

Multifamily access control solutions

We make access in life smart and secure.

Smart. Secure. Convenient.

A secure living experience for your residents

As security and life safety requirements for multifamily buildings evolve, dormakaba promises to deliver products that will keep your property secure, yet comfortably accessible. Easily manage every access point in your multifamily property. One software system. One credential. One manufacturer: dormakaba, providing a complete solution.

Saffire LX M, D, I

Features the latest RFID technology in a beautiful contemporary design.

For resident doors.

Saffire M, L, P

Meets positive latching requirement.

For common areas, offices, stairwells or exterior doors.

Single credential solutions

Designed for securing high-traffic long range access areas anywhere around the property.

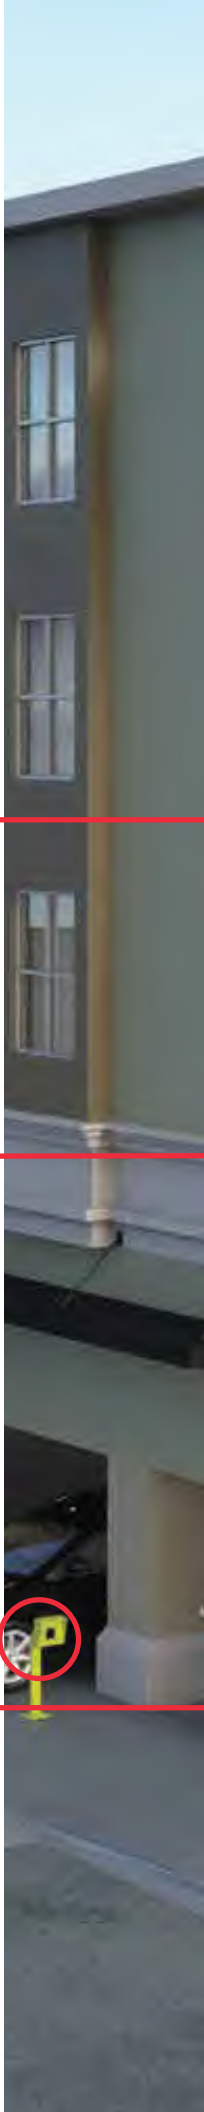

For perimeter access points such as parking garages.

Supported readers

dormakaba readers work with various electrified access hardware devices.

For perimeter entries, common areas, elevators and amenity spaces.

Contemporary design with security in mind

Saffire LX Series

Saffire LX features RFID technology in a contemporary design with a small footprint designed with the latest connectivity and security convenience for multihousing properties. Easy-to-use, flexible and secure, property managers have the option of issuing mobile, fob, wristband or keycard credentials.

Saffire LX offers a suite of smart solutions that combine high-performance with aesthetics that harmonize with progressive building technology and amenities, a lock design that integrates seamlessly with your property decor.

- Suited design throughout the entire property
- Industry first in offering multiple fascia and finish combinations
- Split finish options at standard pricing
- Scalable for future growth
- BHMA Grade 1 mortise lock
- Low maintenance as the lock operates with a completely sealed, contactless reader
- 2 year battery life
- Extra durable polycarbonate fascia material
- MKO available in mortise functions
- 3 hour Fire Rating

Control access to common areas and perimeter

SR Series Readers

The dormakaba Saflok SR Series readers provide access control to common areas, parking entrances, perimeter entries, elevators and amenity spaces. SR readers work with various electrified access hardware devices. Sleek, minimalist design fits unobtrusively to the property. The SR readers are controlled by our Community Access Management Software platform and can also offer online, wireless control use the Online software module.

Convenient mobile access

The SR readers are Bluetooth Low Energy (BLE) capable and can operate using the dormakaba Mobile Access Solutions for a perimeter access and resident unit application.

- Compatible with RX-Link/Online (optionally equipped with the Zigbee transceiver for centralized access control to add and remove residents from the reader)
- Receive real-time audits including entries and attempts without touring the lock with Messenger
- Contactless smart card reader leverages RX-Link/Online or DESFire and MiFare Plus credentials
- Programmable auto latch/unlatch feature eliminates need for manual latching
- Environmentally sealed contactless smart card reader protects against climate extremes, which is an especially vital feature for common access readers placed in external building and exit device applications

SR1 Surface mount

SR2 Flush mount

Community SRK Series Readers

The Community SRK reader series is designed for dormakaba multihousing access control applications integrating with Keyscan Aurora-based networked access control system. The integration offers a single-credential solution with many unique features for complete access control throughout a property.

- The readers decrypt and read dormakaba's credential formats as well as credential formats utilized by Keyscan access control systems
- Property managers and administrators utilize Aurora's software to program unique back-of-the-house access control applications affecting common areas, elevator floors, and perimeter access control such a parking gate or garage entrances
- The SRK reader series is available in three different models to suit a number of installation requirements and each offering a sleek minimalist design to compliment any property decor

Making mobile access a reality

Simply and securely

Bluesky mobile access solutions

The BlueSky app includes dormakaba's SDK (Software Development Kit), developed and secured by LEGIC Connect, renowned globally for highly-secure communication and identification. Convenient, reliable and secure for both the property and resident, BlueSky is an end-to-end mobile credential application utilizing Bluetooth Low Energy (BLE). BlueSky seamlessly integrates with the property's electronic locking system providing a state-of-the-art, cloud-based platform to secure issue and manage keys on smart devices. Mobile-minded residents download the app to simplify access and stay connected with facility-based IoT.

