Majoring in convenience

User-friendly models and options, individually configurable systems

Extraordinary convenience housed in a slim profile

The MUTO system impresses by virtue of its compact elegance and extensive functionality, creating a sliding door system with enhanced user-friendliness.

Even tailored solutions come easily

The fully integrated MUTO offers a choice of models and optional functions, all controlled by mechanisms housed out of sight behind the compact header. The XL 120 Self-Closing model offers the convenience of power-free self-closing, including DORMOTION at end of closing cycle and DORMOTION as an option in opening cycle (add option DMSC).

Optional convenience feature

A convenient option is the MUTO status indicator, which allows the door position to be monitored from anywhere in the building.

Glass, wood, or metal applications

MUTO is particularly suitable for glass applications, but can be adapted for wood, metal, or other door material solutions.

ADA compatibility

MUTO systems are ADA compatible with or without DORMOTION (DM), except for XL 120 SC. Note that, as with traditional swing doors, the force required to disengage from the DM latch and set the door in motion is not included in the measurement when meeting the required 5 lb opening force.

Self-closing – hassle-free

The MUTO Premium XL 120 Self-Closing model automatically closes the door once it has been opened; the quiet action operates without a power supply – an enhancement to any interior.

DORMOTION – the elegant Softclose® damping mechanism

The epitome of elegant convenience, the optional DORMOTION function gently decelerates the door panel over the last few inches, taking it automatically and quietly to its end opened or closed position.

Status indicator – everything under control

The optional status indicator ensures that the sliding door can be monitored with remarkable ease. As soon as the door opens or closes, a status signal is transmitted to the building management system or an indicator lamp – an important benefit in buildings requiring professional facility management capability.

Model comparison guide

Note: All measurements are shown in inches (mm) – example: 3/8" (10).

Notes

³ XL 120 SC and XL 80 TEL are handed in the direction of the opening cycle. Example: Right hand opens to right when facing the front of the track.

⁴ Gap between fast and slow moving XL 80 TEL glass panels equals: 31/32" (24.5) with 3/8" (10) thick glass and 7/8" (22) for 9/16" (13.5) thick glass

⁵ Total XL 80 TEL system width cannot exceed 236" (6m). Additional charges incurred for units exceeding 118" (3 m).

⁶ Minimum panel size based on nominal handle location 2-1/2" (64) from leading edge of glass.

1 door panel

2 door panels with Synchro (not available with DORMOTION)

