Oracode

Delivering keyless access for vacation guests

Oracode keyless access control system

Oracode is an intelligent, electronic access control system that provides keyless access for temporary users. Using a time and date-specific code, Oracode eliminates keys and cards as well as time consuming access control management.

The system provides:

- Access for days, weeks, or months
- Access management from a centralized location
- Operation from anywhere in the world
- Code generation in advance or a moment's notice
- Codes to work only between the start and finish parameters
- Code sent via SMS or email to mobile device or laptop
- Integration into an existing PMS system
- Integrates with leading home automation and property operation platforms
- Management of temporary workers
- the dormakaba mobile access app

Convenience

Oracode Live, the online solution, adds more convenience to guest and lock management, providing real-time data and remote functions. Oracode Live sends access codes via smartphone or tablet to guests or vendors.

No Keys, No Cards

The "no keys, no cards" concept is ideal for owners, property managers, guests, housekeepers, vendors, and maintenance — all who need access control rights at rental properties.

Security

Designed to increase security at properties, the Oracode system manages a temporary user's access control privileges. The system grants unique access for up to 128 different user types. Valid codes automatically expire at the end of the authorized period. The lock has the capacity to retain audit trail events, including the time and date of the last 5,000 events.

Commercial Grade

Locks are tested to the highest standards for strength and durability, while finishes withstand a broad range of climates.

Simplicity

Oracode not only increases security but streamlines the access control process for management and staff, making it an easy way to manage when temporary users enter access points. No keys or cards to manage or replace. Codes can be given verbally, by text or email. The guest is given a time and date-specific code that serves as an electronic key that opens the lock only during the time-specific period. Vendor meets are eliminated, saving time and money.

Factsheet

Oracode PMS Interface Listings

The following Property Management Software Interfaces link with the Oracode Live system:

Barefoot Technologies	Lodgix
BeHome247	MeyerRE
Breather	Natural Retreats
Breezeway	NiteSoft
