Stainless Steel Lever Handles

dormakaba's stainless steel lever handles come in two different series - SH Series and TH Series - and a wide selection of contemporary designs. Both Series are finished to exacting standards, which have been the hallmark of all dormakaba products.

The SH Series is a collection of solid lever handles in 316 satin stainless steel, whilst the TH Series is a collection of tubular lever handles in 304 satin stainless steel.

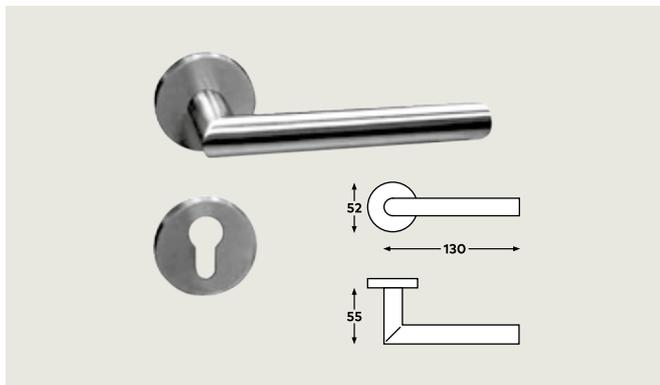

Both series come complete with fixing accessories, including escutcheons and roses, and are designed for secure through-bolt fixings. The clip-on cover plates conceal the through-bolt fixings and spindle bushing, thereby ensuring a neat and elegant appearance of the installed lever handles. A spring-cassette system, which is a standard recommendation for the SH Series, ensures that the installed lever handles do not sag under heavy use. This system is optional for the TH Series in view of its lighter weight.

Other key features of dormakaba's stainless steel lever handles:

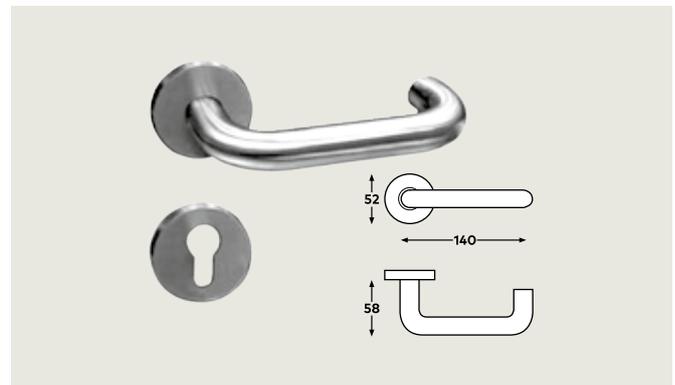

- Quick and easy assembly
- Suitable for use on most types of mortise locks
- Suitable for use on all types of fire doors
- A special 4mm thick rose is available for use with the non-spring-loaded escutcheon
- The standard rose, which is 8 mm thick, is a must for the spring-cassette system