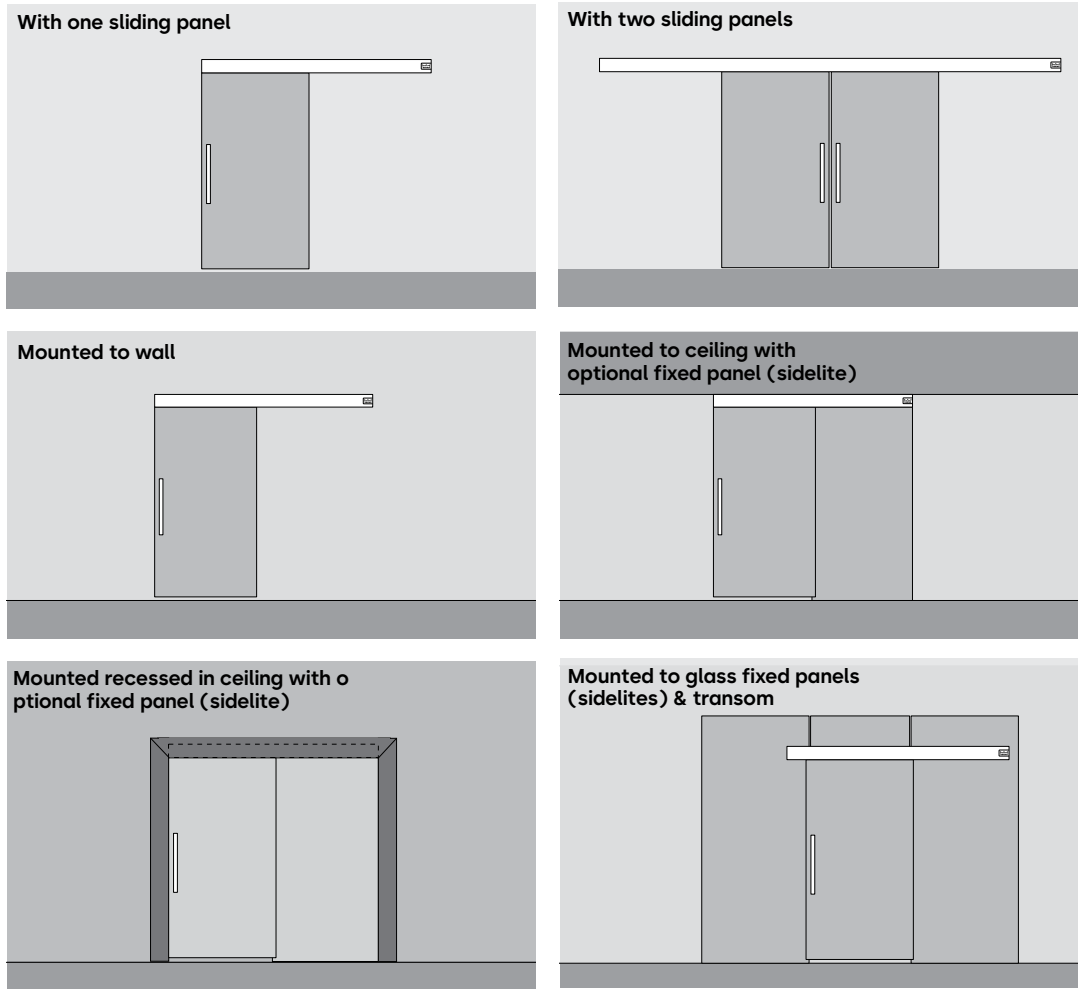

2 door panels without Synchro

1 or 2 door panels with telescopic

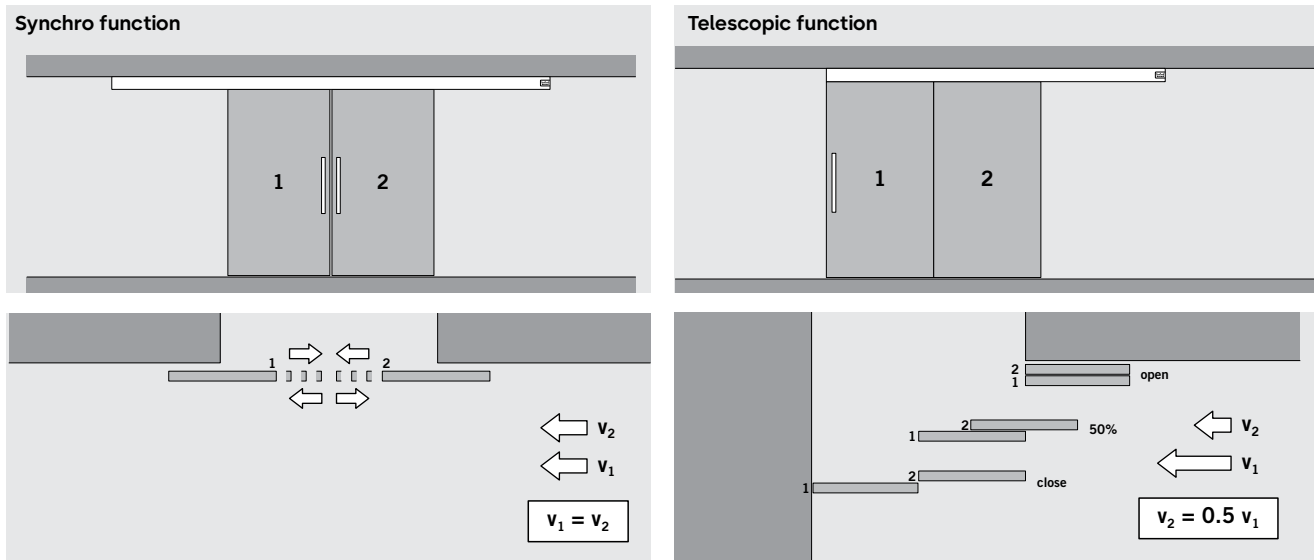

Installation types

Installations

Disclaimer
When sizing MUTO door panels, maximum weight capacity is key. When maximizing door panel width, height, or thickness, one or more of the other dimensions (width, height, or thickness) will require reductions to remain at or below the maximum allowable weight capacity of the specific MUTO sliding unit, within industry codes, standards, or specifications, and within door manufacturer recommendations. Actual track, cover, and/or other MUTO extrusion profile inventory lengths are 157-1/2" (4 m) for all Make-To-Order (MTO) units. All extrusion includes clamp marks visible within 1/2" (12) to 1-1/2" (38) from each end of all profiles. Clamp marks need to be cut off in the field for any full length profile shipped, with the exception of CE-R units. Please take into consideration when planning system lengths and list price charges. MTO systems other than CE-R will be fabricated at the factory with a joint at center for systems exceeding 154" (3.9 m), or 157" (4 m) for CE-R and charged accordingly with a per FT. list price add.

Functions

Installation made easy

Cover profile

Anti-jump device

Height adjustment

Installation for ceiling recessed (CE-R) mount only

Cover profile

Anti-jump device

Height adjustment

Installation made easy

Retrofit DORMOTION in the field

(minimum door panel widths must be considered)

Optional status indicator retrofitted in field

Adjustable endstop

TLG compatibility

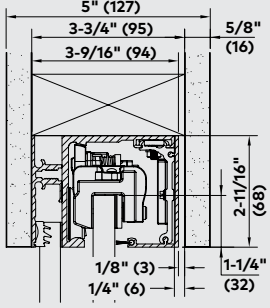

dormakaba's Clamp & Glue technology allows installation to tempered laminated glass. This technology allows secure holding power with minimal clamping force, and does not require special glass preparation.

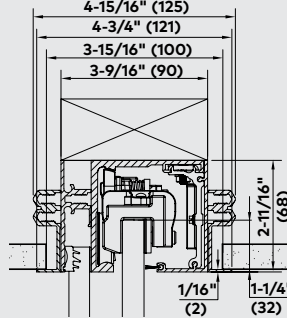

MUTO ceiling recessed (CE-R) mount applications

Premium XL 150/80 DORMOTION (DM), XL 150, XL 120 SC Sliding panels concealed or recessed into ceiling, header, drywall, or drop ceiling

Two most common applications

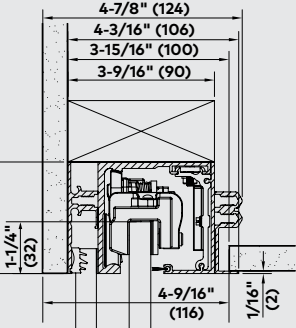

Option 1
Recessed both sides, drywall vertically mounted.

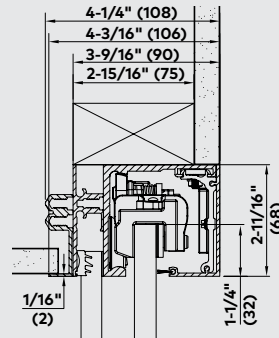

Option 2
Recessed both sides. (May be drop ceiling profile 836.820 or reinforced drywall; drop ceiling shown.)

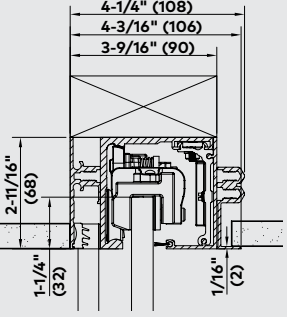

Other applications

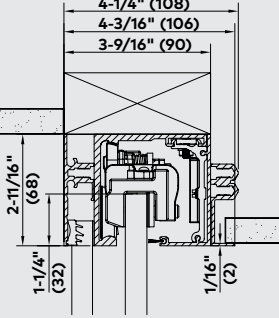

Option 3
Recessed both sides, drop ceiling profile by drywall. (Drop ceiling profile 836.820 one side by flush vertical drywall other side.)

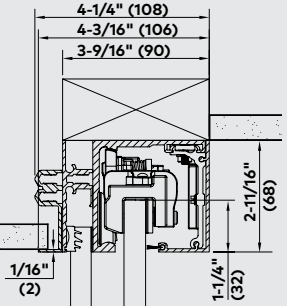

Option 4
Recessed one side only. Drop ceiling profile by drywall above. (Drop ceiling profile 836.820 one side by vertical drywall above.)

Option 5
Recessed both sides, Drop ceiling profile by drywall. (Drop ceiling profile 836.820 one side by reinforced drywall other side.)

Option 6
Recessed one side only. Drop ceiling profile by drywall. (Drop ceiling profile 836.820 cover side by reinforced drywall above sidelite profile.)

Option 7
Recessed one side only. Drop ceiling profile by drywall. (Drop ceiling profile 836.820 one side by reinforced drywall above cover.)

Premium XL 150 DM / XL 150 / XL 80 DM

Typical assemblies mounted to wall

* If single door panel closes against jamb or only overlaps on one side, subtract 1-3/16" (30) from formula.

Mounted to wall (W)

Features and data

min CW	23-5/8" (600)
max DW	57" (1448)
max CW	54-3/4" (1390)
	XL 80 DM
min DW	26" (660)
min CW	26-5/8" (600)
max DW	57" (1448)
max CW	54-3/4" (1390)

Calculation example

$DD = (31-1/2" - 4-3/16") \div 2 = 13-11/16"$
 $DD = (800 - 106) \div 2 = 347$

T = Formula Value

Z = Quantity of holes to drill

The total quantity of holes (Z) depends on clear opening width (CW) and determines the final drilling distance (DD).

- Use the equation to determine (DD) drilling distance (hole spacing) at defined (DD) locations.
- Provide (CW) clear opening width to determine value for (T).
- Insert value for (T) to formula equation to calculate (DD) drilling distance.

	T	Z
$CW \geq 23-5/8"$ (600) $\leq 31-1/2"$ (800)	2	8
$CW > 31-1/2"$ (800) $\leq 39-3/8"$ (1000)	3	10
$CW > 39-3/8"$ (1000) $\leq 47-1/4"$ (1200)	4	12
$CW > 47-1/4"$ (1200) $\leq 54-5/8"$ (1388)	5	14

Premium XL 150 DM / XL 150 / XL 80 DM

max 118-1/8" (3000)

Calculation of glass width

DW = CW ÷ 2 + 1-1/16" (27)

	XL 150 DM	XL 80 DM
min DW	26" (660)	26" (660)
min CW	49-13/16 (1266)	49-13/16 (1266)
max DW	57" (1448)	57"
max CW	112-1/16" (2846)	112-1/16" (2846)

Calculation example

DD = (55-1/8" – 4-3/16" – 6-11/16") ÷ 4 = 11-1/16"
DD = (1400 – 106 – 170) ÷ 4 = 281

Refer to Elevation drawing on previous page.

