch fitting (UNIVERSAL PT 22) attaches the all-glass door to the closer. A bottom patch fitting (UNIVERSAL PT 10) connects the door to the floor pivot, which measures only a few centimetres. So glass thicknesses of 8 – 12 mm are feasible.

The UNIVERSAL patch fittings can be replaced by door rails top and bottom or MUNDUS patch fittings as a special option. When using MUNDUS Premium patch fittings, you also have the option of installing laminated safety glass (LSG).

The RTS transom closer not only returns the door to the zero position each time it is opened, it also has a special dampening system to protect the door against unwanted impact caused by over-aggressive opening. In addition, the integral hold-open, which also comes as standard, enables the door to be held open at an angle of 90°.

Transom tube configuration:

- 01**
Transom tube for fixing on ceiling, as lintel or similar, max. length 6,000 mm
- 02**
Cover profile for door, clip-on, max. length 6,000 mm
- 03**
Cover profile for fixed sidelights, clip-on type with glass groove
- 04**
Cover profile for fixed sidelights, clip-on, with glazing groove
- 05 / 06**
Contact profile / glass wedge profile, depending on combination for 8, 10 or 12 mm glass thicknesses of the sidelight
- 07**
Fixing bracket for securing transom tube and closer

Type selection

Options

- 1 Single leaf double-action door with transom tube
- 2 Pair of double-action doors with transom tube
- 3 Double-action door with through-running transom tube and fixed sidelight

Further versions up to 6000 mm are possible.

Materials and finishes

- Aluminum, silver EV1 anodized (similar Eloxal I EV1 / Eloxal II C 0) (101)
- Aluminum, similar satin stainless steel anodized (for profile material) (similar Eloxal II C 31) (113)
- Aluminum, traffic white powder coated (300)
- Aluminum special color anodized (199)
- Aluminum, special color powder coated (399)

Door panel dimensions

- Glass thicknesses: 8 / 10 / 12 mm
- Door height H1: H - 56 mm
- For max. door panel weights and widths please see the table below.

Sidelight dimensions

- Glass thickness: 8 / 10 / 12 mm with two-part sealing profile
- Sidelight height: H - 28 mm + floor pocket, where required

Also with door rails available

max. height	max. width	max. door weight (incl. fittings)	RTS version	
2,500	800-1,100	80 kg	RTS EN 3	
3,500	max. 1,250	110 kg	RTS EN 4	

with door rails top and bottom see detail sheets 04-030 and 04-060

If you have any questions regarding special designs with door rails or MUNDUS patch fittings, our Application Engineering department will be glad to advise you.

BEYOND

Systematic design

Safe, functional and extremely attractive, BEYOND, the unique system for glass doors without risk of pinched fingers with swing doors.

The development of BEYOND has been shaped by the search for a solution that combines a modern, attractive design with maximum safety and stability. In the swing-door system the pivot point is located directly at the glass edge, thus preventing the risk of trapped fingers often found at the secondary closing edges of glass swing.

BEYOND opens up a huge range of opportunities for incorporating frameless glass doors into toughened glass assemblies and wall openings. The BEYOND system offers an elegant, sophisticated solution for swing doors in all situations, whether private or public, modern or traditional.

Developed with the practical requirements of the market in mind, this product offers a sensible alternative wherever security, safety and functionality need to be complemented with an attractive design.

Safe and secure

The patented BEYOND swing door system with its pivot point located centrally in the glass axis and close to the glass edge ensures safety and security. The alternative options of elegant, continuous pivot rod or smart short rod make the system suitable for any room situation. And with a choice of pull handles or lock/lever handle combinations, BEYOND enables the realisation of your design ideas.

The over panel pivot fitting
– a slim connector.

An option for the bottom pivot point – short rod on a floor pivot.

If floor pivot bearings are being used, a separate lock or a tumbler is required.

Short pivot rod

The BEYOND swing door system with short pivot rod offers maximum flexibility. No matter what the door dimensions, BEYOND short fittings provide a versatile solution.

dormakaba floor pivots, or – particularly for double-action doors – dormakaba BTS floor springs, form the ideal base for ensuring that the door always returns safely and securely to its home position. Since with the BTS floor spring the position of the pivot point requires it to be buried under the adjacent wall, the use of a glass side panel is recommended in this case. The top connection depends on the type of unit. When incorporating the glass door into a toughened glass assembly, the top connection is formed by an over panel fitting; in the case of doors in wall openings, a top pivot bearing is fitted to the ceiling or in the lintel.

Load transfer from the overpanel and side panel can be effected by means of wall adapter profiles.

Depending on customer requirements, BEYOND offers suitable fittings for 10 mm and 12 mm glass. Finishes for fittings and accessories: aluminum EV1-Deco anodized (114) or similar satin stainless steel anodized (107).

For maximum values please see the typical assemblies.

Note:

Overpanel fitting wall connector
max. 1,200 mm door width;
overpanel fitting glass connector
max. 1,000 mm door width.

Basic set for individual door.
For installation in masonry.
Optionally with side panel on closing side.

