

Seamless. Secure. Convenient.

Access. With just an iPhone or Apple Watch.

As a leading supplier of electronic locks for hotels, dormakaba understands the need for an efficient, secure hotel operation. Now, you can elevate your guest experience like never before with dormakaba's innovative technology and room key in Apple Wallet.

With dormakaba, hotels can:

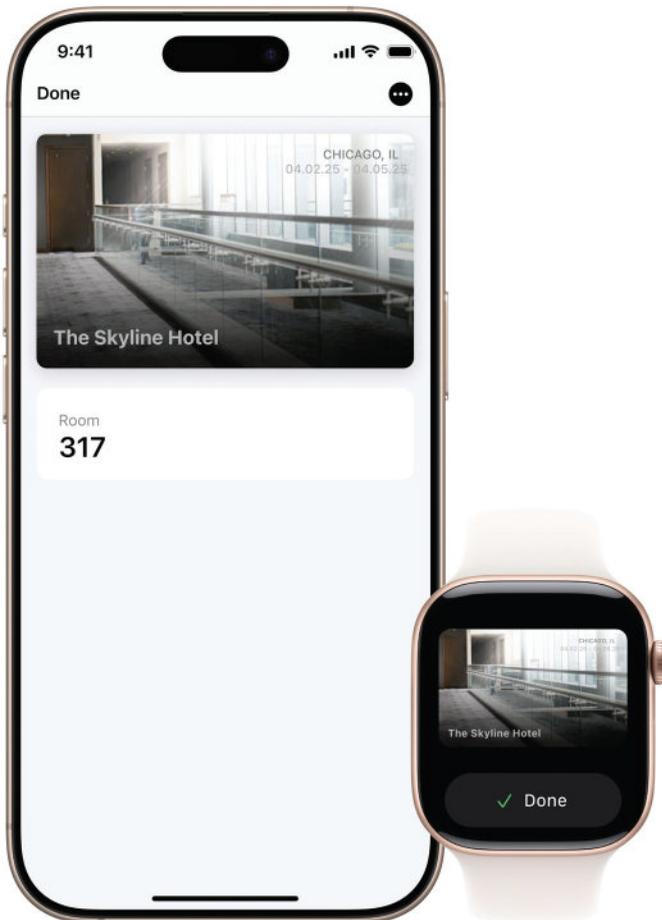

- Provide a seamless experience for guests
- Free up time for staff to focus on important hotel tasks
- Give your property an extra layer of security and convenience
- Reduce the use of plastic keys

dormakaba makes it easier to accommodate guests while they enjoy seamless access to all your hotel has to offer — and when your staff has more time to focus on guests, they will take notice.

Room keys in Apple Wallet on iPhone and Apple Watch also seamlessly integrate into dormakaba's access control systems and are easily managed by your internal staff. So getting started is quick and efficient.

The next evolution of the key is here — room key in Apple Wallet.

Your iPhone and Apple Watch are now your room key

NFC technology

Guests can access places quickly and safely, all without opening any additional apps.

Express Mode

Guests don't even need to wake or unlock their iPhone or Apple Watch to access their rooms and amenities.

Power Reserve

If a guest's iPhone needs a charge, their room key in Apple Wallet will still work for up to five hours.

Privacy and security

Protect your keys with the security of iPhone and Apple Watch. Guests can use the Find My app to lock and help locate their device if misplaced.

Share your keys

Guests can securely share room keys, customize controls for recipients, update permissions or revoke key access.

Room keys. Now with less key.

With room key in Apple Wallet, guests can skip the lobby and access their room without a physical key. That's one less thing to carry. When your guests have seamless access to all your hotel has to offer right from their iPhone or Apple Watch, your staff can focus on what matters most.

Before your guests arrive at your hotel, they open your hotel app to add their room key to Apple Wallet on their iPhone or Apple Watch. Once they complete the check-in process in the app, their room key will be activated and ready to go.

With room key in Apple Wallet, guests can easily access hotel spaces with just their iPhone or Apple Watch — from their hotel room to fitness areas and other common spaces. All guests need to do is hold their iPhone or Apple Watch near the reader to unlock. It's easy, convenient, and private.