- DW = Glass width
- Z = Quantity of drillings
- TL = Track length
- DD = Drilling distance
- TH = Total height
- CH = Clear opening height
- CW = Clear opening width
- GH = Door (glass) height
- FPW = Fixed panel (glass) width
- T = Set formula value derived from CW
- DT = Door (glass) thickness 3/8" – 3/4" (10 – 19)
- FPT = Fixed panel (sidelite) thickness
- Y = 2-7/8" (72) – 13/16" (20) – DT

	T	Z
CW ≥ 47-1/4" (1200)	4	14
≤ 59-1/16" (1500)		
CW > 59-1/16" (1500)	6	18
≤ 78-3/4" (2000)		
CW > 78-3/4" (2000)	8	22
≤ 112-1/16" (2846)		

T = Formula Value

Z = Quantity of holes to drill

The total quantity of holes (Z) depends on clear opening width (CW) and determines the final drilling distance (DD).

- Use the equation to determine (DD) drilling distance (hole spacing) at defined (DD) locations.
- Provide (CW) clear opening width to determine value for (T).
- Insert value for (T) to formula equation to calculate (DD) drilling distance.

Premium XL 150 DM / XL 150 / XL 80 DM

Sliding door sets with one sliding panel and one or two fixed panels, ceiling surface installation

Incl. track/endcaps, cover, cover clips, gasket, end stops, roller carriers, DORMOTION¹, DM start/stops¹, floor guide, sidelite profile and gasket, sidelite filler profile, sidelite endcaps, U-Channel and gasket, and sidelite mounting hardware. (Sidelite view profile included if appropriate.)

Complete accessories for 5/16"–9/16" (8 –13.5) thick glass.

XL 150 DM / XL 150 max 330 lb (150 kg).

XL 80 DM max 176 lb (80 kg).

¹ XL 150 set does not include DORMOTION or DM start/stops.

Premium XL 120 Self-Closing (SC)

Typical assemblies mounted to wall

Note: XL 120 SC includes DORMOTION standard in the closing cycle, optional (DMSC) for opening cycle.

Features and data

For installation with one or two sliding door panels mounted to wall; for 5/16"–9/16" (8 –13.5) thick glass

Max weight of door panels

264 lb (120 kg)

Calculation of glass height

$GH = CH + 7/8" (22) + X$ (see drawing)

max 118-1/8" (3000)

Calculation of glass width

$DW = CW + 2-3/8" (60)$

* If single door panel closes against jamb or only overlaps on one side, subtract 1-3/16" (30) from formula.

	XL 120 SC
min DW	33-1/2" (850)
max DW	57" (1448)
max 2P DW	2 x 57" (1448)

Mounted to wall (W)

- DW = Glass width
- TL = Track length
- GH = Glass height
- TH = Total height
- CH = Clear opening height
- CW = Clear opening width
- DT = Door (glass) thickness
- Y = 3-15/16" (100) – 13/16" (20) – DT
- X = Bottom of track channel to top of clear opening

Premium XL 120 Self-Closing (SC)

Typical assemblies mounted to ceiling

Note: XL 120 SC includes DORMOTION standard in the closing cycle, optional (DMSC) for opening cycle.

Features and data

For installation with one or two sliding door panels mounted to wall; for 5/16"–9/16" (8 –13.5) thick glass

Max weight of door panels

264 lb (120 kg)

Calculation of glass height

$GH = TH + 1-7/8" (47) + X$
max 118-1/8" (3000)

Calculation of glass width

$DW = CW + 2-3/8" (60)$

* If single door panel closes against jamb or only overlaps on one side, subtract 1-3/16" (30) from formula.

	XL 120 SC
min DW	33-1/2" (850)
max DW	57" (1448)
max 2P DW	2 x 57" (1448)

- DW** = Glass width
- TL** = Track length
- GH** = Glass height
- TH** = Total height
- CH** = Clear opening height
- CW** = Clear opening width
- DT** = Door (glass) thickness
- Y** = 3-15/16" (100) – 13/16" (20) – DT

Mounted to ceiling (CE-S)

Premium XL 120 Self-Closing (SC)

Typical assemblies mounted to or in ceiling with one sliding panel and fixed panel on one side

Note: XL 120 SC includes DORMOTION standard in the closing cycle, optional (DMSC) for opening cycle.

Features and data

For installation with one sliding door panel and one fixed panel, mounted to ceiling or in ceiling; for 5/16"–9/16" (8 –13.5) thick glass.

Max weight of door panels

264 lb (120 kg)

Calculation of glass width

$DW = CW + 1-3/16" (30)$

	XL 120 SC
min DW	33-1/2" (850)
max DW	57" (1448)

Calculation of glass height

(CE-S/CE-R)

$GH = TH - 1-7/8" (47)$

$FPH = CH + 1/8" (3)$

max 118-1/8" (3000)

- DW = Glass width
- TL = Track length
- GH = Glass height sliding door
- FPH = Fixed panel (sidelite) height
- TH = Total height
- CH = Clear opening height
- CW = Clear opening width
- FPW = Fixed panel (sidelite) width
- DT = Door (glass) thickness
- FPT = Fixed panel (glass) thickness
- Y = 3-15/16" (100) – 13/16" (20) – DT

Mounted to ceiling (CE-S)

Mounted in ceiling (CE-R)

Premium XL 120 Self-Closing (SC)

Typical assemblies mounted to or in ceiling with one sliding panel and fixed panels on both sides

Note: XL 120 SC includes DORMOTION standard in the closing cycle, optional (DMSC) for opening cycle.

Features and data

For installation with one sliding door panel and fixed panels on both sides, mounted to ceiling or in drop ceiling; for $5/16"$ – $9/16"$ (8 –13.5) thick glass.

Max weight of door panels

264 lb (120 kg)

Calculation of glass width

DW = CW + $2-3/8"$ (60)

	XL 120 SC
min DW	$33-1/2"$ (850)
max DW	57" (1448)

Mounted to ceiling (CE-S)

Mounted in ceiling (CE-R)

Calculation of glass height (CE-S/CE-R)

GH = TH - $1-7/8"$ (47)

FHP = CH + $1/8"$ (3)

max 118- $1/8"$ (3000)

- DW = Glass width
- TL = Track length
- GH = Glass height sliding door
- FPH = Fixed panel (sidelite) height
- TH = Total height
- CH = Clear opening height
- CW = Clear opening width
- FPW1 = Fixed panel (sidelite) width 1
- FPW2 = Fixed panel (sidelite) width 2
- DT = Door (glass) thickness
- FPT = Fixed panel (glass) thickness
- Y = $3-15/16"$ (100) - $13/16"$ (20) - DT

Premium XL 120 Self-Closing (SC)

Typical assemblies mounted to or in ceiling with two sliding panels with fixed panels on both sides

Note: XL 120 SC includes DORMOTION standard in the closing cycle, optional (DMSC) for opening cycle.

