

# IP9 Restricted Key System

## Security where it counts

### Advantages at a glance

- Designed registered until 2034.
- Multi-profiles.
- Large key head, for ease of use for the elderly or disabled.
- 6 different colour inserts.
- The IP9 range can be construction keyed, master keyed, keyed to differ or keyed alike.
- Suitable for commercial and residential.
- All IP9 components meet the highest standards.

dormakaba IP9 six pin in-line multi-profile key system offers the end user a design registered system that can be master keyed, keyed alike, keyed to differ or construction keyed.

Our IP9 system offers reliability, effective key control management and security for your home or business.

IP9 systems can be either factory or dealer built. Factory built systems are transferable to an authorised dealer.

#### Design Registered Keyway

The IP9 key system is designed Registered until 2034.

#### Space and depth

Standard C4 space and depth.

#### Embossed keys

All IP9 dealers will have their company details embossed onto the key. Existing IP6, IP7 & IP8 dealers can utilise their existing dies.

#### Additional cut keys

Additional keys can only be cut by an authorised dealer. Correct authorisation must be provided by the end user.

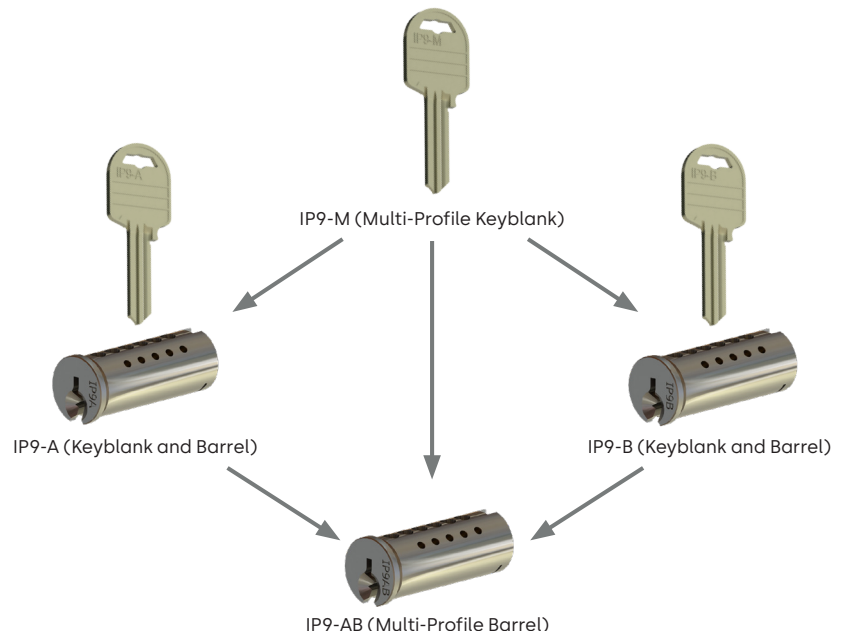

#### Pick Resistant

Our intricate profile design makes it resilient against lock picking attacks.

#### Multi-profiles

IP9 offers a multi-profile key system allowing for greater expansion capabilities.

Our multi-profile consists of one multi master key IP9-M, two main profiles IP9-A and IP9-B and a maisoned barrel IP9-AB.

#### Anti bump

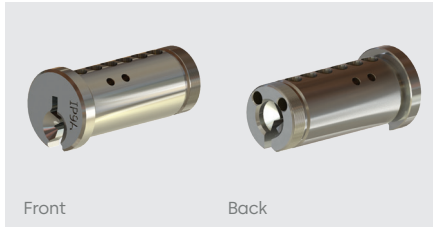

Mushroom security pins are supplied as a standard, in our C4 cylinder range.

For additional security – anti bump pins are available.

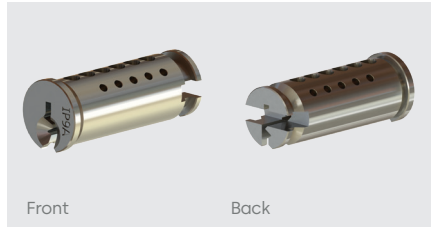

#### Construction drilled

Each plug type is pre-drilled with construction holes for your convenience.
