dormakaba

Powerful time recording

B-COMM® for Workday®

Advantages at a glance

- Quick and accurate engagement with real-time validation
- Deep integration in Workday
- Supports time clocks, tablets and more
- Personalised user experience on all devices
- Cloud or on-premises deployment

Why dormakaba outperforms the competition

- You are in control: full system access with timely integrations and notifications
- Proven at global scale: thousands of integrations worldwide
- Designed for 100% uptime: employees paid on time, every time
- Designed for longevity: future-proof platform and durable devices

The comprehensive time recording platform

B-COMM for Workday makes your Workday Time Tracking software more powerful than ever. It turns Workday from a system of record into a live, end-to-end time recording environment that captures every clock-in, absence, and data component at the source and feeds it straight back into the processes that depend on it.

At its core is a comprehensive time recording platform built specifically for Workday. Rather than a generic connector, B-COMM for Workday delivers a wide range of Workday-ready functions out of the box, from time and attendance and absence management to vacation requests and labor-time production data acquisition. Employees book the way that suits them, supervisors get reliable data, and your Workday tenant stays the single source of truth.

Data acquisition solutions are available around the clock, so every booking is validated in real time against current employee and organization data the moment it's made.

The result is simpler HR, planning and financial processes. Validation data (employee, organization, service recording) keeps records accurate. Transaction data (time and attendance, absence, vacation requests, labor-time production) flows automatically into payroll, workforce planning, and cost allocation. The outcome is less manual reconciliation, fewer errors, and one connected platform from the shop floor to the back office.

Why customers choose dormakaba

The industry leader in time collection
Over 100 Years of Innovation. Designed for the Future.

A strong Workday partnership
As a certified Workday partner since 2015, we deliver a truly unified, enterprise-grade tracking platform that goes far beyond the capabilities of traditional vendors.

While others offer limited, incomplete, or niche solutions, dormakaba provides the most comprehensive, scalable, and proven time-collection ecosystem on the market.

Deep Workday integration – built to perform
B-COMM for Workday enhances your time tracking investment with seamless data synchronization, unified time and labor tracking, reduced administrative effort, and rapid implementation timelines.

Security is our DNA
Our ISO 27001-certified information security management framework and commitment to GDPR compliance ensure the highest standards of data protection and privacy. As regulations change, including alignment with the European Cyber Resilience Act, dormakaba maintains a proactive, secure-by-design approach. This gives customers confidence that their workforce's data will be protected today and in the future.

Unmatched breadth of time collection options
No other provider offers the variety and flexibility that dormakaba offers. Organizations can capture time seamlessly across all environments and workforce types, all within a single platform.

- Physical time clocks: enterprise-grade, for durability and accuracy
- Web clock: simple, browser-based entry for office and remote employees
- Mobile clock: modern smartphone experience for those on the go
- PC-based time entry: flexible solution leveraging existing hardware
- Tablet solutions (iPad™ and Android™): ideal for low-touch, cleaner environments
- IVR (telephone time entry): accessible to employees without digital access

Available user authentication methods

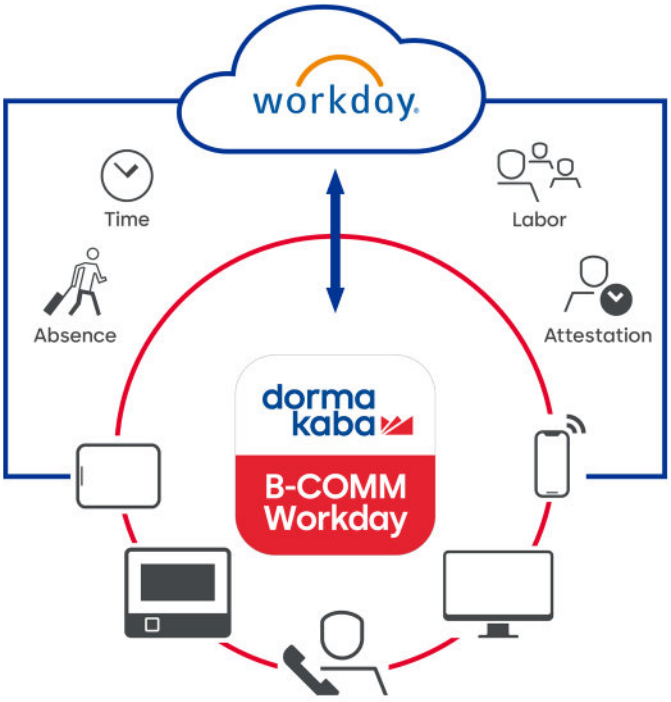

A clear advantage
dormakaba offers more time-collection methods, industry expertise, deeper Workday integration, and a fully unified platform compared to other solutions on the market.

Transform time tracking with dormakaba
One partner. One platform. Unlimited possibilities. Gain complete visibility, accuracy, and control across your workforce with dormakaba.

Seamless system connectivity for manufacturing industries
Bidirectional data integration connects customers' HCM systems for time management and ERP systems for production control directly and in real time. The comprehensive Shop Floor Data Collection module delivers accurate and reliable production data straight from the factory floor. Live data from production increases visibility and drives improvements in both output efficiency and cost performance. Together, these capabilities give manufacturers the connected, future-ready infrastructure they need to stay competitive.

Global support and implementation team
Our dedicated global team enables customers to roll out time and recording seamlessly across all regions. With expert guidance at every step, we ensure a smooth and successful implementation, wherever in the world you operate.