Features and data

For installation with two sliding door panels with fixed panels on each side, mounted to ceiling or in ceiling; for $5/16"$ – $9/16"$ (8–13.5) thick glass

Max weight of door panels

264 lb (120 kg)

Calculation of glass width

$DW = CW \div 2 + 1-1/16"$ (27)

	XL 120 SC
min 2P DW	$2 \times 33-1/2"$ (850)
max 2P DW	$2 \times 57"$ (1448)

Mounted to ceiling (CE-S)

Mounted in drop ceiling (CE-R)

Calculation of glass height (CE-S/CE-R)

$GH = TH - 1-7/8"$ (47)

$FPH = CH + 1/8"$ (3)

max $118-1/8"$ (3000)

- DW = Glass width
- TL = Track length
- GH = Glass height sliding door
- FPH = Fixed panel (sidelite) height
- TH = Total height
- CH = Clear opening height
- CW = Clear opening width
- FPW1 = Fixed panel (sidelite) width 1
- FPW2 = Fixed panel (sidelite) width 2
- DT = Door (glass) thickness
- FPT = Fixed panel (glass) thickness
- Y = $3-15/16"$ (100) – $13/16"$ (20) – DT

Premium XL 120 Self-Closing (SC)

Typical assemblies for wood doors

Features and data

For installations with wood doors; mounted to wall or ceiling; for 1-1/8" – 1-31/32" (28 – 50) thick wood doors

Max weight of door panels

264 lb (120 kg)

Calculation of door height

$DH = CH - 3/4" (18) + X$ (wall)

$DH = TH - 3-7/16" (87)$ (ceiling)

max 118-1/8" (3000)

Calculation of door width

$DW = CW + 2-3/8" (60)$

- DW** = Door width
- TL** = Track length
- TH** = Total height
- CH** = Clear opening height
- CW** = Clear opening width
- DH** = Door height
- DT** = Door (wood) thickness
- Y** = 3-15/16" (100) – 5/16" (7) – DT
- X** = Bottom of track channel to top of clear opening

Mounted to wall (W)

Mounted to or in ceiling (CE-S/CE-R)

	XL 120 SC
min DW	33-1/2" (850)
max DW	60" (1524)
max 2P DW	2 x 60" (1524)

Note: XL 120 SC includes DORMOTION standard in the closing cycle, optional (DMSC) for opening cycle.

Premium XL 120 Self-Closing (SC)

Typical assemblies mounted on glass with one sliding panel

Note: To ensure a correct and aligned mounting of the track rail, a full supporting fixed panel must be installed.

Note: XL 120 SC includes DORMOTION standard in the closing cycle, optional (DMSC) for opening cycle.

Features and data

For installation with one sliding panel mounted on glass;
for 5/16"–9/16" (8 –13.5) thick glass

Max weight of door panels

264 lb (120 kg)

Calculation of glass height

$$GH = CH + 7/8" (22)$$

max 118-1/8" (3000)

Calculation of glass width

$$DW = CW + 2-3/8" (60)$$

	XL 120 SC
min DW	33-1/2" (850)
min CW	31-1/8" (790)
max DW	57" (1448)
max CW	54-5/8" (1388)

Glass preparation

$$* DD = (CW - 4-3/16") \div T = _ _ "$$

$$DD = (CW - 106) \div T = _ _ \text{ mm}$$

Calculation example

$$DD = (35-7/16" - 4-3/16") \div 3 = 10-7/16"$$

$$DD = (900 - 106) \div 3 = 265$$

T = Formula Value
Z = Quantity of holes to drill

The total quantity of holes (Z) depends on clear opening width (CW) and determines the final drilling distance (DD).

	T	Z
CW ≥ 23-5/8" (600)	2	8
≤ 31-1/2" (800)		
CW > 31-1/2" (800)	3	10
≤ 39-3/8" (1000)		
CW > 39-3/8" (1000)	4	12
≤ 47-1/4" (1200)		
CW > 47-1/4" (1200)	5	14
≤ 54-5/8" (1388)		

- Use the equation to determine (DD) drilling distance (hole spacing) at defined (DD) locations.
- Provide (CW) clear opening width to determine value for (T).
- Insert value for (T) to formula equation to calculate (DD) drilling distance.

Premium XL 120 Self-Closing (SC)

Typical assemblies mounted on glass with two sliding panels

Note: XL 120 SC includes DORMOTION standard in the closing cycle, optional (DMSC) for opening cycle.

Features and data

For installation with two sliding panels mounted on glass; for 5/16"–9/16" (8 –13.5) thick glass

Max weight of door panels

264 lb (120 kg)

Calculation of glass height

$GH = CH + 7/8" (22)$

max 118-1/8" (3000)

Calculation of glass width

$DW = CW \div 2 + 1-1/16" (27)$

	XL 120 SC
min DW	33-1/2" (850)
min CW	64-13/16" (1646)
max DW	57" (1448)
max 2P DW	2 x 57" (1448)
max CW	111-7/8" (2842)

Refer to Elevation drawing on previous page.

	T	Z
$CW \geq 47-1/4" (1200)$	4	14
$CW \leq 59-1/16" (1500)$		
$CW > 59-1/16" (1500)$	6	18
$CW \leq 78-3/4" (2000)$		
$CW > 78-3/4" (2000)$	8	22
$CW \leq 111-7/8" (2842)$		

Calculation example

$DD = (55-1/8" - 4 \times 3/16" - 6-11/16") \div 4 = 11-1/16"$

$DD = (1400 - 106 - 170) \div 4 = 281$

T = Formula Value

Z = Quantity of holes to drill

The total quantity of holes (Z) depends on clear opening width (CW) and determines the final drilling distance (DD).

- Use the equation to determine (DD) drilling distance (hole spacing) at defined (DD) locations.
- Provide (CW) clear opening width to determine value for (T).
- Insert value for (T) to formula equation to calculate (DD) drilling distance.

- DW** = Glass width
- Z** = Quantity of drillings
- TL** = Track length
- DD** = Drilling distance
- TH** = Total height
- CH** = Clear opening height
- CW** = Clear opening width
- GH** = Door height
- FPW** = Fixed panel (glass) width
- T** = Formula value to determine DD
- DT** = Door (glass) thickness
- FPT** = Fixed panel (sidelite) thickness
- Y** = $3-15/16" (100) - 13/16" (20) - DT$

Premium XL 120 Self-Closing (SC)

Sliding door sets with one sliding panel and one or two fixed panels,

Incl. track/endcaps, cover, cover clips, gasket, end stops, roller carriers, DORMOTION, DM start/stops, floor guide, sidelite profile and gasket, sidelite filler profile, sidelite endcaps, U-Channel and gasket, and sidelite mounting hardware. (Sidelite view profile included if appropriate.)

Complete accessories for 5/16"–9/16" (8 –13.5) thick glass.
XL 120 DM max 264 lb (120 kg).

1P ceiling surface by 1FP – Set for ceiling surface installation with one sliding panel and one fixed panel.

	Min panel width	Min clear opening width	Max panel width ²	Max clear opening width ²	Max track length ²	Ref. No.

Note: Refer to Component parts section for wood door adapter options.