Max door height 3,000 mm
Max door weight 80 kg

Basic set and over panel fitting wall connector for door with over panel.
Optionally with side panel on closing side.

Max door height 3,000 mm
Max door weight 80 kg

Basic set and over panel fitting wall connector for door with over panel and side panel on pivot point side.
Optionally with side panel on closing side.

Max door height 2,200 mm
Max door weight 80 kg

Combination BEYOND and BTS

(door closer available from Door Control Division)
With the BTS floor spring, the position of the pivot point means that the unit has to be buried under the adjacent wall, or that the glass side screen has to be appropriately machined (see adjacent detail). The height of the recess cut into the glass will need to be adapted to the installation situation and the means by which the side screen is fixed.

Continuous pivot rod

The BEYOND swing door system with continuous rod offers complete freedom from the risk of trapped fingers. By locating the pivot point of the swing door right at the glass edge and providing a round profile, the nip hazard is reduced to zero.

For the floor mounting of single-action, and particularly double-action doors, the dormakaba BTS floor spring offers a convenient alternative to the dormakaba floor pivot. Since with the BTS floor spring the position of the pivot point requires it to be buried under the adjacent wall, the use of a glass side panel is recommended in this case. As with the short-rod model, the top connection depends on the type of unit. Toughened glass assemblies are fitted with an over panel pivot fitting, whereas with doors in wall openings a top pivot bearing with ceiling fixing is used. Load transfer from the over panel and side panel can be effected by means of wall adapter profiles.

In the case of heights over 2,200 mm, an anti-vibration device located midway along the pivot rod ensures quiet door operation.

Depending on customer requirements, BEYOND offers suitable fittings for 10 mm and 12 mm glass.

Finishes for fittings and accessories: aluminum EV1-Deco anodized (compatible with finish 150) (114) or similar satin stainless steel anodized (107).

For maximum values please see the typical assemblies.

Note:

Overpanel fitting wall connector max. 1,200 mm door width;
 overpanel fitting glass connector max. 1,000 mm door width.

Basic fitting for individual door.
 For installation in masonry.

Max door height 3,000 mm
 Max. door weight 80 kg

Basic fitting and over panel fitting wall connector for door with over panel.
 Optionally with side panel on closing side.

Max door height 3,000 mm
 Max. door weight 80 kg

Basic fitting and over panel fitting wall connector for door with over panel and side panel on pivot point side.
 Optionally with side panel on closing side.

Max door height 2,200 mm
 Max. door weight 80 kg

Combination BEYOND and BTS

(door closer available from Door Control Division)
 With the BTS floor spring, the position of the pivot point means that the unit has to be buried under the adjacent wall, or that the glass side screen has to be appropriately machined (see adjacent detail). The height of the recess cut into the glass will need to be adapted to the installation situation and the means by which the side screen is fixed.

EA

The expansive range with slimline bodies for offset hung doors

EA patch fittings are characterized by their slim, neat shape and skilful hinge design. This comprehensive range of fittings allows the transparent elegance of single-action doors to reach their full potential – whether hung in frames or integrated in toughened glass assemblies.

Easy glass preparation secure fixing

dormakaba has an intimate knowledge of the special properties of glass as a building material. This has led to the design of fittings requiring only minimal glass preparation – a quick and easy cut out with additional holes. Carefully considered and positive measures have been taken to create the maximum clamping surface with optimum clamping efficiency.

Suitable for 10, 12 and 8 mm glass thicknesses

dormakaba EA patch fittings are available for 10 and 12 mm glass thicknesses. With additional gaskets these fittings can also be used for 8 mm glass.

Reliability built in

Quality materials and thorough workmanship mean that EA patch fittings have the features necessary to meet the most demanding of specifications.

Matching range of locks

The EA range includes a variety of locks and strike boxes in a matching design concept, giving the designer plenty of choice from the options available.

Virtually unlimited choice of colours and finishes

EA corner patches are available in the following finishes

- Aluminum, silver EV1 anodized (similar Eloxal I EV1 / Eloxal II C 0) (101)
- Aluminum, similar satin stainless steel anodized (107)
- Aluminum special color anodized (199)
- Aluminum, special color powder coated (399)

Short delivery times

All standard articles as per price list are available ex-stock (factory). Specials will be prepared promptly.

Offset hung doors in rebated frames and toughened glass assemblies

Offset hung doors in rebated frames

max. door weight: 90 kg
max. door width: 1,000 mm,
using a bottom door rail: 1,100 mm

EA patch fittings for offset hung doors in rebated frames are supplied as standard prepared for 24 mm rebate depth. They can be prepared to suit rebate depths from 15 – 23 mm, and from 25 – 40 mm. Please specify rebate depth with order.

max. door weight for 25–40 mm rebate depth: 80 kg
max. door width for 25–40 mm rebate depth: 900 mm
For doors with max. weight of 80 kg and max. width of 1,000 mm use door rails.

The top centre frame portions are prepared to suit wood and steel frames. For aluminum frames, please enquire, giving details of aluminum system.

FT = rebate depth

Offset hung doors in toughened glass assemblies

max. door weight: 100 kg
max. door width: 1,100 mm

For door weights up to 100 kg and widths up to 1,200 mm, door rails should be used.

