

No more slamming doors – for greater living comfort

ITS Home – the integrated door damping system

Door comfort has a name: ITS Home

Whether in private homes, offices or public buildings – ITS Home ensures gentle closing, barrier-free access and controlled opening of every door. ITS Home is an integrated soft-closing system for doors, inspired by the smooth functionality of drawer slides and kitchen furniture.

Innovative damping technology

- Rapid opening and closing, or uncontrolled slamming is slowed down in a controlled manner.
- The damping intensity can be regulated using a valve.
- Opening and closing takes place with minimal initial resistance, which is hardly noticeable – similar to a standard interior door.

Almost invisible design

- The ITS Home is integrated into the door leaf and door frame together with a G 96 slide channel.
- The technical foundation is the cam technology of the ITS 96 door closer – durable, maintenance-free and proven many times over.
- For doors up to 100 kg and a minimum door leaf thickness of 40 mm.

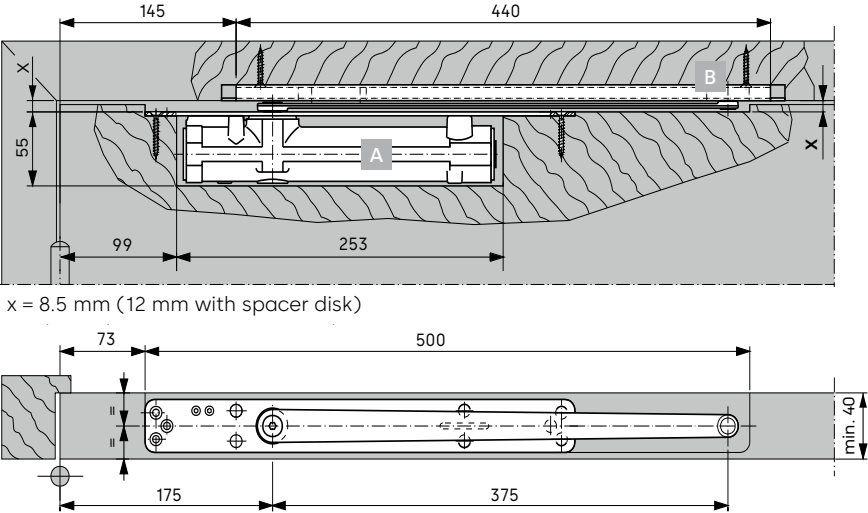

Soft closing- even in strong drafts.

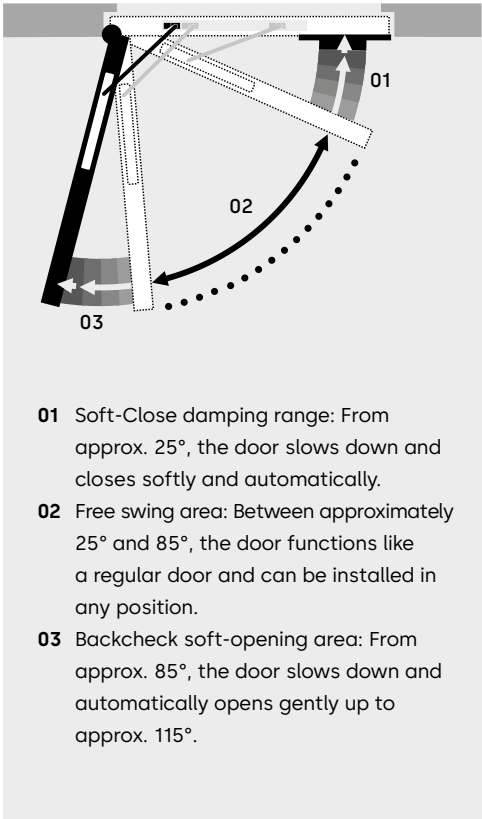

Quiet door closing – for undisturbed concentration in the office.

ITS Home complements the proven ITS 96 system

Installation example ITS Home with slide channel G 96 N20 in a solid-wood door

The ITS Home is the same size as the ITS 96 EN 2-4 door closer. The ITS Home can be operated with the G 96 N and G 96 N 20 slide rails. The corresponding accessories are compatible. Further information on the ITS 96 system and installation drawings can be found in the ITS 96 System brochure.

ITS Home (A)	Version	Article no.
Door damper system for installation in the door leaf	DIN L	52840150
	DIN R	52850150
Matching slide rails (B) for the ITS Home		
G 96 N20 cross-section 20 x 12 mm, incl. forged arm (silver P600)	DIN L	52980101
	DIN R	52980201
G 96 N cross-section 31 x 20 mm, incl. forged arm (silver P600)	DIN L	52980301
	DIN R	52980401