Premium XL 80 Telescopic (TEL)

Large clear openings; small space requirement

Quick and slow moving panels

Features

- Telescopic functionality
- Synchronized panels (simultaneous) movement of panel 1 (quick moving panel) and panel 2 (slow moving panel)—slow moving panel \leq half speed of panel 1
- DORMOTION functionality (optional)
- Status indicator (optional)

Hassle-free and uncomplicated ordering

- Quick (QMP) and slow (SMP) panels are clamped—no additional glass preparation required
- Easy glass preparation for mounting the moving floor guide

Many application choices

- Wall installation
- Ceiling installation
- Ceiling installation with sidelites and for closing against 90° jamb
- Installation to glass transom/sidelites
- Support for TLG (tempered laminated glass) due to Clamp & Glue technology
- Applicable for both glass and wood panels (wood panels require wood adapter set; see accessories section)
- Max 2 × 176 lb (80 kg) resp, 4 × 176 lb (80 kg)
- Support for glass thicknesses from 5/16"–9/16" (8–13.5)

Opening directions

Closing against 90° jamb

Premium XL 80 Telescopic (TEL)

Installing moving floor guide (requires glass preparation)

Standard fixed floor guide for guiding the slow moving panel

Moving floor guide for guiding the fast moving panel

Glass preparation for moving floor guide

Premium XL 80 Telescopic (TEL)

Wide openings with small panels

Unless indicated otherwise, all measurements are shown in inches (mm).

Panel width min.* — 23-5/8" (600)

** Glass sidelite

Premium XL 80 Telescopic (TEL)

Typical assemblies mounted to wall

Mounted to wall

1 OL recommended at 4-15/16" (125), which is 2-15/16" (75) from leading edge of QMP. This allows 1-3/16" (30) clearance on both sides of handle in addition to 1-3/16" (30) overlap on jamb side. Example is using 1-3/8" (35) handle thickness. Refer to AHJ (authority having jurisdiction) as requirements can vary.

2 CW can be jamb to jamb, equal to RW if flush pull is used. Using two equal width doors allows both panels to open flush with jamb.

- TL = Track length
- GH SMP = Glass height slow moving panel
- GH QMP = Glass height quick moving panel
- CH = Clear opening height
- RW = Rough opening width
- SMP = Slow moving panel
- QMP = Quick moving panel
- DT = Glass (door) thickness
- OL = Overlap for handle
- CW = Clear opening width
- DT1 = Door thickness (fast panel)
- DT2 = Door thickness (slow panel)

Features and data

For installation with two door panels mounted to wall. 5/16"–9/16" (8 –13.5) glass thickness. Optional DORMOTION unit.

Max weight of door panels

176 lb (80 kg)

Calculation of track length

2 panels:

$$TL = (1.5 \times RW - (OL / 2)) + 3 - 11/32" \text{ (85)}$$

Bi-parting 4 panels:

$$TL = 1.5 \times RW - OL + 2 - 5/8" \text{ (67)}$$

Calculation of glass width

2 panels:

$$SMP = (RW - OL + 3 - 17/32" [90]) / 2$$

$$QMP = SMP + OL$$

Bi-parting 4 panels:

$$SMP = (RW - (2 \times OL) + 4 - 1/2" [114]) / 4$$

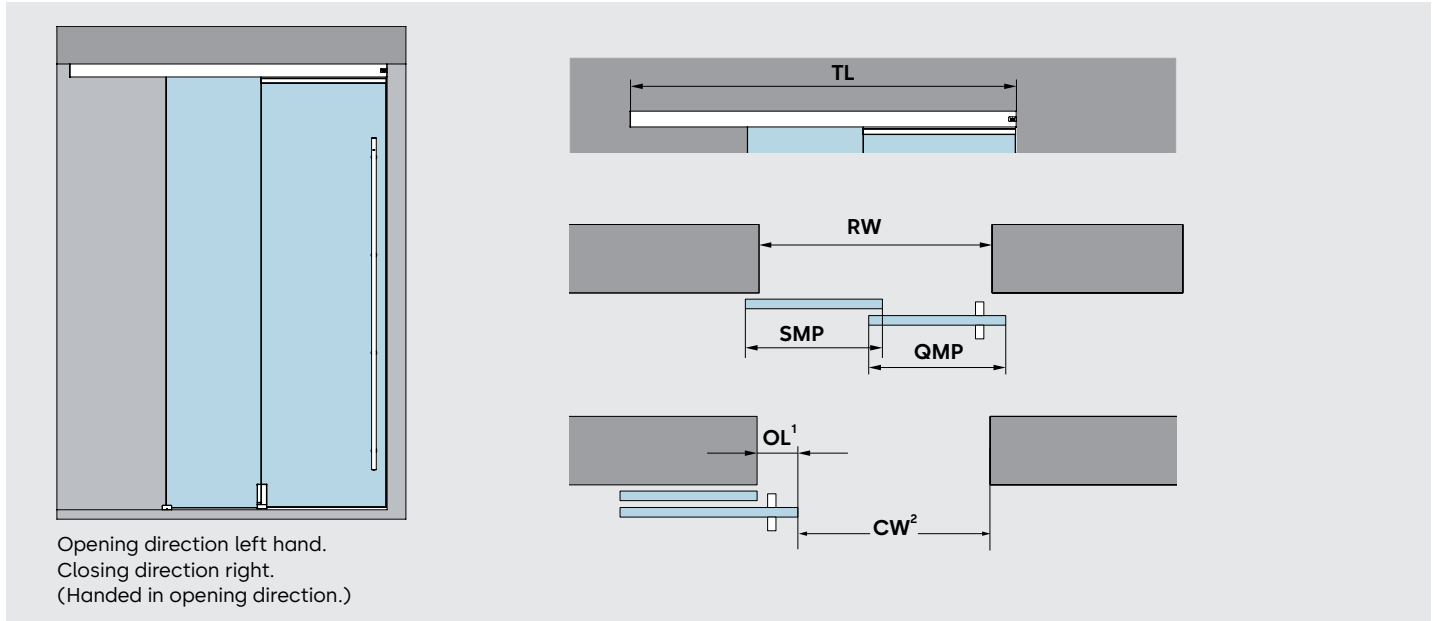

Calculation of glass height

$$GH \text{ SMP} = CH + 23/32" \text{ (18)}$$

$$GH \text{ QMP} = CH - 1 - 1/16" \text{ (27)}$$

Premium XL 80 Telescopic (TEL)

Typical assemblies mounted to ceiling

Mounted to ceiling

1 OL recommended at 4-15/16" (125), which is 2-15/16" (75) from leading edge of QMP. This allows 1-3/16" (30) clearance on both sides of handle in addition to 1-3/16" (30) overlap on jamb side. Example is using 1-3/8" (35) handle thickness. Refer to AHJ (authority having jurisdiction) as requirements can vary.

2 CW can be jamb to jamb, equal to RW if flush pull is used. Using two equal width doors allows both panels to open flush with jamb.

- TL = Track length
- GH SMP = Glass height slow moving panel
- GH QMP = Glass height quick moving panel
- CH = Clear opening height
- RW = Rough opening width

- QMP = Quick moving panel
- DT = Glass (door) thickness
- OL = Overlap for handle
- CW = Clear opening width
- DT1 = Door thickness (fast panel)
- DT2 = Door thickness (slow panel)

Features and data

For installation with two door panels mounted at ceiling.
5/16"–9/16" (8–13.5) glass thickness.
Optional DORMOTION unit.