EA patch fittings for offset hung doors in toughened glass assemblies have a 36 mm offset (= 43 mm from pivot point to glass surface).

Gap required between leaves on pairs of doors

Individual leaf width in mm	X = gap required in mm
400–600	8
600–1,000	6

Torque for fixing screws

Screws M 8: 12 Nm

Patch fittings for offset hung doors in rebated frames with 24 mm rebate depth

For 10 mm glass thickness (42 mm offset = 49 mm from pivot point to glass surface), complete.
 For 12 mm glass thickness (40 mm offset = 47 mm from pivot point to glass surface), complete.
 Accessories see page 188.

	Product description	Glass thickness	Art. No.

TP/TA

TP/TA – door rails which leave nothing to be desired

TP / TA door and side panel rail coordinate in design, dimensions and finishes with all dormakaba patch fittings. This creates the opportunity to specify fittings for the assembly which provide maximum protection and effective sealing of the lower glass edges. The provision of door rails allows the installation of extremely heavy-duty and wide doors.

Tamper resistant, with integral locks

The robust base rails are screwed together from alternate sides of the door at 150 mm centres. This makes unauthorised removal of the rail virtually impossible. All door rails are available with integral locks, prepared for profile cylinders and with security rosettes, or prepared for certain lever locks.

Special security- and quality characteristics

The particular feature of the locks with bottom or top locking bolt is a special corrosion and abrasion resistant bolt with integrated safety roll pin (hardened). By this the locks comply to DIN 18251, class 3 (according to type testing*) and the highest corrosion resistance according to EN 1670, class 4 is achieved. Furthermore the lock was tested successfully by a neutral testing institute with 500,000 latch and 100,000 locking bolt operating cycles.

Easy door adjustment – especially whilst hanging

Because TP / TA rails are a screw/clamp system, they have a great advantage over other systems. The rail can be adjusted up and down, and also side to side, to compensate for irregularities in the door opening. Also, the clip-on rail cover has advantages. Because the door can be hung and secured without it, the covers need not be fixed until the wet trades have finished and the cleaners have been through.

No glass preparation, firm fixing

dormakaba has an intimate knowledge of the special properties of glass as a building material. This has led to the design of rails requiring no glass preparation – no holes, no cut-outs. Carefully considered and positive measures have been taken to create the maximum clamping surface with optimum clamping efficiency.

Two heights, length to order, to suit 10 mm or 8 mm and 12 mm

glass thickness – further glass thicknesses and versions for bullet-proof glass on request
All TP / TA door rails are available in 100 mm (4") or 76.5 mm (3") heights, and in lengths to your order. They are supplied as standard for 10 mm glass thickness; but with replacement gasket they will suit 12 mm or 8 mm glass thicknesses. On request the door rails of 100 mm height can also be realised for 13.5/15/17/19 and 21 mm glass thicknesses (for toughened, laminated glass) and versions for bullet-proof glass 13.5 – 30 mm glass thicknesses.

Variable pivot point and absolute pinch free on door rails for centre hung doors TP

All the inserts for door rails in the TP / TA range have been designed and manufactured to give two options in the pivot point distance from the sidepanel or frame. It can be either 55 mm or 65 mm (distance from pivot point to door edge – 53 mm and 63 mm respectively). In order to change from the standard dimension of 65 mm to 55 mm, the standard insert is unscrewed from the patch, rotated through 180°, and refixed in position. At 65 mm pivot point and the use of a special round profile (page 124) doors can be built pinch free (constant air gap of 4 mm).

Reliability built in

Quality materials and thorough workmanship mean that TP / TA rails have the features necessary to meet the most demanding of specifications.

Short delivery times

All standard articles as per price list are available ex-stock (factory). Specials will be prepared promptly.

Finishes

Special coatings are required at extreme environment conditions (i.e. coastal areas).

*Extract from DIN 18251, class 3: type-test with 50,000 locking bolt operating cycles.

Technical specifications

Glass size – height:

Rail height – 100 mm		Rail height – 76.5 mm	
Use of rail(s)	total door height less	Use of rail(s)	total door height less
bottom	75.0 mm	bottom	56.5 mm
top	75.0 mm	top	56.5 mm
bottom + top	150.0 mm	bottom + top	113.0 mm

Please treat floor and ceiling clearances separately

Gap required between pairs of doors:

Offset hung doors:

Individual leaf width	X
over 1,000 mm	4 mm
1,000–600 mm	6 mm
600–400 mm	8 mm

Centre hung doors:

X = 4 mm

RTS = transom closer

MANET
Compact

MANET Compact sets

The aesthetic elegance of the MANET Compact concept is also available in the form of standardized sets for simple, fast planning of the more popular system types.

Optional accessories enable the individual sets to be semi-customized. The system components offer numerous adjustment possibilities in order to ensure problem-free installation of whichever door type – swing or single-action or double-action – is required. Wall abutment profiles may need to be provided (by others) for fixing overpanels and sidelights.

