

dormakaba 90 09M Contactless Door Egress Device

Contactless solutions have never been more relevant.

dormakaba's 90 09M utilises Capacitance Promimity technology - an environmental independent design. The 90 09M's sleek and minimalist design makes it easy to integrate into any project.

Technology & Function:

- Built-in buzzer & backlight
- Dry contact output
- Built-in mechanical override in case of power failure or electronic failure
- Digital timer to control the relay output timing from 1 to 64 seconds
- DIP switch to adjust the sensitivity for different installed environments

Flexible Mounting

- Flexible mounting options with wall switch plate

Friendly Installation

- All inputs are 10-24VDC protected
- All input and output signals are protected against static charges
- Reverse power protection fit with European or US gang box