Max weight of door panels

176 lb (80 kg)

Calculation of track length

2 panels:

$$TL = (1.5 \times RW - (OL/2)) + 3-11/32" (85)$$

Bi-parting 4 panels:

$$TL = 1.5 \times RW - OL + 2-5/8" (67)$$

Calculation of glass width

2 panels:

$$SMP = (RW - OL + 3-17/32" [90]) / 2$$

$$QMP = SMP + OL$$

Bi-parting 4 panels:

$$SMP = (RW - (2 \times OL) + 4-1/2" [114]) / 4$$

$$QMP = SMP + OL$$

Calculation of glass height

$$GH \text{ SMP} = CH + 23/32" (18)$$

$$GH \text{ QMP} = CH - 1-1/16" (27)$$

Premium XL 80 Telescopic (TEL)

Typical assemblies with sidelite on one side

With sidelite

1 OL recommended at 4-15/16" (125), which is 2-15/16" (75) from leading edge of QMP. This allows 1-3/16" (30) clearance on both sides of handle in addition to 1-3/16" (30) overlap on jamb side. Example is using 1-3/8" (35) handle thickness. Refer to AHJ (authority having jurisdiction) as requirements can vary.

- TL = Track length
- GH SMP = Glass height slow moving panel
- GH QMP = Glass height quick moving panel
- CH = Clear opening height
- RW = Rough opening width
- SMP = Slow moving panel
- QMP = Quick moving panel
- FP = Fixed panel sidelite
- DT = Glass (door) thickness
- OL = Overlap for handle
- CW = Clear opening width
- PCW = Clear opening passage width (SMP)
- DT1 = Door thickness (fast panel)
- DT2 = Door thickness (slow panel)
- GT1 = Glass thickness (fixed panel sidelite)

2 CW can be jamb to jamb, equal to RW if flush pull is used. Using two equal width doors allows both panels to open flush with jamb.

Features and data

For installation with two door panels mounted at ceiling.
5/16"–9/16" (8–13.5) glass thickness.
Optional DORMOTION unit.

Max weight of door panels

176 lb (80 kg)
For min and max panel sizes, see page 38.

Calculation of track length

$TL = RW - 5/32" (4)$
 $TL = RW$ (without end caps)

Calculation of glass width 2 panels:

$SMP = (RW - OL + 2" [51]) / 3$
 $QMP = SMP + OL$

Bi-parting 4 panels:

$SMP = (RW - (2 \times OL) + 4 (102)) / 6$
 $QMP = SMP + OL$

Calculation of glass height

$GH SMP = CH + 23/32" (18)$
 $GH QMP = CH - 1-1/16" (27)$

Sidelite calculations 2 panels:

$FP = (RW - OL + 2-9/16" [66]) / 3$
 $PCW = RW - FP$

Bi-parting 4 panels:

$FP = RW - (2 \times OL) + 5-3/16" (132) / 6$
 $PCW = RW - (2 \times FP)$

Premium XL 80 Telescopic (TEL)

Typical assemblies mounted to glass

Mounted to glass

1 OL recommended at 4-15/16" (125), which is 2-15/16" (75) from leading edge of QMP. This allows 1-3/16" (30) clearance on both sides of handle in addition to 1-3/16" (30) overlap on jamb side. 2 CW can be jamb to jamb, equal to RW if flush pull is used. Using two equal width doors allows both panels to open flush with jamb.

Features and data

For installation with two door panels mounted to glass.

5/16"–9/16" (8–13.5) glass thickness.

Optional DORMOTION unit.

Max weight of door panels

176 lb (80 kg)

For min and max panel sizes, see page 36.

Calculation of track length 2 panels:

$$TL = (1.5 \times PCW - (OL/2)) + 5-5/16" (135)$$

Bi-parting 4 panels:

$$TL = (1.5 \times PCW) - OL + 2-5/8" (67)$$

Calculation of glass width 2 panels:

$$SMP = (PCW - OL + 3-17/32" (90)) / 2$$

$$QMP = SMP + OL$$

Bi-parting 4 panels:

$$SMP = (PCW - (2 \times OL) + 4-1/2" (114)) / 4$$

$$QMP = SMP + OL$$

Calculation of glass height

$$GH\ SMP = CH + 23/32" (18)$$

$$GH\ QMP = CH - 1-1/16" (27)$$

Premium XL 80 Telescopic (TEL)

Typical assemblies for wood panels

Features and data

For installation with two wood doors mounted to wall or ceiling, for 1-1/8" to 1-31/32" (29 to 50) door thicknesses.

Optional DORMOTION unit.

Max weight of door panels

176 lb (80 kg)

For min and max panel sizes, see page 36.

Calculation of track length

Refer to glass calculations on previous pages.

Calculation of panel width

Refer to glass calculations on previous pages.

Calculation of glass height

DH SMP = CH + 23/32" (18)

DH QMP = CH - 1-1/16" (27)

Mounted to wall

CH = Clear opening height
DH SMP = Door height slow moving panel
DH QMP = Door height quick moving panel

Premium XL 80 Telescopic (TEL)

Glass door sets with moving floor guide — Mounted to wall

Premium XL 80 (TEL) Telescopic

Ref. No. 836.701

Set 1

For wall installation, with moving floor guide, 2 panels (left hand) Incl. track profile, cover profile and brushes

Complete accessories for
5/16"–9/16" (8-13.5) glass thickness,
max 176 lb (80 kg)

Prepared for option DM (DORMOTION)

Set 1.1

For closing against 90° jamb

Ref. No. 836.737

Premium XL 80 (TEL) Telescopic

Ref. No. 836.702

Set 2

For wall installation, with moving floor guide, 2 panels (right hand) Incl. track profile, cover profile and brushes

Complete accessories for
5/16"–9/16" (8-13.5) glass thickness,
max 176 lb (80 kg)

Prepared for option DM (DORMOTION)

Set 2.1

For closing against 90° jamb

Ref. No. 836.738

Premium XL 80 (TEL) Telescopic

Ref. No. 836.709

Set 3

For wall installation, with moving floor guide,
4 panels (2 left hand/2 right hand)
Incl. track profile, cover profile and brushes

Complete accessories for
5/16"–9/16" (8-13.5) glass thickness, max 176 lb (80 kg)

Prepared for option DM (DORMOTION)

Premium XL 80 Telescopic (TEL)

Glass door sets with moving floor guide

— Mounted to ceiling

Premium XL 80 (TEL) Telescopic **Ref. No. 836.703**

Set 4

For ceiling installation, with moving floor guide, 2 panels (left hand) Incl. track profile, cover profile and brushes

Complete accessories for 5/16"–9/16" (8-13.5) glass thickness, max 176 lb (80 kg)

Prepared for option DM (DORMOTION)

Set 4.1

For closing against 90° jamb

Ref. No. 836.739

Premium XL 80 (TEL) Telescopic **Ref. No. 836.704**

Set 5

For ceiling by fixed panel sidelite installation, with moving floor guide, 2 panels (left hand) Incl. track profile, cover profile and brushes

Complete accessories for 5/16"–9/16" (8-13.5) glass thickness, max 176 lb (80 kg)

Prepared for option DM (DORMOTION)

Premium XL 80 (TEL) Telescopic **Ref. No. 836.710**

Set 6

For ceiling installation, with moving floor guide, 4 panels (2 left hand/2 right hand) Incl. track profile, cover profile and brushes

Complete accessories for 5/16"–9/16" (8-13.5) glass thickness, max 176 lb (80 kg)

