

# Keyscan Aurora

Web client module for Keyscan Aurora software

dormakaba

The Keyscan Aurora Web interface allows you to manage your Keyscan access control system from any web-enabled computer, laptop, tablet or mobile phone. Dealers or End-User customers may perform updates and maintenance tasks using the Aurora Web Client's available functions from the comfort of wherever you may be located. It is the ideal solution for those who need, or want, true mobility and remote access.

The Aurora Web interface (Part: AUR-WEB) is an add-on software module used in conjunction with Keyscan Aurora access control software.

The Keyscan Aurora Web interface gives you access to perform updates and maintenance to data portals of your access control software, such as:

- Create, edit and delete people records.
- Add, edit or delete credential information.
- Schedule, manage or view visit appointments.
- Assign credentials to groups for door and elevator floor access.
- Create, edit or delete schedules for regulating access times.
- Assign groups to doors/elevator floors and schedules.
- View door status with override functions – lock, unlock, pulse and timed unlock.
- View elevator floor status with override functions – secure, unsecure, timed unsecure.
- View online transactions for site activity.
- Enable and activate lockdown feature.
- Manage E-Plex wireless lock functionality.
- Available reports to review virtually any site activity based on criteria selected.
- Set your Web-Client access URL as a home screen icon for fast and easy app-like usage on all mobile phones and tablets.

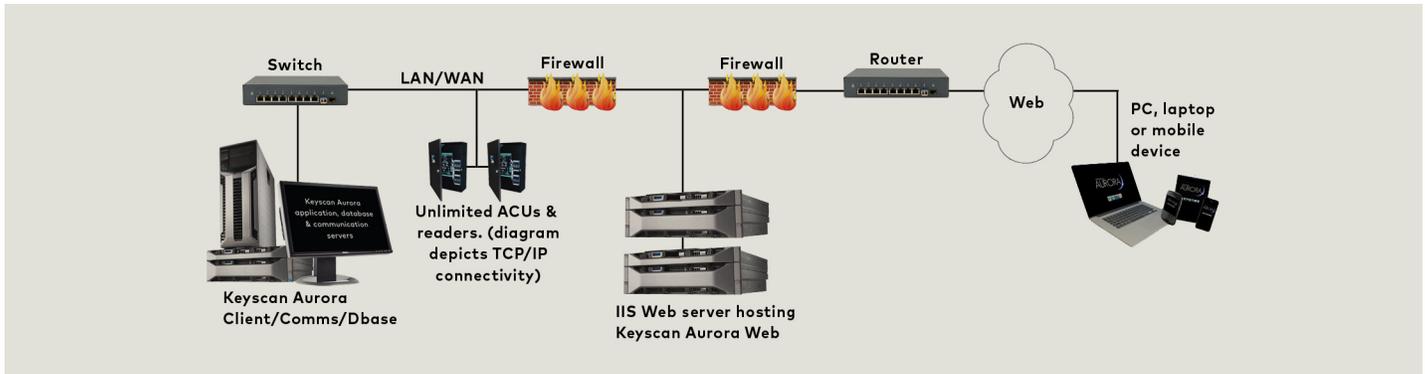

## Features and Benefits:

- Provides web-based access to select functions of your Keyscan Aurora software.
- Logs all web initiated system management activities.
- Access control units are not directly accessible for maximum safety.
- Web interface is configured for easy viewing on mobile phones and tablets, as well as PCs.

## Typical Application

Required: Web server running .net Framework 4.0 and ASP .NET 4.0 or higher. We recommend Aurora Web server application be installed on a separate server from all other Aurora software applications. Contact dormakaba Canada Keyscan Technical Sales for details.