Pivoting fitting short type,
 max. door panel height 2,500 mm
 max. door panel width 1,200 mm
 max. door panel weight 80 kg

Pivoting fitting short type with intermediate tube,
 max. door panel height 2,500 mm
 max. door panel width 1,200 mm
 max. door panel weight 80 kg

Countersunk bore for countersunk single-point fixings

Cylindrical bore for clamping disc single-point fixings

Set 1

Pivoting door MANET Compact without overpanel for 10 – 12 mm glass

Door weight 80 kg
 Door height max. 2,500 mm
 Door width max. 1,200 mm
 TSG 10/12 mm glass thickness

Product description	Art. No.
Set 1 with pivot rod pair short type	
Set 1 with single-point fixings countersunk consisting of: pivot rod pair top/bottom, short type	29.910
including: 4 single-point fixings for pivot rods 1 pivot fitting top, 1 PT 25 pin, 15 mm Ø, with plug 1 pivot fitting bottom for BTS/floor pivot	

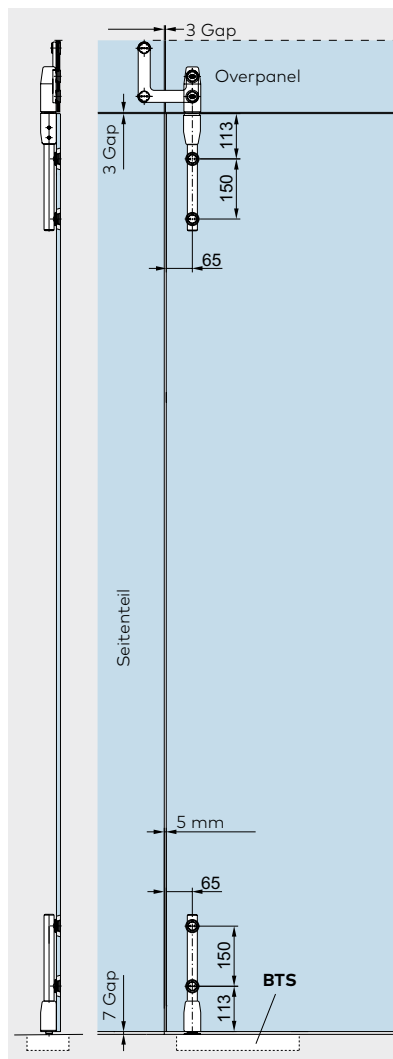

Accessory options for Set 1

Pull handles	Length	Art. No.
Pull handles	350	29.268
(single-point fixing countersunk)	720	29.271
	1,240	29.274

Set 3

Pivoting door MANET Compact with overpanel for 10 – 12 mm glass

Door weight 80 kg
 Door height max. 2,500 mm
 Door width max. 1,200 mm
 TSG 10/12 mm glass thickness

Product description	Art. No.
Set 3 with pivot rod pair short type	
Set 3 with single-point fixings coutertsunk consisting of: pivot rod pair top/bottom, short type	29.914
einschließlich: 4 single-point fixings for pivot rods, 1 pivot fitting top, 1 overpanel-sidelight connector with pivot bearing location, 1 pivot fitting bottom for BTS/floor pivot	

Accessory options for Set 3

Pull handles	Length	Art. No.
Pull handles (single-point fixing countersunk)	350	29.268
	720	29.271

MANET Concept

140	General information
141	Components
146	Glass preparation
188	Accessories
212	Safety-related information

All elements up to and including the pull handles are available in an elegant stainless steel finish. All the components are manufactured from the steel grade 1.4305 (approx. AISI 303) for normal interior applications.

Note: The products detailed in this brochure are exclusively intended for glass assemblies that do not require separate building regulations approval.

MANET Concept

Pivoting door system

MANET pivoting doors can be installed in both glass partitions and masonry openings. They come as both single and double-action swing doors. All the single-point fixings are designed for clip-on covers for easier installation. Other components include the bottom pivot bearing, top pivot fittings with bearing spigot or eccentric bushing and also overpanel/ sidelight connectors.

As a result, there are almost unlimited possibilities for inte-grating frameless swing doors both in masonry openings – with or without overpanels and sidelights – and in glass partition constructions retained by single-point fixings. Whether with a full-length pivot rod or a pair of shorter pivot rods, the top bearing socket is located in the fitting on the door leaf. This means that connection to the ceiling, lintel or transom can now be provided in the form of the standard PT25 top pivot spigot from the dormakaba range. The door assemblies can be equipped with floor springs such as the dormakaba BTS 75V or BTS 84, and corner locks are naturally also available.

Pivot bearing with full-length pivot rod,
max. door panel height 3,000 mm
max. door panel width 1,200 mm
max. door panel weight 100 kg

From a door panel height of 2,700 mm a fifth single-point fixing is recommended.