Prepared for option DM (DORMOTION)

Premium XL 80 Telescopic (TEL)

Glass door sets with moving floor guide

— Mounted to ceiling

Premium XL 80 (TEL) Telescopic **Ref. No. 836.705**

Set 7

For ceiling installation, with moving floor guide, 2 panels (right hand)

Incl. track profile, cover profile and brushes

Complete accessories for 5/16"–9/16" (8-13.5) glass thickness, max 176 lb (80 kg)

Prepared for option DM (DORMOTION)

Set 7.1

For closing against 90° jamb

Ref. No. 836.740

Premium XL 80 (TEL) Telescopic **Ref. No. 836.706**

Set 8

for ceiling installation, with moving floor guide, 2 panels (right hand) with one fixed panel sidelite

Incl. track profile, cover profile and brushes

Complete accessories for 5/16"–9/16" (8-13.5) glass thickness, max 176 lb (80 kg)

Prepared for option DM (DORMOTION)

Premium XL 80 (TEL) Telescopic **Ref. No. 836.711**

Set 9

For ceiling installation, with moving floor guide, 4 panels (2 left hand/2 right hand) and one fixed panel sidelite per side

Incl. track profile, cover profile and brushes

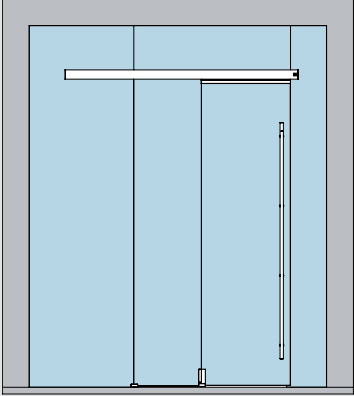

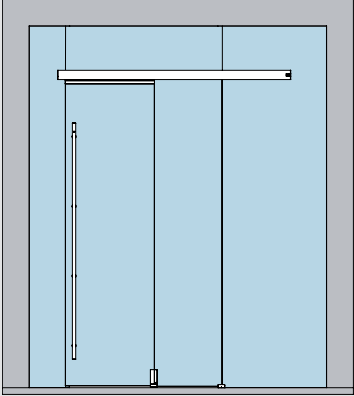

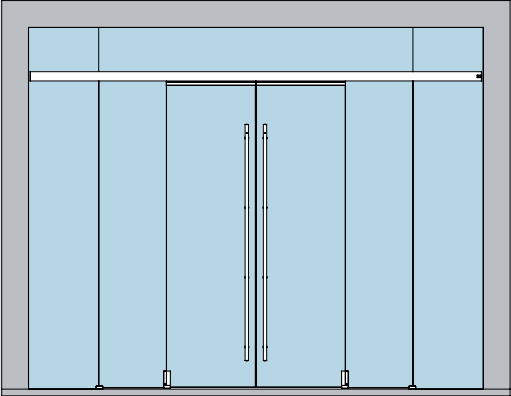

Complete accessories for 5/16"–9/16" (8-13.5) glass thickness, max 176 lb (80 kg)

Prepared for option DM (DORMOTION)

max DW	60" (1524)
max DW	2 60" (1524)
	L 80
min DW	26" (660)
max DW	60" (1524)
max DW	2 60" (1524)

Comfort L 80 DORMOTION (DM) / L 80

Typical assemblies mounted on glass with one sliding panel

Note: To ensure a correct and aligned mounting of the track rail, a full supporting fixed panel must be installed.

Features and data

For installation with one sliding panel mounted on glass; for 5/16" – 9/16" (8 – 13.5) thick glass

Max weight of door panels

176 lb (80 kg)

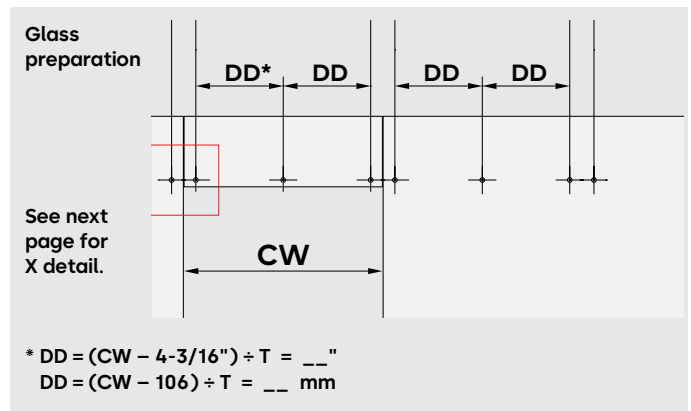

Calculation of glass height

$GH = TH - 1-9/16" (40)$
max 118-1/8" (3000)

Calculation of glass width

$DW = CW + 2-3/8" (60)$

	L 80 DM	L 80
min DW	26" (660)	26" (660)
min CW	23" (600)	23-5/8" (600)
max DW	57" (1448)	57" (1448)
max CW	54-5/8" (1388)	54-5/8" (1388)

Calculation example

$DD = (27-9/16" - 4-3/16") \div 2 = 11-11/16"$

$DD = (700 - 106) \div 2 = 297$

T = Formula Value

Z = Quantity of holes to drill

The total quantity of holes (Z) depends on clear opening width (CW) and determines the final drilling distance (DD).

	T	Z
$CW \geq 23-5/8" (600)$	2	8
$\leq 31-1/2" (800)$		
$CW > 31-1/2" (800)$	3	10
$\leq 39-3/8" (1000)$		
$CW > 39-3/8" (1000)$	4	12
$\leq 47-1/4" (1200)$		
$CW > 47-1/4" (1200)$	5	14
$\leq 54-5/8" (1388)$		

- Use the equation to determine (DD) drilling distance (hole spacing) at defined (DD) locations.
- Provide (CW) clear opening width to determine value for (T).
- Insert value for (T) to formula equation to calculate (DD) drilling distance.

Comfort L 80 DORMOTION (DM) / L 80

Sliding door sets with one sliding panel and one or two fixed panels, ceiling surface installation

Incl. track/endcaps, cover, cover clips, gasket, end stops, roller carriers, DORMOTION¹, DM start/stops¹, floor guide, sidelite profile and gasket, sidelite filler profile, sidelite endcaps, U-Channel and gasket, and sidelite mounting hardware. (Sidelite view profile included if appropriate.)

Complete accessories for 5/16"– 9/16" (8 – 13.5) thick glass.
L 80 DM / L 80 max 176 lb (80 kg).

¹ L 80 set does not include DORMOTION or DM start/stops.

