

EasyAssist

The door assistant that makes life easier

Smart assistance

The door assistant/low-energy operator EasyAssist is your smart solution for making entrances more accessible, convenient, and hygienic – with less cost and time from planning to installation. And with its compact, clean design, EasyAssist fits perfectly anywhere.

Ideal for:

- Corporate offices
- Medical office buildings
- Hotels
- Retail stores
- Schools
- Multi residential

Easy planning

- Compact and elegant design that fits in perfectly everywhere
- All mounting positions possible for a consistent look on every door
- Compatible with a wide range of dormakaba push buttons and touch-free actuators

Easy installation

- Lightweight, compact design for optimized storing, transportation, and handling
- Use of existing door closer hole patterns for easy upgrade from a surface closer
- Connectivity to the mobile app for easy commissioning and adjustment
- Getting EasyAssist up and running is a breeze, saving time and effort
- Low energy operating mode for usage without safety sensors in many applications

Easy operation

- PowerAssisted door operation without opening resistance
- PowerClose function for safe and silent door closing
- Touchless door opening
- Remote control and monitoring via EntriWorX EcoSystem

Affordable accessibility

With EasyAssist for standard doors and EasyAssist Pro for fire doors, you can achieve accessibility in less time and at less cost – up to 1,400 mm and 120 kg (200 lbs). PowerAssist even supports heavier doors up to 200 kg.

Reliability and safety

The design is simple, robust, and low-maintenance. Even in the event of a power failure, the door is securely closed mechanically.

Sustainability and efficiency

EasyAssist contributes to environmentally friendly buildings as it is energy recuperation instead of hydraulic oil to control the closing process.

Operating modes

Automatic mode	Door opens automatically through radar sensor or switches (e.g. knowing act device)
Push-N-Go mode	Door opens automatically following a slight manual movement of the door. Works for any door with mechanical locks.
Power assist	Manual opening drive support. Works for any door with mechanical locks.
Power close	Provides a controlled breaking and boost of two times of power to ensure the latching of the door against stack pressure with lowest possible noise.
