- OnDemand (Cloud) or OnPremise – the choice is yours

The comprehensive time recording platform

B-COMM for Workday makes your Workday time recording software more powerful than ever. The comprehensive time recording platform provides a whole range of functions specifically for Workday. Thanks to seamless integration, your HR, planning and financial processes are simplified.

One solution – benefits for everyone

Improve your operational efficiency and reduce manual employee input with easy-to-use, intelligent dormakaba terminals 96 00 and 97 00. Whether using RFID or fingerprint biometrics, B-COMM for Workday not only simplifies time and data recording, it also enhances the system for users with internal messaging, improved communication and a personalised user experience.

Reliable partner

dormakaba has been supporting ERP providers with specially certified B-COMM HCM solutions for over 30 years. Take advantage of our experience drawn from many thousands of projects.

Partner

dormakaba – your Workday solution partner

Consultancy

Qualified application consultants will work with you and your Workday consultant to develop a solution tailored specifically to your needs. In addition, a highly motivated team specialising in Workday interfaces, communication and dormakaba terminal technology is at your disposal.

International offering

We operate internationally. This sets us apart from other providers. There are more than 1800 dormakaba installations with ERP connections (on the ERP market) in operation across the globe. Satisfied customers in over 60 countries put their trust in dormakaba. Our local branches and partner companies guarantee seamless customer service.

Software

B-COMM for Workday is being continuously developed with new Workday releases, so it is always up to date. Furthermore, you can construct your software solution very flexibly from a range of useful modules. This allows you to extend and optimise your application to suit your needs exactly.

Hardware

With B-COMM for Workday, dormakaba terminals 96 00 and 97 00 communicate directly with the application online. The dormakaba terminals become a central hub for communication with employees

Individual user experience

Employees are only shown functions that match their current booking status on the dormakaba terminals. For example, absent employees can only make In bookings. Only then are further, logically appropriate functions displayed.

Quality

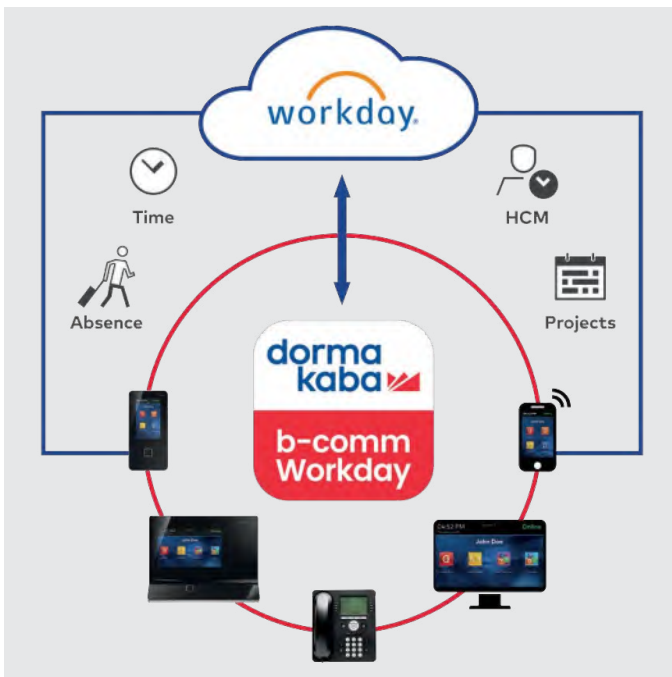

All components are developed and manufactured according to the ISO 9001 quality management system. dormakaba employees are dedicated to fulfilling your quality requirements. We employ advanced development processes and tools to do so.