	<p>Premium/Comfort vertical brush seal</p> <p>For gaps >5/8"-3/4" (>16-19) ; grey</p> <p>Specify length (by ft.)</p> <p>Ref. No. 836.861</p>		<p>Premium/Comfort vertical brush seal</p> <p>For gaps >3/8"-29/32" (>19-23) ; grey</p> <p>Specify length (by ft.)</p> <p>Ref. No. 836.862</p>
	<p>Premium/Comfort vertical brush seal</p> <p>For gaps >29/32"-1-1/16" (>23-27) ; grey</p> <p>Specify length (by ft.)</p> <p>Ref. No. 836.863</p>		

Component parts

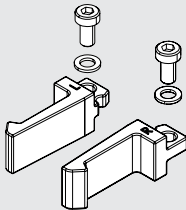

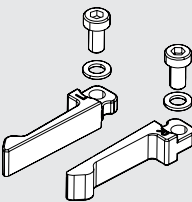

Endstops

	<p>Premium XL 150/120/80 endstops</p> <p>Endstop set, 2 pieces, for use with XL 150 DM, XL 150, XL 120 SC, XL 80 DM</p> <p>Ref. No. 836.465</p>		<p>Comfort L 80 endstop set</p> <p>Endcap set 2 pieces for use with L 80 DM or L 80</p> <p>Ref. No. 836.267</p>
---	---	--	---

Bumper sets

	<p>Premium XL 150/120/80 bumper set</p> <p>Set of 2 bumpers; used in endstops for XL 150/120/80</p> <p>Ref. No. 836.466</p>		<p>Comfort L 80 bumper set</p> <p>Set of 2 bumpers; used in endstops for L 80 DM or L 80</p> <p>Ref. No. 836.268</p>
---	---	--	--

Holder hook sets

	<p>Premium XL 150 hook set</p> <p>Hook set, 2 pieces, for use with XL 150; attaches to roller carrier (Not compatible with XL 150 DM or XL 80 DM)</p> <p>Ref. No. 836.467</p>		<p>Comfort L 80 hook set</p> <p>Hook set, 2 pieces, for use with L 80 (not compatible with DM)</p> <p>Ref. No. 836.269</p>
---	---	--	--

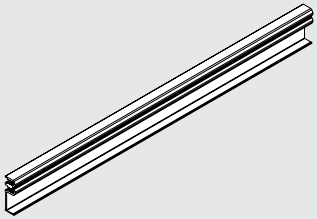

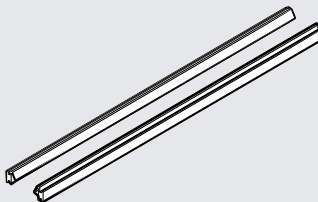

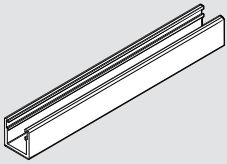

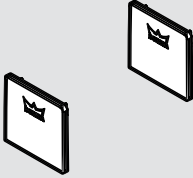

Component parts

Sidelite (fixed panel) extrusions and accessories

	<p>Premium XL sidelite profile</p> <p>Sidelite profile (2-3/4" [69] high) for sidelite connection at top. Complete with all gaskets For use with XL 150 DM, XL 150, XL 120 SC, XL 80 DM</p> <p>Fixed length 157-1/2" (4000) Ref. No. 936.469</p> <p>Specify length (by ft.) Ref. No. 836.474</p>		<p>Comfort sidelite view protection profile</p> <p>Use sidelite profile with XL or L systems 2-5/16" + 2-3/4" (58 + 69) high</p> <p>Fixed length 157-1/2" (4000) Ref. No. 936.800</p> <p>Specify length (by ft.) Ref. No. 836.801</p>
	<p>Comfort sidelite filling profile</p> <p>For use with XL or L sidelite profile</p> <p>2-5/16" + 2-3/4" (58 + 69) high</p> <p>Fixed length 157-1/2" (4000) Ref. No. 936.802</p> <p>Specify length (by ft.) Ref. No. 836.803</p>		<p>Comfort L 80 sidelite profile</p> <p>Sidelite profile for sidelite connection at top for use with L 80 DM and L 80, 2-5/16" (58) high, complete with all gaskets; for 5/16" - 9/16" (8 - 13.5) thick glass.</p> <p>Fixed length 157-1/2" (4000) Ref. No. 936.272</p> <p>Specify length (by ft.) Ref. No. 836.274</p>
	<p>View profile clip</p> <p>For use with view profile extrusion for Sidelite application</p> <p>Ref. No. 836.891</p>		
	<p>Premium XL sidelite endcaps</p> <p>Set endcaps for sidelite profile for use with all XL systems</p> <p>2-3/4" (69) high Ref. No. 836.471</p>		<p>Comfort L 80 sidelite endcaps</p> <p>Set endcaps for sidelite profile</p> <p>2-5/16" (58) high Ref. No. 836.273</p>

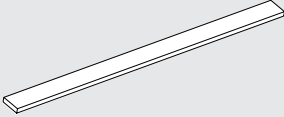

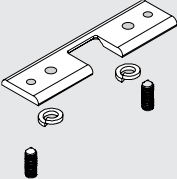

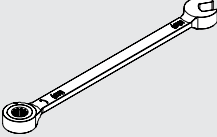

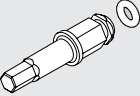

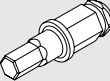

Component parts

Sidelite (fixed panel) extrusions and accessories

	<p>Comfort 150/120/80 drop ceiling connector profile</p> <p>Incl. extrusion and fasteners</p> <p>Fixed length 157-1/2" (4000) Ref. No. 836.821</p> <p>Specify length (by ft.) Ref. No. 836.820</p>		<p>U-Channel gaskets</p> <p>Gasket for 1/2" (12–13.5) thick glass</p> <p>Specify length (by ft.) Ref. No. 925.147</p> <p>Gasket for 3/8" (10) thick glass</p> <p>Specify length (by ft.) Ref. No. 925.148</p>
	<p>Dri-Fit® pre-drilled U-Channel</p> <p>Connecting profile for fixed panel (sidelite) fixing</p> <p>Profile for 3/8" – 1/2" (10 - 13) thick glass</p> <p>Specify length (by ft.) Ref. No. 925.447</p>		<p>U-Channel endcaps</p> <p>Set endcaps for Ref. No. 925.447</p> <p>Ref. No. 925.121</p>
	<p>Sidelite profile gasket</p> <p>5/16"–3/8" (8–10) thick glass; black</p> <p>Ref. No. 836.195</p>		<p>Sidelite profile gasket</p> <p>3/8"–1/2" (10–13) thick glass; black</p> <p>Ref. No. 836.196</p>
	<p>Sidelite profile gasket</p> <p>1/2"–17/32" (13–13.5) thick glass; black</p> <p>Ref. No. 836.197</p>		

Component parts

Recessed mount (CE-R) accessories

	<p>Foam, adhesive back 3/16" (5) vinyl Supplied optional for CE-R units, 50 ft. Roll Grey Ref. No. 933.915</p>		<p>XL Premium recessed cover clip Ref. No. 936.145</p>
	<p>XL Premium recessed start/stop service plate Ref. No. 936.561</p>		<p>Wrench, 6MM ratcheting / combo Use with Ref. No. 936.898 and Ref. No. 936.899 hex bit in CE-R units Ref. No. 936.897</p>
	<p>M4 Long hex bit Recessed mount service item Ref. No. 936.898</p>		<p>M4 Short hex bit Recessed mount service item Ref. No. 936.899</p>

Status indicator

	<p>MUTO status indicator Status indicator set, complete with accessories (sensor, cable, etc.) Ref. No. 836.840</p>

Our Sustainability Commitment

We are committed to fostering sustainable development along our entire value chain in line with our economic, environmental and social responsibilities toward current and future generations.

Sustainability at product level is an important, future-oriented approach in the field of construction. In order to give quantified disclosures of a product's environmental impacts through its entire life cycle, dormakaba provides Environmental Product Declarations (EPDs), in which the results of the life cycle assessment (LCA) are presented.

The full EPD is available for download at

<https://www.dormakabagroup.com/en/sustainability/product-declarations>.