- Capable of being deployed across multiple properties
- iOS & Android compatible
- Available at the App and Google Store
- Ability to purchase mobile credentials on demand as residents request

BlueSky's cloud based mobile access key delivery app is designed expressly for the multihousing market, offering residents single credential access through the property.

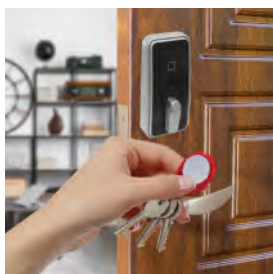

Note: This is a wholly owned dormakaba solution and doesn't require or utilize 3rd parties. All data is encrypted and safe.

RFID credentials make access smart

Convenient and cost-effective, smart credentials are easy-to-use and hard-to-lose. From convenient fobs and contactless RFID keycards with sophisticated information stage capability to mobile access solutions, dormakaba has the credential to suit individual resident needs.

Mobile Access

Managing access throughout the community

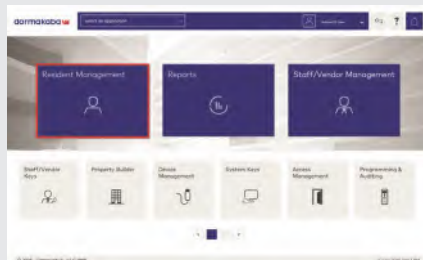

Community access management system

Community is the next generation Access Management Software solution specifically developed for multihousing properties. Community empowers property managers to intuitively authenticate and manage authorized access to residences, common areas and control perimeter access points through an entire property to improve security and operational efficiency ensuring a seamless living experience.

- Mobile credential delivery platform
- Browser-based client for access anywhere
- Easily configure resident and staff roles and rights
- Advanced lock auditing and reporting capabilities

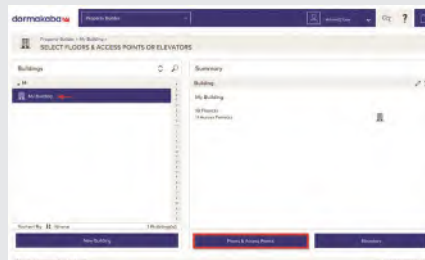

Resident visitor management

Property Managers can grant customized resident access control to generate PIN codes and mobile keys to temporary or recurring visitors. Residents can provide temporary or recurring visitors access by sending credentials verbally, by text or e-mail with minimal disruption to their busy lives.

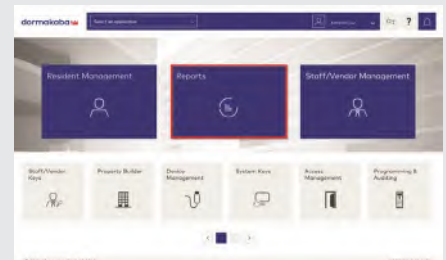

Resident management

Easily manage your residents and create individual profiles. Intuitively add or delete residents, customize their access levels and issue credentials within a few simple clicks.

Property builder

Build and modify the property details at your convenience. Define each building, floor, elevator and access point such as common areas, meeting rooms, laundry rooms and amenities through the entire building.

Auditing & reporting

The system provides centralized auditing and reporting as an efficient method of managing and controlling access through collecting both software and lock data.

RAC5

Perimeter access control

RAC5 designed to operate online or stand-alone mode

RAC5 is dormakaba's latest perimeter access control module for use online or offline. The optional multi-floor controller (MFC) device is connected to the property network and provides access control and secure stops. It functions with the RAC5 Series RFID readers and dormakaba's access management softwares.

Mobile access

The RAC5 NFC reader is Bluetooth Low Energy (BLE) capable and can operate using the dormakaba Mobile Access Solutions for perimeter and elevator.

Applications

- Garages
- Parking lots
- Pools/fitness centers
- Locks with electric strikes or electromagnetic locks
- Elevator access control

Features

- Optional online functionality
- Remotely cancel credentials in real-time
- Remotely pull audit
- Remotely update firmware
- NFC Programming and Auditing
- Secure bootloader and TLS over ethernet for improved security
- MFC expanded relays from 1 to 64
- Supports Mifare Classic, Mifare Plus, and Ultralight C credentials
- Available with 1 or 2 RAC5 RFID readers

RAC5 Lite (offline only)

Our Sustainability Commitment

We are committed to fostering sustainable development along our entire value chain in line with our economic, environmental and social responsibilities toward current and future generations.

Sustainability at product level is an important, future-oriented approach in the field of construction. In order to give quantified disclosures of a product's environmental impacts through its entire life cycle, dormakaba provides Environmental Product Declarations (EPDs), in which the results of the life cycle assessment (LCA) are presented.

The full EPD is available for download at

<https://www.dormakabagroup.com/en/sustainability/product-declarations>.