Pivot bearing with pivot rod pair short type,
max. door panel height 2,500 mm
max. door panel width 1,200 mm
max. door panel weight 80 kg

Pivot bearing with pivot rod pair short type with intermediate tube,
max. door panel height 2,500 mm
max. door panel width 1,200 mm
max. door panel weight 80 kg

Components for pivoting door system

	Product description	Glass thickness	Art. No.
	<p>Pivot bearing for overpanel and ceiling connection</p> <p>AISI 316L</p>		<p>21.310</p>
	<p>Pivot bearing for BTS (max. 4 EN) / floor pivot</p> <p>AISI 316L</p>		<p>29.545</p>

Components for pivoting door system

	Product description	Glass thickness	Art. No.
	Pivot rod, drilled, fixed length		29.551
	Single-point fixing, countersunk, fixed (1)	10, 12 mm	29.460
	AISI 316L	13.5–15.5 mm	
	clamping disc, fixed (1)	10, 12 mm	
	AISI 316L		
	Single-point fixing, countersunk, centering (2)	10, 12 mm	29.462
	AISI 316L	13.5–15.5 mm	
	clamping disc, centering (2)	10, 12 mm	
	AISI 316L		
	From a door panel height of 2,700 mm a fifth single-point fixing is recommended.		

Glass fixing

	Product description	Glass thickness	Art. No.	Art.-Nr.
	<p>Overpanel / sidelight connection countersunk clamping disc</p>	<p>10, 12 mm</p>	<p>29.320</p>	
	<p>PT 25 pin for ceiling connection,</p>			<p>01.115</p>

Accessories

	Product description	Glass thickness	Art. No.
	<p>Stop for pivoting door with ceiling mounting</p>		<p>21.334</p>
	<p>Stop for pivoting door floor mounting</p>		<p>29.950</p>

	Product description	Glass thickness	Art. No.
	Corner lock	8-12 mm	21.448
	Corner lock with profile cylinder rose on inside	8-12 mm	21.449
	Dead lock for KABA with rose on inside	8-12 mm	
	Profile cylinder for corner lock		14.206
	Eccentric bushing for corner lock		05.194
	Bushing, plastics		00.110
	Strike plate		05.190

Glass preparation for pivoting door system

The gap and distance dimensions recommended by dormakaba are indicated in the adjacent table.

Glass thickness mm	Connection	X Gap	Y
10/12	Sidelight	5	65
	Wall	8	
13.5–15.5	Sidelight	8	62
	Wall	11

SG

A range of locks for all requirements

It doesn't matter what sort of glass door needs securing, what function it has to fulfill, or the type of fittings specified – there will be a lock in the SG range which will provide the shape, the function and the finish which you require.

Simple glass preparation, firm fixing

dormakaba has an intimate knowledge of the special properties of glass as a building material. This has led to the design of locks requiring only simple cut-outs or holes in the glass. Carefully considered and positive measures have been taken to create the maximum clamping surface with optimum clamping efficiency.

Reliability built in

Quality materials and thorough workmanship mean that SG locks have the features necessary to meet the most demanding of specifications. Many satisfied customers will testify this. For safety reasons set lock case always on inside.

Short delivery times

All the common patterns and types are available ex-stock (factory). Specials will be prepared promptly.

UNIVERSAL top, bottom, centre locks and strike boxes with glass cut-outs

Complete, for 10 mm glass thickness

	Product description	Glass thickness	Art. No.
	<p>US 10 corner lock, prepared for Europrofile cylinder, single throw, bolt projection 20 mm, with security rosettes on both sides, 14 mm thick. Suitable gaskets have to be used for systems with an 8 or 12 mm glass thickness. These are available on page 196.</p> <p>Lock insert:</p> <ul style="list-style-type: none"> • high corrosion resistance according to EN 1670 • with regard to type-test according to DIN 18251, class 3* <p>Not illustrated: prepared for KABA</p>	10 mm	03.206
	For half profile cylinder	10 mm	03.340
	left hand top/right hand bottom	10 mm	03.288 not illustr.
	Weight in kg/m: Aluminum 0.942 Brass 1.061 Stainless steel 1.053		
	left hand bottom/right hand top	10 mm	03.287 not illustr.

*Extract from DIN 18251, class 3: Type-test with 50,000 locking bolt operating cycles. Furthermore the lock was tested successfully by a neutral testing institute with 500,000 latch and 100,000 locking bolt operating cycles.

	<p>Prepared for one-sided Europrofile cylinder, lockable from inside</p> <p>Weight in kg: Aluminum 0.858 Brass 1.038</p>	05.116 not illustr.
	<p>Corner lock, prepared for Europrofile cylinder, rose inside</p> <p>Weight in kg: Aluminum 0.924 Brass 1.236</p>	05.118

	Product description	Art. No.
	<p>Corner lock, for vertical fixing, double throw, bolt projection 20 mm, hardened oval bolt, counterplate shortened to give 15 mm free glass edge, prepared for Europrofile cylinder</p> <p>Weight in kg: Aluminum 0.807</p> <p>Prepared for one-sided Europrofile cylinder, lockable from inside</p> <p>Weight in kg: Aluminum 0.818 Brass 0.984</p> <p>Prepared for Europrofile cylinder, rose inside</p> <p>Weight in kg: Aluminum 0.882 Brass 1.184</p>	<p>05.103</p> <p>05.117 not illustr.</p> <p>05.119 not illustr.</p>
	<p>Strike box to suit corner lock (05.100, 05.105, 05.116), for single und 2- door without stop</p> <p>Weight in kg: Aluminum 0.260 Brass 0.765</p> <p>with stop for Art. No. 05.103, 05.117, 05.119</p> <p>Weight in kg: Aluminum 0.264 Brass 0.760</p>	<p>05.108</p> <p>05.109 not illustr.</p>

