

# dormakaba resivo residential Extension with the myRENZbox

## Common RFID media for both access and letter and parcel boxes with resivo residential and myRENZbox

Combining the dormakaba resivo residential access solution for apartment buildings with myRENZbox for letters and parcels makes it possible to easily operate all locks in a property using just one RFID medium (key fob or key card).

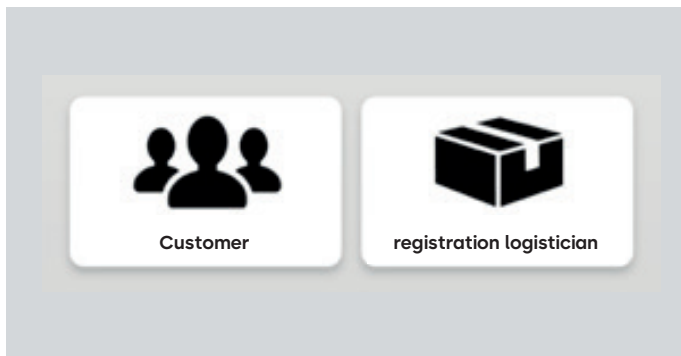

Replacing all the mechanical keys of a property simplifies key management for both administrators and tenants and enhances comfort and flexibility. Security is also increased, as access permissions can easily be removed from lost or stolen media.

Additionally, residents can store the Unique Identification Codes (UIDs) of their dormakaba RFID media using the NFC self-service functionality to log on to the RENZ letter and parcel box system.

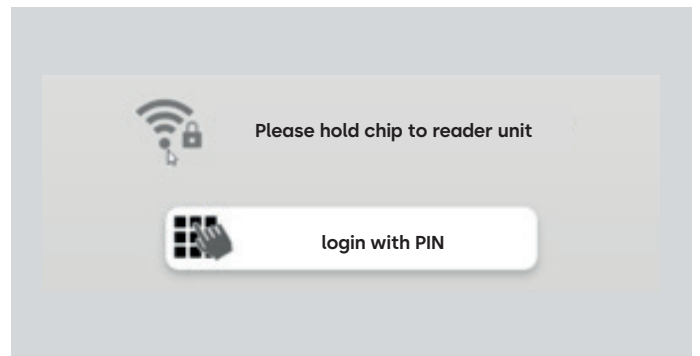

# NFC self-service

Residents can read the media directly into the package and letter box system. To do so, the process must first be enabled by RENZ. A written request to RENZ from the owner/facility operator is necessary for activation.

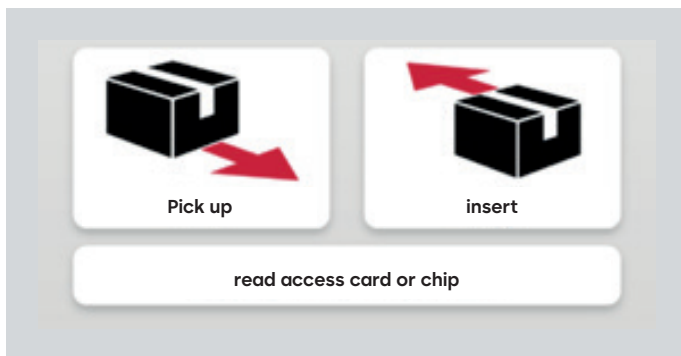

If the owner/facility operator has initiated the activation, the media can be registered as described below:

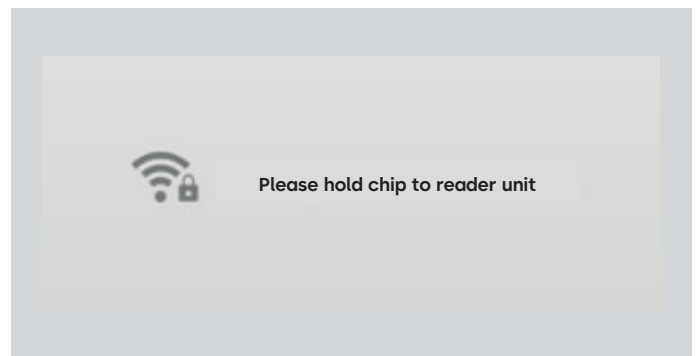

1. Click on the „Customer“ or „Resident“ button

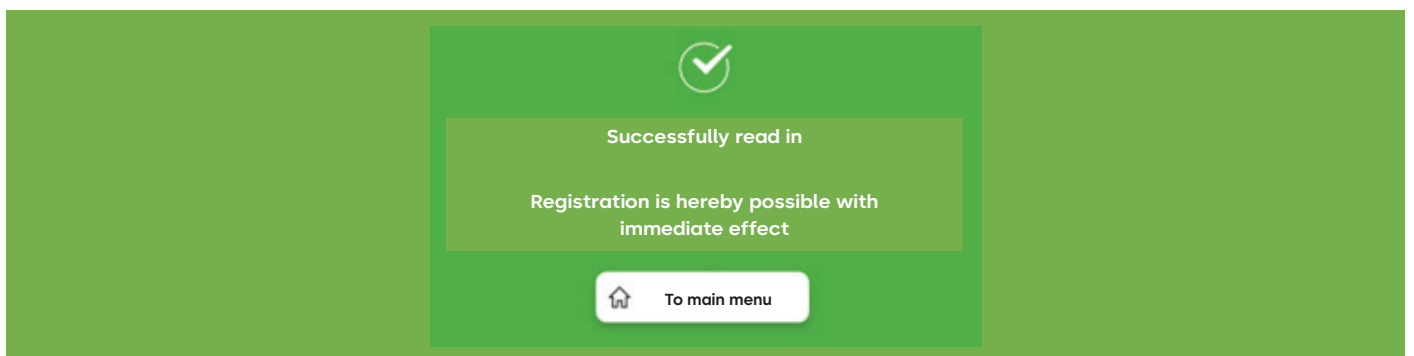

2. Log in using your PIN

3. Select the menu option „Read in access card or chip“

4. Hold the medium up to the RFID reader unit

5. The medium has been successfully read in and can be used straight away.

# Convincing reasons: resivo residential – the ideal access management system for properties and tenants

## More efficient processes

No need for physical key hand-off during a tenant change.

## Simple operation

Access control via an intuitive app for building administrators and tenants.

## Tangible cost savings

Lean digital processes, no longer necessary to replace cylinders after losing a key.

## Increased earnings

Smart features reduce vacancy rates and generate added value.

## Satisfied tenants

Tenants decide for themselves who should have access to their premises and when.

## Individual planning

New and existing properties can be outfitted and updated as required.

### How resivo residential opens the door to a world of benefits.

resivo residential by dormakaba is a future-oriented, cloud-based access management system. It offers property administrators, building owners, and tenants significant advantages compared to conventional mechanical locking systems. No more worrying about lost or stolen keys. Flat hand-offs are easier and more

convenient for the tenant. resivo residential saves time by simplifying the procedures for granting access to suppliers, service providers, and craftspeople. Tenants themselves decide who should have access to their flat and when – also remotely. resivo residential unlocks a whole new dimension of building utilization packed with advantages.
