

# Push pull plate

## General hardware

# Our dormakaba team

dormakaba has a skilled team of specification writers ready to discuss your project in detail. Offering a free, no-obligation hardware scheduling service. This ensures that budget and compliance considerations are always taken into account.

# Effortless and efficient...

dormkaba's push and pull entrance handles are made from 2mm thick, 304 grade stainless steel. They are suitable for installation on both timber and aluminium doors making them the ideal choice for commercial, industrial, and residential applications.

They are available in two sizes and have a cylinder hole option for the 100mm widths. Cylinder holes can be in either oval cylinder or round nightlatch cylinder cut outs.

The 316 grade stainless steel D-Pull is available in either a 150mm or 200mm depending on the plate configuration.

These pull plates comply with AS1428.1 which requires hand clearance of between 35mm and 45mm from the plate face to the underside of the handle.

## **Features:**

- 316-grade stainless steel
- 304-grade stainless steel
- 2mm thick plate
- Concealed and visible fix
- Welded Lugs for concealed fixing
- AS1428.1 compliant
  - accessibility standards

## **Sizes available**

- 300mm x 75mm
- 300mm x 100mm

# 3075 series

## Push and pull plate furniture

Concealed and visible fix stainless steel push and pull plates for fixing back to back through the door.

### Applications

Schools, hospitals, kitchen facilities, toilet airlock entries, pivot doors, cupboards and other commercial applications.

### Features

Stainless steel plates 2mm in thickness with 15mm radius corners eliminating sharp corners often associated with square cornered plates.

### Door Thickness

Screws suit door thickness up to 60mm as standard. Plates requiring extended fixing screws are available on application. Pull handles supplied on their own are suitable for door thickness to 50mm

### Plate Size

300 x 75mm x 2mm

### Pull Handle Size

150mm centres x 16mm diameter

200mm centres x 16mm diameter

Pull handles can be ordered separately and supplied with fixing bolts for doors up to 50mm thick

### Finish

Satin stainless steel

# D-Pull handles

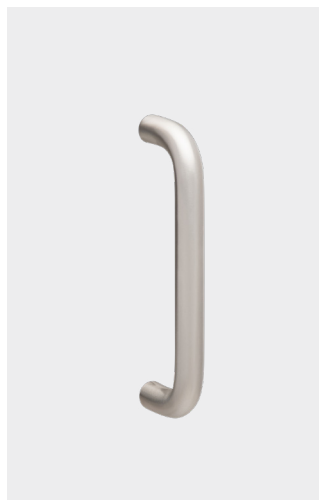

## 316 grade stainless steel

dormakaba D-Pulls are constructed from 316 grade stainless steel.

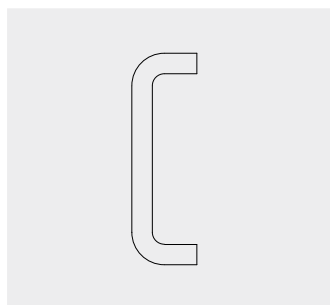

The 16mm diameter handle is the perfect measurement for use on utility cupboards, commercial toilet door airlocks and many other applications.

Complying with AS1428.1 which requires hand clearance of between 35mm and 45mm.

D-Pulls are supplied with two M5 x 60mm fixing screws and are available in two lengths being 150mm and 200mm.

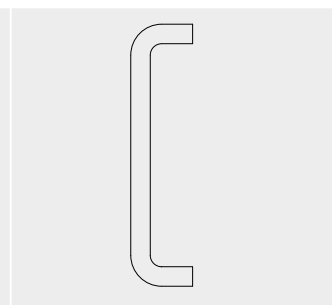

**D-Pull**

## Our Sustainability Commitment

Our sustainability commitment We are committed to fostering a sustainable development along our entire value chain in line with our economic, environmental and social responsibilities toward current and future generations. We seek an open, transparent dialogue with all stakeholders to define strategies and actions based on clear targets and continuous improvement, and we actively report on our progress.