Corner and centre locks without glass preparation

Complete, for 10 and 12 mm glass thickness

	Product description	Glass thickness	Art. No.
	<p>Slide over corner lock for single- and double-action doors for retrofitting, double throw, bolt projection 20 mm, hardened oval bolt, prepared for Europrofile cylinder</p> <p>Special model for 8 mm glass also available.</p> <p>Weight in kg: Aluminum 0.740</p> <p>prepared for KABA</p> <p>Weight in kg: Aluminum 0.735</p>	<p>10 mm</p> <p>12 mm</p>	<p>05.106</p> <p>05.130</p>
	<p>Slide over strike box for slide over corner lock for single door</p> <p>Weight in kg: Aluminum 0.341</p>	<p>10 mm</p> <p>12 mm</p>	<p>for Art. No. 05.106/05.107 05.112</p> <p>for Art. No. 05.130/05.131 05.132</p>

Centre locks and strike boxes

Complete, for 10 mm glass thickness

Centre locks and strike boxes
with drilled holes glass preparation

	Product description	Art. No.
	<p>Centre lock for single-action door (with free glass edge), prepared for Europrofile cylinder, double throw</p> <p>Weight in kg: Aluminum 1.060</p>	<p>*11.220/11.221</p>

	Product description	Art. No.
	<p>Centre lock for single-action door (with free glass edge), with both latch and lock bolt, prepared for lever on round rose inside, smooth blanking plate outside, prepared for Europrofile cylinder, double throw</p> <p>Weight in kg: Aluminum 1.175</p> <p>Strike box to suit centre locks for: Art. No. 11.224, 11.225 Art. No. 11.220, 11.221</p> <p>Weight in kg: Aluminum 0.945</p>	<p>*11.224/11.225</p> <p>*11.203/12.207</p>
	<p>Lever handle, for inside to suit centre locks for: Art. No. 11.224, 11.225, Art. No. 11.254, 11.255</p> <p>Weight in kg: Aluminum 0.195</p>	<p>11.226</p>
	<p>If used on glass doors in rebated frames and for 10 mm glass thickness, a minimum of 26–28 mm frame depth is needed.</p> <p>* Left / right hand (illustration shows left hand) are determined by view from hanging side.</p>	

	Product description	Art. No.
	<p>Hook lock for sliding doors, nightlatch function, suitable for aluminum lever handles with round roses (10.307), prepared for Euro-profile cylinder, left hand and right hand, with lock keeper plate</p> <p>Weight in kg: Aluminum 1.325</p>	<p>05.200</p>
	<p>Suitable for lever handles with follower</p> <p>Weight in kg: Aluminum 1.325</p> <p>Strike box to suit hook lock, (05.200, 05.202), non-handed</p> <p>Weight in kg: Aluminum 0.890</p>	<p>05.202</p> <p>05.201</p>

* Left / right hand (illustration shows left hand) are determined by view from hanging side.

	Product description	Art. No.
	<p>Centre lock with latch and lock bolt, for inward opening single-action doors, prepared for lever on round rose inside, smooth blanking plate outside, prepared for Europrofile cylinder</p> <p>Weight in kg: Aluminum 1.090</p> <p>Suitable lever handle see page 199</p> <p>Centre lock with latch and lock bolt, for inward opening single-action doors, prepared for rose lever on both sides, prepared for Europrofile cylinder</p> <p>Weight in kg: Aluminum 1.090</p> <p>Strike box, to suit centre lock with latch and lock bolt, with electric strike release (Standard: fail secure function, 6 to 12 V -/-, with mechanical unlock. Further types on request.) (for Art. No. 05.224, 05.225)</p> <p>Weight in kg: Aluminum 0.595</p>	<p>*05.224/05.225</p> <p>11.226</p> <p>*05.228/05.229</p> <p>*05.226/05.227</p>
 <p>LH/ISO 6 door illustrated.</p>	<p>Angle bracket for centre locks (opening to outside)</p> <p>Weight in kg: 0.040</p>	<p>*05.218/05.219</p>

* Left / right hand are determined by view from hanging side.
** Angle bracket (05.218/05.219) for door opening outwards (optional)

Locks with panic function, opening to outside

for 8 and 10 mm glass thickness

Operation outside: Bolt is unlocked by turn of key, and latch is withdrawn by follower.

Operation inside: Lock can be operated by rose lever handle even when bolt is locked.

