Interior glass systems

Frameless glass walls with sliding or pivoting door

dormakaba Interior glass wall systems bring the benefits of glass to the workplace—transparency, daylighting, versatility, efficiency, space saving, and low cost of ownership. These glass wall systems come in a range of sleek but resilient minimalist designs and configurations, allowing you to select a system that matches your project's functional and aesthetic requirements.

Design

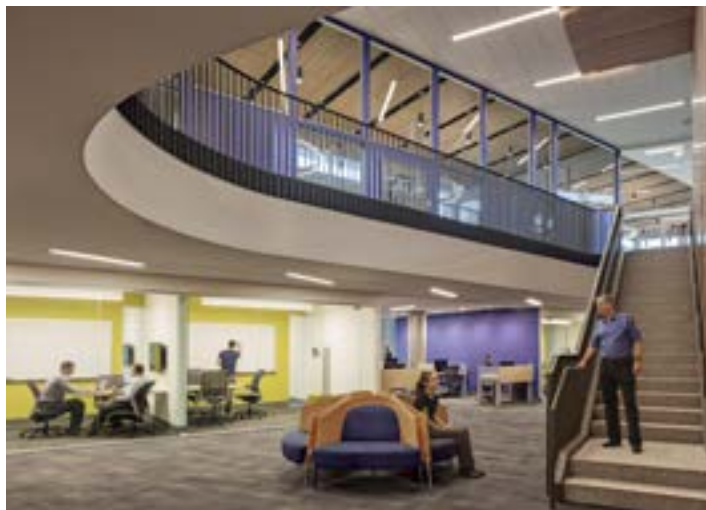

Frameless dorma Pure[®] glass wall systems create simple, elegant fronts with extended transparent sight lines. An innovative blend of glass and metal creates a simple, versatile design that accommodates both sliding and pivoting doors. PURE glass walls give a consistent look to work spaces that serve multiple functions or present difficult space challenges.

Applications

- PURE Glass Walls are ideal for:
- Office fronts
- Small conference rooms
- Door control options include:
- Traditional sliding
- Synchro sliding
- SoftClose[™] sliding
- Pivoting

Synchro sliding glass doors provide the convenience of opening two panels simultaneously, quickly creating enough space for groups to occupy or vacate the space.

The SoftClose option provides a sophisticated touch by controlling and regulating closing speed—preventing the sliding door from slamming or traveling too quickly.
