

Argus HSB E11 single flap

Half height sensor barrier

Minimal installation length and a simple sensor system monitors the passage area by offering single passage in both directions.

Standard units	HSB E11 single flap
Interlock height	1000mm
Interlock length	1290mm
Passage width	580mm (Normal Lane)
Total width	1000mm (Normal Lane)
Housing, base columns, guiding elements	AISI 304, Ø60mm stainless steel tube with 10mm toughened safety glass panel and AISI 304 stainless steel handrail with integrated sensor system.
Number of sensors	10 pair of high precision IR sensors.
Pictogram	LED illumination on side of the wings.
Throughput	30 persons per minute
Barrier elements	Single door leaves made of transparent polycarbonate, upper edge 900mm Swinging area monitored by separation sensors.
Security	Passage area monitored by simple sensor system with our shortest installation length (simple level of single passage monitoring in both directions).
Finish	Stainless steel semi gloss smooth and flush finish.
Safety	Low energy drive with energy content less than 1.6 joules.
Function	Type 2–power assisted motion; one servo-positioning drives / electrically controlled in both directions.
Drives	Integrated in the swing tube.
Operating modes	Optical. Normally closed. Normally opened. (Barriers close on tailgate event)
Electrical equipment	Control system and power supply integrated in the unit.
Power supply	100 - 240 VAC, 50/60 Hz
Standby power consumption	17 VA
MCBF (mean cycles between failures)	10 million cycles
Duty cycles	100%
Standard adjustment in case of power failure	Door leaves move freely.
Installation	Dowelled on finished floor level, FFL.
Protection classes	IP43
Certificate	CE, CII Green Product Control drive unit MTTF is 127 years (Limit of Energy), 138 years (Position Monitoring).