Not for emergency exit doors according to German Standard DIN EN 179 or DIN EN 1125 (corresponding modifications in preparation)

For best protection against burglary we recommend the use of the angle bracket (05.218/05.219)

	Product description	Art. No.
 <p>Illustration shows left hand</p>	<p>Centre lock with both latch and lock bolt, rose lever on inside and fixed knob (without function) on outside. Prepared for Europrofile cylinder with roses</p> <p>Weight in kg: Aluminum 1.706</p> <p>Please use strike box 11.206/11.207.</p>	<p>*05.240/05.241</p>
 <p>Illustration shows left hand</p>	<p>For strike boxes with electric strike release</p> <p>Centre lock with both latch and lock bolt, with angled cover, for door opening outwards (not shown), rose lever on inside and fixed knob (without function) on outside. Prepared for Europrofile cylinder with roses. Lockable into strike boxes with electric strike release for Art. No. 05.226/05.227</p> <p>Weight in kg: Aluminum 2.900</p>	<p>*05.244/05.245</p>

*Left / right hand are determined by view from hanging side.

Additional exit devices for glass doors with panic function covered by approval certification can be found in the technical documentation of PHA 2000 and Exit Pad

Self-locking panic locks, opening to outside

for 8 and 10 mm glass thickness

Operation outside: Bolt is unlocked by turn of key, and latch is withdrawn by follower.

Operation inside: Lock can be operated by rose lever handle even when bolt is locked.

For emergency exit doors according to German Standard DIN EN 179.

	Product description	Art. No.
	<p>Centre lock OFFICE Junior SVP 5000 with both latch, lock bolt self-locking function rose lever on inside and fixed knob (without function) on outside. Prepared for Europrofile cylinder with roses</p> <p>Weight in kg: Aluminum 1.706</p>	<p>*05.250/05.251</p>
	<p>Strike box for self-locking panic lock 05.250/05.251</p> <p>Weight in kg: Aluminum 1.486</p>	<p>*05.252/05.253</p>

Please note:

For frame applications with 8 mm TSG a rebate depth of min. 26 mm required. With 10 mm TSG, a fold depth of of at least 28 mm required.

*Left / right hand are determined by view from hanging side.

Additional exit devices for glass doors with panic function covered by approval certification can be found in the technical documentation of PHA 2000 and Exit Pad

Wall connection profiles

Consisting of: base profile, with bore holes (every 300 mm), incl. clamping parts with screws and gasket strips.

Application:

e. g. all around frame system for toughened glass assemblies, with fittings on sides and ceiling. The safety type prevents free hanging glass elements from falling down, by fixing the clamping fitting through glass holes. 15 kg load for each clamping part, torque for fixing screws 15 Nm (M 6 = Allan key size 4).

MR 22/MR 28

184 **Components**

188 **Accessories**

212 **Safety-related information**

MR 22/MR 28

Wall connecting frame system MR 22 and MR 28

Comprising a frame profile (series-drilled), a clamping profile and two contact rubber extrusions (PVC, grey).

These decorative and elegant frame solutions are characterised by their remarkably easy installation. The viewface width in the case of the MR 22 is a mere 22 mm and in the case of the MR 28 it is just 28 mm. Suitable for glass thicknesses of 8 and 10 mm. No load transfer by the profiles. Can be readily

removed and re-installed elsewhere. The MR 28 features an additional screw-fixing channel for connecting angle brackets and enables combination with mullion profiles for the vertical connection of several glass panels and also abutment to frame systems AT 44 and AT 50.

Applications:

e.g. surrounding frame for toughened glass systems for fixing to walls and ceilings

MR 22

max. glass dimensions:
height: 2,500 mm
width: 1,000 mm

MR 28

max. glass dimensions:
height: 2,800 mm
width: 1,000 mm

Base profile MR 22

	Features and data	Art. No.
	<p>MR 22 in 6,000 mm stock length, without PVC profile</p> <p>Weight in kg/m: Aluminum 0.648</p>	07.240
	<p>MR 22 in fixed length</p> <p>Weight in kg/m: Aluminum 0.648</p>	07.250

Base profile MR 28**Attention:**

Profiles are only delivered with straight cuts. Allowances in lengths of profiles to ensure producibility of bevel cuts have to be planned by the customer. The georgian bar profile must be prepared in addition on both sides. Please consider installation instruction

Accessories

Perfection in detail

Original accessories for patch fittings, door rails and locks, matched to the dormakaba product range, are available.

They ideally complement the range of dormakaba hardware to optimise the technical excellence and cost effectiveness of toughened glass systems of all types.

Aside from functional components such as special floor pivots – including models for wet rooms – dormakaba also offers a choice of security-relevant options. Their installation further enhances the exceptional functional efficiency, reliability and long service life expected of dormakaba systems.

Top bearing, pivots for UNIVERSAL, BEYOND, EA, TP/TA, MANET

Advisory: Please note that the upper pivots for UNIVERSAL and those for MUNDUS are not mutually compatible. The spigot diameters of the MUNDUS fittings vary.

Usage and assembly of fins

Fin fittings and corner connectors do not have a supporting structure. Overpanels, side-lights and fins have to be fixed securely to the ceiling by dormakaba wall connecting profiles or similar systems.

The need for stiffeners and the requisite glass thickness must be specified by a properly qualified structural engineer.

Saddle plate
and door closer TS 92 are
available at dormakaba,
Ennepetal, or at special
suppliers for building hard-
ware.

Door closer TS 97

TS 97 including saddle plate

For connecting the closer to toughened glass doors – no glass recess machining or drilling required.

