

B-COMM for PeopleSoft

Employee self-service

Increase workforce productivity with B-COMM for PeopleSoft Employee Self-Service feature

Empower your workforce

Everyday companies strive to automate mundane tasks and empower employees to be more productive. Self-service applications provide a central location for administering and automating human resource functions, saving time from otherwise manual processes. B-COMM for PeopleSoft Employee Self Service (ESS) is a powerful tool that allows employees and supervisors to focus on important responsibilities.

B-COMM for PeopleSoft ESS gives users quick access to their time transactions,

accruals, schedules, and hours worked (as calculated in PeopleSoft). Employees also have the ability to add elapsed time right at the time collection device. Another key feature is the ability to send important messages electronically that can be viewed by an individual employee, or broadcast to a group of employees. Employees can be reminded of important holidays, news, policies and more, directly at a PC, Kiosk, or time clock.

For extended features, B-COMM for ESS integrates directly with PeopleSoft's Absence Management system. This solution

gives employees the ability to request time off from the time collection device.

Requests are routed to PeopleSoft Absence Management, where supervisors can view, and approve/deny the request.

dormakaba's Employee Self-Service option delivers convenience, improved efficiency, and accuracy.

An Enterprise-class Solution B-COMM by dormakaba