The TS 97 with this special glass fixing bracket should be used with STUDIO Arcos and OFFICE Arcos / OFFICE Junior hinges.

For more information please see our technical brochure TS 97.

Space for your notes

Pull handles, door knobs and recessed pull grip

The pull handle/knob system is designed for glass of 8, 10 and 12 mm thickness.

The pull handles can be fixed to both sliding and pivoting (swing) doors on one face using the appropriate connectors or on both faces by through-bolting (back-to-back arrangement).

Due to a flat structure recessed pull grips are also suitable for sliding doors.

The single-point fixings and through bolts are included as standard equipment in the scope of supply.

The pull handles can be fitted horizontally, vertically or in a handrail arrangement.

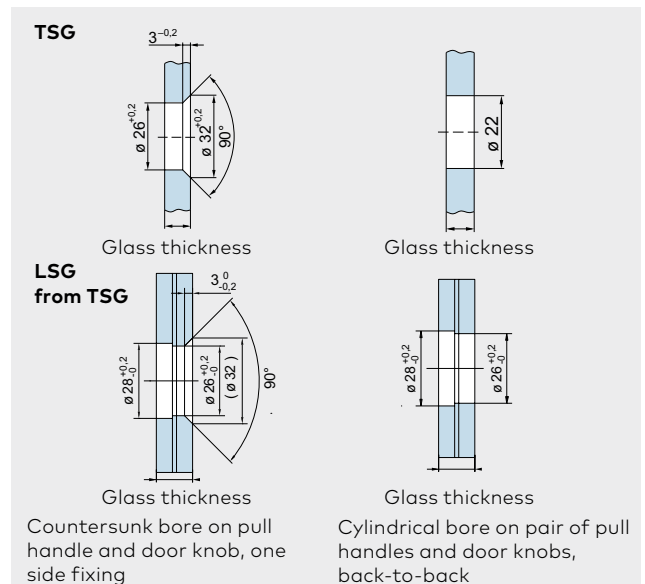

Pull handle pairs

	Product description	Glass thickness	Art. No.
	Pair of handle bars satin stainless steel length 350 mm, 2 fixing points, weight in kg: 1.254 material 1.4305 do., material 1.4404	8/10/12 mm	21.267* 21.247

Note: To ensure better load transmission, please use a pull handle in conjunction with the DORMOTION damping unit.

Safety-related information

Important safety-related information for the mounting and use of dormakaba glass fittings.

(Follow these instructions in addition to the mounting and operating instructions in order to avoid damage of product and damage to person or property.)

Important: All users have to be informed about relevant points mentioned in these safety-related information and the mounting and operating instructions!

General information

1. dormakaba recommends the use of TSG-H (heat-stored tempered safety glass) according to DIN EN 12150-1.
2. dormakaba glass fittings are not suitable for outdoor installation.
3. dormakaba glass fittings are not suitable for rooms where chemicals (e.g. chlorine) are used, e.g. swimming pools, saunas and brine baths.

4. Sliding panels must not be moved faster than at walking speed and must be stopped by hand before reaching the end position will be.
5. Pivoting panels must not be thrown too hard. If there is a risk of over-turning, this must be prevented by a door stop.

Mounting

1. Only properly qualified and specially trained staff is authorised to mount dormakaba glass fittings.
2. Never use glass with conchoidal fractures and/or damaged edges.
3. Due to crushing hazards – among others in the area of the secondary closing edge – and possible injury caused by breakage of glass during mounting, corresponding protective clothing (especially gloves and protective goggles) is required.
4. Clean clamping area with fat solvent (standard commercial cleaning agent) before mounting the glass fitting.
5. Never use clamping shoes on structured glass surfaces (except on satined glass) or glass of heavily varying thickness unless with a corresponding levelling layer.
6. Never use clamping shoes on self-cleaning coatings.
7. When adjusting glass elements, always stick to the required clearance for the respective fitting. Adjust clearance so that the glass does not touch hard components such as glass, metal or concrete.
8. Make sure not to use excessive force when installing the glass (avoid local stress resulting from very tight screws).

Maintenance

Check fittings at regular intervals for proper positioning and smooth running and door for correct adjustment. Especially highly-frequented door systems require inspection by properly qualified staff (specialised companies or installation firms). Immediately replace damaged glass elements (no glass flaking and/or conchoidal fractures)!

General care instructions

The surface finishes of the fittings are not maintenance-free and should be cleaned according to their material and design.

- For metallic surfaces (anodised finishes, stainless steel) please use appropriate cleaning agents without abrasive additives only.
- For varnished surfaces please use appropriate solvent-free cleaning agents only.
- Brass surfaces (without surface protection) have to be treated with an appropriate maintenance agent on occasion, to avoid tarnishing.

For practical planning, please use our drawings dormakaba "The Detail".

The printed colours indicating the surface finishes are not 100 % true, but do provide a useful guide. Statements made with regard to the nature or use of the products are for the purposes of descriptions. Assent with regard to the existence of particular properties or particular uses always requires special written agreement. Pictures may show special designs which are different to the standard scope of delivery.

Subject to change without notice.
